As such, he has gained a comprehensive understanding of the specialized business of a professional reinsurance company and has been providing meaningful insights and perspectives which are very helpful during the board and committee meetings. He actively Chairs the Audit Committee and likewise participates actively in committee meetings where he is a member, and these include the Risk Oversight, the Governance & Related Party Transaction, and the Investment & Budget Committees. The Audit Committee which he chairs consistently obtained an excellent performance rating mainly because the Committee provides valuable insights and direction to Management and exercises effective oversight over the Company's financial reporting, internal and external audit.

The Management and Board of Directors of the Corporation believes that retaining Mr. Nera as Independent Director will be very beneficial to the continuing growth and strategic direction of the company. His business experience, knowledge and wisdom will be most valuable in the successful governance of the Corporation.

Directorship in more than 5 PLCs

Mr. Nera sits on the board of six (6) publicly listed companies, namely (1) House of Investments Inc., (2) iPeople, Inc., (3) EEI Corporation, (4) Ionics Inc., (5) Metro Retail Stores Group, Inc., Inc. and (6) Nat Re. While Mr. Nera has more than 5 directorships in publicly listed companies, including Nat Re, we submit that this does not interfere in the optimal performance of his roles and responsibilities as an Independent Director of Nat Re.

The Revised IC Code of Corporate Governance recommends a maximum of five directorship on the basis that being a director necessitates a commitment to the corporation and the limitation of board directorships is to ensure that the members of the board are able to effectively commit themselves to perform their roles and responsibilities, regularly update their knowledge and enhance their skills.

In the case of Mr. Nera, he was formerly the President and CEO of House of Investments and iPeople, inc. and EEI Corporation are subsidiaries of House of Investments. Thus, he is already very familiar with the operations of these three publicly-listed companies. Furthermore, Ionics Inc. was his former audit client, and the nature of their electronics manufacturing operations has not changed.

While Mr. Nera serves as a director in more than five (5) publicly listed companies, our records show that he has always attended the board and committee meetings and the Annual Stockholders Meeting of the Company. He is committed to his role and responsibility as an Independent Director of Nat Re as he finds sufficient time to keep abreast of the Company's operations, actively participates in meetings, challenges management's views and proposals and provides meaningful insights.

The attendance record of Mr. Nera is shown as follows:

MEETINGS	ATTENDANCE in 2024
Board	11/12
Annual Stockholders	1/1
Audit Committee	7/7
Risk Oversight Committee	4/4
Governance & Related Party Transaction Committee	4/4
Investment & Budget Committee	7/7

Term as Independent Director

The Management of Nat Re strongly believes that retaining Mr. Nera in the Company's board will be very beneficial to the continuing growth and strategic direction of the Company. His in-depth industry and business knowledge and experience will be most valuable in the successful governance of this Company.

The re-election of Mr. Medel T. Nera as Independent Director of the Company for the term 2025 - 2026 is subject to the approval of the stockholders.

PART I
INFORMATION REQUIRED IN INFORMATION STATEMENT

A. GENERAL INFORMATION

Item 1. Date, Time and Place of Meeting ([Nat Re ASM Webpage](#)):

Date	:	June 25, 2025
Time	:	2:00 P.M.
Place	:	Kawayan Ballroom, 4F, The City Club Alphaland Makati Place, 7232 Ayala Avenue Ext., Makati City
Mailing Address	:	National Reinsurance Corporation of the Philippines 31 st Floor, BPI-Philam Life Makati 6811 Ayala Avenue, Makati City, 1227 Philippines
Telephone Number	:	(632) 8988-7400

The Corporation will be holding a physical (face-to-face) meeting.

The enclosed proxy is solicited for and on behalf of the Management of **NATIONAL REINSURANCE CORPORATION OF THE PHILIPPINES**, *doing business under the names and styles of Nat Re; Philippine National Reinsurance Company; PhilNaRe* (hereinafter called the “Company” or “Nat Re”) for use in connection with the annual meeting of the stockholders of the Company.

The approximate date on which the Information Statement shall be provided to the stockholders of record as of May 13, 2025 (the “Record Date”) will be on or before June 4, 2025, through publication of the Notice of Annual Stockholders Meeting with QR Code, in the business section of two (2) newspapers of general circulation, in both print and online format for two (2) consecutive days.

The matters to be considered and acted upon at such meeting are referred to in the Notice and are more fully discussed in this statement.

Item 2. Dissenter’s Right of Appraisal

The dissenter’s right of appraisal under Section 80 of the Revised Corporation Code of the Philippines is not applicable in any of the matters to be submitted to the stockholders. The agenda for the annual stockholders’ meeting does not include any matter which would give rise to the appraisal right of the stockholders under Section 80 of the Revised Corporation Code.

Under the Revised Corporation Code, appraisal right shall arise when a dissenting stockholder votes against a proposed corporate action. In such a case, the dissenting stockholder may make a written demand for the payment of the fair value of his shares within 30 days from the date on which the vote was taken.

Item 3. Interest of Certain Persons in or Opposition to Matters to be Acted Upon

No director, officer, nominee for director, or associate of any of the foregoing, has any substantial interest, direct or indirect, by security holdings or otherwise, on any matter to be acted upon, other than election to office. No director has informed the Corporation in writing of any intention to oppose any action to be taken during the meeting.

B. CONTROL AND COMPENSATION INFORMATION

Item 4. Voting Securities and Principal Holders thereof

- (a) As of the Record Date, which is May 13, 2025, the date to determine the stockholders entitled to notice and to vote at the annual stockholders meeting on June 25, 2025, the Corporation has the following outstanding shares:

Common shares (voting) - 2,123,605,600 shares*

**As of April 30, 2025, outstanding common shares of 9,334,510 under PCD nominee account representing 0.44% of the outstanding capital stock are held by foreign shareholders.*

- (b) Only holders of Common Shares as of the Record Date shall be entitled to vote in the election of directors in the manner provided hereunder. On the approval of the minutes of the previous meeting, ratification of all acts of the Board of Directors and officers during the previous year, and approval of the appointment of the independent auditor, each share of outstanding common stock is entitled to one vote.
- (c) In the election of directors, every stockholder entitled to vote shall have the right to vote in absentia or by proxy the number of common shares of stock standing in his name at record date. A stockholder entitled to vote may vote such number of shares for as many persons as there are directors to be elected, or he may cumulate said shares and give one candidate as many votes as the number of directors to be elected multiplied by the number of his shares shall equal, or he may distribute them on the same principle among as many candidates as he shall see fit, provided, that the total number of votes cast by a stockholder shall not exceed the number of shares owned by him as shown in the books of the Corporation multiplied by the whole number of directors to be elected.

The Amended By-laws of the Corporation, approved by the Securities and Exchange Commission on January 3, 2022, allow the stockholders to attend the stockholders' meetings and to exercise their right to vote in absentia or through remote communication. The registration and voting procedures are further detailed in the *Guidelines for Participating via Remote Communication and Voting in Absentia*.

(d) Independent Directors.

Mr. Medel T. Nera, Mr. Rex Maria A. Mendoza and Mr. Roberto G. Manabat are currently the Corporation's Independent Directors. Messrs. Nera, Mendoza and Manabat have been an Independent Director since July 2011, June 2019 and June 2021, respectively. Conversely, the Board provides justification (please refer to Annex A) for the re-election of Mr. Nera as an Independent Director and the same will be submitted for approval of the stockholders.

For the year 2025 - 2026, the Corporation intends to have a total of three (3) independent directors. The Final List of Candidates for Independent Directors (Annex A) includes:

1. Mr. Medel T. Nera, who was nominated by Enrico U. Camince;
2. Mr. Rex Ma. A. Mendoza, who was nominated by Enrico U. Camince ; and
3. Mr. Roberto G. Manabat, who was nominated by Enrico U. Camince.

The nominees for independent directors are not related to the person who have nominated them as such. The three (3) nominees for Independent Directors were selected by the Board Nomination and Compensation Committee in accordance with the guidelines in the Manual of Corporate Governance, the Insurance Commission Circular No. 31-2005 dated September 26, 2005, the Revised Code of Corporate Governance for Publicly Listed Companies (SEC Memorandum Circular No. 19, Series of 2016), and the Guidelines on the nomination and election of Independent Directors (SRC Rule 38). The Nomination and Compensation Committee is composed of the following:

Chairman:	Maria Consuelo A. Lukban
Vice Chairman:	Yvonne S. Yuchengco
Members:	Roberto G. Manabat (Independent Director)
	Joli Co Wu
	Evelina G. Escudero

(e) Other directorships held in reporting companies naming each company.

Evelina G. Escudero	Philippine National Construction Corporation
Yvonne S. Yuchengco	iPeople Inc. Seafront Resources Corporation, House of Investments, Inc. Petro Energy Resources Corporation
Rex Maria A. Mendoza	AyalaLand Logistics Holdings Corp. Ayala Land, Inc.
Medel T. Nera*	House of Investments, Inc. iPeople, Inc. EEI Corporation Ionics, Inc. Metro Retail Stores Group, Inc.
Roberto G. Manabat	Union Bank of the Philippines
Allan R. Luga	Philippine National Construction Corporation

Roberto G. Manabat, Rex Maria A. Mendoza and Medel T. Nera are currently the Corporation's Independent Directors. To be considered an independent director under IC Circular Letter No. 31-2005, one: (i) has not been an officer or employee of the company for the last three years immediately preceding his term or incumbency; (ii) is not related by consanguinity or affinity to an officer in a senior management position in the company; and (iii) does not provide services and receives no income for other professional services to the company. The Corporation has no transactions with any of its independent directors, Messrs. Manabat, Mendoza and Nera.

A justification for the re-election of Mr. Medel T. Nera as an Independent Director of Nat Re for the Term 2025-2026 is presented under **Annex A.*

(f) Family Relationship

There is no family relationship up to the fourth civil degree, either by consanguinity or affinity, among directors, executive officers, or nominees for election as directors.

(g) Resignation/Re-election

Since the last annual stockholders' meeting of the Corporation, no Director has resigned or declined to stand for reelection to the Board of Directors of the Corporation because of disagreement with the Corporation on any matter relating to the Corporation's operations, policies or practices.

(h) Involvement in Legal Proceedings

To the best of the Corporation's knowledge, there has been no occurrence during the past 5 years up to the present date of this Information Statement of any of the following events that are material to an evaluation of the ability and integrity of any director, any nominee for election as director, executive officer, or controlling person of the Corporation:

- Any bankruptcy petition filed by or against any business of which the person was a general partner or executive officer, either at the time of the bankruptcy or within 2 years prior to that time;
- Any conviction by final judgment, including the nature of the offense, in a criminal proceeding, domestic or foreign, or being subject to a pending criminal proceeding, domestic or foreign, traffic violations and other minor offenses;
- Being subject to any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, domestic or foreign, permanently or temporarily enjoining, barring, suspending or otherwise limiting his involvement in any type of business, securities, commodities or banking activities; and
- Being found by a domestic or foreign court of competent jurisdiction (in a civil action), the SEC or comparable foreign body, or a domestic or foreign exchange or other organized trading market or self-regulatory organization, to have violated a securities or commodities law or regulation, and the judgment has not been reversed, suspended or vacated.

The Company, on the other hand, is presently a party to the following legal cases:

1. Oriental Assurance Corp. v. National Reinsurance Corporation of the Philippines and CBR Asia Insurance Brokers, Inc.

Civil Case No. 73975

Regional Trial Court, Branch 157, Pasig City

This is a complaint for a sum of money and damages filed by Oriental Assurance Corp. ("OAC") against National Reinsurance Corporation of the Philippines ("NRCP") and CBR Asia Reinsurance Brokers, Inc. ("CBR Asia").

While NRCP has paid the P100,000,000.00 maximum limit under the Reinsurance Policy, OAC has demanded a further sum of P7,986,422.67 representing "Sue and Labor" expenses allegedly incurred for the salvage of the vessel. NRCP has denied liability, citing the fact that its liability under the Reinsurance Policy cannot exceed P100,000,000.00.

On June 24, 2024, NRCP received a Decision dated March 12, 2024 from the court, holding NRCP liable to OAC for the Sue and Labor Expenses amounting to Php7,986,422.27, plus 6% interest per annum from the date of judicial demand on July 9, 2013. In its Decision, the court held that sue and labor expenses were to be considered an interest separate and distinct from the hull and machinery. Thus, it was recoverable under the Facultative Reinsurance Policy. The court also dismissed the complaint against CBR Asia and held it free from liability, as it only acted as a broker and not a reinsurer that would be liable to OAC.

NRCP filed a Notice of Appeal on July 8, 2024. In an Order dated July 11, 2024, the court gave due course to NRCP's Notice of Appeal and directed the records of the case to be elevated to the Court of Appeals. Upon transmitting the records to the Court of Appeals, NRCP will be directed to file its appellant's brief within 45 days from receipt of the order. To date, NRCP has not received the directive to file its brief.

2. National Reinsurance Corporation of the Philippines v. Oriental Assurance Corp.

Civil Case No. R-MKT-23-00049-CV

Regional Trial Court, Branch 56, Makati City

This pertains to OAC's outstanding liability to NRCP pursuant to the Marine Hull Retro Binder No. RB/F/MH2008-00409 where OAC confirmed its facultative retrocession acceptance of USD500,000.00 under RI Policy No. MH/2008-00500 in the name of CBR Asia/China United/Gentle Seasons Worldwide Limited (collectively, "Policies").

One of the vessels covered by the insurance, M/ V Full King, met a marine accident in the Sea of Sumatra on or about July 23, 2008, or within the period covered by the insurance. The total compensation due to the insured was USD7,885,577.67, USD2,819,578.86 of which was for NRCP's account. In turn, OAC's share was USD396,565.24.

On January 29, 2011, NRCP served OAC a Final Loss Advice dated January 11, 2011 (1) informing OAC of a loss to a risk retroceded to it pursuant to the Policies, which happened on July 23, 2008 within the retrocession term from June 1, 2008 to June 1, 2009 when the covered vessel Full King met a maritime accident in the Sea of Sumatra; and (2) demanding payment of OAC share of the insurance paid to the insured by NRCP in the amount of USD396,565.24. From this amount, a balance of USD 394,142.97 remains to be settled by OAC with NRCP.

NRCP has completed the presentation of the respective testimonies of two of its three witnesses. NRCP will present its last witness on May 6, 2025.

3. Deficiency Tax Assessments and Tax Cases

a) Taxable year 2016

On December 29, 2021, the Company received the Final Decision on Disputed Assessment (FDDA) for Value Added Tax (VAT) deficiency in the amount of P53.1 million for the taxable year 2016, inclusive of interest amounting to P20.6 million, signed by the Commissioner of Internal Revenue. The Company continues to dispute the assessment and has filed a Petition for Review dated February 2, 2022 with the Court of Tax Appeals (CTA), which was docketed as CTA Case No. 10791.

The case has been submitted for decision on 31 May 2024. To date, no decision has been rendered by the CTA in this case.

b) Taxable year 2017

On March 24, 2023, the Company received the FDDA for the deficiency VAT assessment for the taxable year 2017 in the aggregate amount of P54.04 million, inclusive of surcharges, interests, and penalties computed until April 30, 2023. This led to the Company's filing of a Petition for Review with Urgent Motion To Suspend Tax Collection (With Prayer for the Issuance of Status Quo Ante Order and/or Writ of Preliminary Injunction) dated May 16, 2023, which was docketed as CTA Case No. 11156, to dispute the assessment and to seek the suspension of the BIR's tax collection efforts in the interim.

As of date, no decision has been rendered by the CTA in this case.

c) Taxable year 2018

On September 28, 2021, the Company received a Letter of Authority (LOA) from the BIR to examine the Company's books of accounts and other accounting records for all internal revenue taxes for the taxable year 2018.

On September 1, 2023, the Company received the FDDA amounting to P39.32 million for which the Company has offered to settle the alleged tax deficiencies through an Offer Letter of Compromise in the amount of P15.00 million with the BIR Large Taxpayers – Collection Enforcement Division (LT-CED) which was paid on September 29, 2023.

On October 2, 2023, the Company filed a Petition for Review disputing P19.22 million of the total amount specified in the FDDA, which was docketed as CTA Case No. 11276.

On November 12, 2024, the Company received a Notice of Denial for Compromise Settlement.

The CTA case is scheduled for hearing from April to August 2025.

d) Taxable years 2021 and 2022

On September 12, 2023 and April 2, 2024, the Company received the LOA from the BIR to examine the Company's books of accounts and other accounting records for all internal revenue taxes for the taxable years 2021 and 2022, respectively. Management has provided all the documents required by the BIR for taxable years 2021 and 2022 on November 30, 2023 and April 30, 2024, respectively.

(i) Significant employees

Although the Corporation has and will likely continue to rely significantly on the continued individual and collective contributions of its senior management team, the Corporation is not dependent on the services of any particular employee. It does not have any special arrangements to ensure that any employee will remain with the Corporation and will not compete upon termination.

(j) **Certain Relationships and Related Transactions**

The Company's corporate governance manual provide that related party transactions shall be fully disclosed and conducted on terms that are comparable to normal commercial practices to safeguard the best interest of the Corporation and its stakeholders.

He was formerly Head of the Financial Services Assurance practice of Ernst and Young in the Far East covering China, Taiwan, HongKong, South Korea, Singapore, Philippines and Vietnam.

Mr. Nera obtained his Master of Business Administration degree from the Stern School of Business, New York University, USA and Bachelor of Science in Commerce from the Far Eastern University, Philippines. He attended the International Management Program from the Manchester Business School, UK, and the Pacific Rim Bankers Program from the University of Washington, USA.

****Justification for the re-election of Director Medel T. Nera as an Independent Director of Nat Re for the Term 2025 - 2026**

Mr. Nera has been an Independent Director of Nat Re since 2011. As such, he has gained a comprehensive understanding of the specialized business of a professional reinsurance company and has been providing meaningful insights and perspectives which are very helpful during the board and committee meetings. He actively Chairs the Audit Committee and likewise participates actively in committee meetings where he is a member, and these include the Risk Oversight, the Governance & Related Party Transaction, and the Investment & Budget Committees. The Audit Committee which he chairs consistently obtained an excellent performance rating mainly because the Committee provides valuable insights and direction to Management and exercises effective oversight over the Company's financial reporting, internal and external audit.

The Management and Board of Directors of the Corporation believes that retaining Mr. Nera as Independent Director will be very beneficial to the continuing growth and strategic direction of the company. His business experience, knowledge and wisdom will be most valuable in the successful governance of the Corporation.

Directorship in more than 5 PLCs

Mr. Nera sits on the board of other publicly listed companies, namely:

Name of publicly-listed company	Type of Directorship
House of Investments, Inc	Director
iPeople, Inc.	Director
EEI Corporation	Director
Ionics, Inc.	Independent Director
Metro Retail Stores Group, Inc.	Independent Director

While Mr. Nera has more than 5 directorships in publicly listed companies, including Nat Re, we submit that this does not interfere in the optimal performance of his roles and responsibilities as ID of Nat Re.

The Revised IC Code of Corporate Governance recommends a maximum of five directorships on the basis that being a director necessitates a commitment to the corporation and the limitation of board directorships is to ensure that the members of the board are able to effectively commit themselves to perform their roles and responsibilities, regularly update their knowledge and enhance their skills.

In the case of Mr. Nera, he was formerly the President and CEO of House of Investments, Inc. and iPeople, Inc. and EEI Corporation are subsidiaries of House of Investments, Inc. Thus, he is already very familiar with the operations of these three publicly-listed companies. Furthermore, Ionics Inc. was his former audit client, and the nature of their electronics manufacturing operations has not changed.

While Mr. Nera serves as a director in more than five (5) publicly listed companies, our records show that he has always attended the board and committee meetings and the Annual Stockholders Meeting of the Company. He is committed to his role and responsibility as an Independent Director of Nat Re as he finds sufficient time to keep abreast of the Company's operations, actively participates in meetings, challenges management's views and proposals and provides meaningful insights.

The attendance record of Mr. Nera is shown as follows:

MEETINGS	ATTENDANCE in 2024
Board	11/12
Annual Stockholders	1/1
Audit Committee	7/7
Risk Oversight Committee	4/4
Governance & Related Party Transaction Committee	4/4
Investment & Budget Committee	7/7

Term as ID

The Management of Nat Re strongly believes that retaining Mr. Nera on the company's board will be very beneficial to the continuing growth and strategic direction of the company. His business experience, knowledge and wisdom will be most valuable in the successful governance of this company.

The re-election of Mr. Medel T. Nera as Independent director of the Company for the term 2025-2026 is subject to the approval of the stockholders.

ANNEX A-1
NEW NOMINEES FOR REGULAR DIRECTOR

Emmanuel De Leon Samson, Nominee Director of the Corporation.

Mr. Samson is a member of the Board of Trustees of the Government Service Insurance System (GSIS) and serves as Chairman of both its Risk Oversight Committee and Provident Fund Committee of Trustees. He has been the Lead Independent Director of CTS Global Equity Group since 2021. Prior to his appointment as Trustee of the GSIS, Mr. Samson was the Chief Finance Officer of Nickel Asia Corporation from March 2006 to December 2020, where he also held concurrent positions as member of Board of Directors, Chief Governance Officer, and Treasurer of several corporations under the NAC Group of Companies.

With over 25 years of experience as Senior Executive at large corporations in the field of banking and finance, including Credit Agricole Indosuez, Indosuez W.I. Carr Securities (Phils.) Inc., Amon Securities Corporation, and Rizal Commercial Banking Corporation, Mr. Samson brings in comprehensive experience in international and domestic banking, equity brokerage, financial planning, and treasury management, as well as extensive expertise in terms of client relationships and project management.

He obtained a Bachelor of Arts degree Major in Economics, History and Political Science from the De La Salle University in 1981.

Rita E. Riddle, Nominee Director of the Corporation

Ms. Riddle was appointed as a Trustee of the Government Service Insurance System (GSIS) in January 2023. Currently, she serves as the National President of the Philippine Association of School Superintendents (PASS) and the Schools Division Superintendent of the Department of Education - Division of Makati, a position she also held in the Division of DepEd Caloocan from 2015 to 2017.

Ms. Riddle held several key positions in the DepEd Divisions of Paranaque and Mandaluyong from 1994 to 2013 before she was appointed as OIC at the Schools Division Office of the DepEd-Division of Caloocan in 2013.

Ms. Riddle obtained her Career Executive Service Officer V in 2018 and brings over 30 years of solid experience in the education sector where she rose from the ranks. She holds a Master's degree in Public Administration from the Trinity University of Asia and a Bachelor's degree in Office Administration from the Polytechnic University of the Philippines.

ANNEX C

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Description of Business

Nat Re writes both life and non-life reinsurance through treaty and facultative arrangements. Facultative reinsurance refers to individually written and negotiated reinsurance agreements, while treaty contracts are agreements either; to share proportionately in the specific portions of the business written by the insurance company, or, to pay losses incurred by the insurer in excess of an agreed amount up to a specified limit.

The Company writes domestic and foreign reinsurance business with the domestic portfolio making up close to 64% of the Company's total Gross Premiums Written. The domestic portfolio has a Net Underwriting Income of P436M in 2024 from P519M in 2023.

76% of the domestic Gross Premiums Written comes from the Life Portfolio, which also accounts for 95% of domestic Net Underwriting Income.

Our Life reinsurance business generated P2.9B in gross written premiums (GWP), marking a 13% year-on-year increase. This growth was primarily driven by a 34% rise in Modified Coinsurance, followed by a 20% increase in Group Insurance, supported by newly written lead treaties. The Medical line also grew by 9%, reaching P147M.

However, underwriting income for the Life segment totaled P418M, falling short of expectations. The underperformance was due to higher-than-anticipated loss ratios across all business lines. Additionally, extra experience refund reserves were established to cover contractual obligations based on the most recent data. On the positive side, lower commission expenses helped mitigate some of the impact, resulting in a total combined ratio of 78%.

We continued to advocate for the industry's ongoing push for more streamlined underwriting, especially as traditional methods of obtaining medical evidence became more difficult and newer distribution channels called for simpler processes. In addition, we delivered webinars and tailored training sessions aimed at strengthening the technical skills of underwriting professionals at Life ceding companies. These training programs addressed a range of topics, including individual and group medical underwriting, group insurance pricing, and claims evaluation.

By end of 2024 around 31% of total non-life business came from local risks, with 69% of the portfolio coming from a global book of geographically diversified exposures. Aside from writing global risks to diversify the Company's risks exposures, the Company also purposely reduced its concentration of exposures to Philippine catastrophe risks by entering into reciprocal exchanges with foreign reinsurers to replace its local exposures with globally diversified risks.

In 2024, Nat Re's non-life product lines are Agriculture accounting for 55% of its non-life premiums, followed by Fire at 25%, Casualty at 11%, Marine at 5% and Motor at 4%.

Close to 99% of the total portfolio comes from treaty business, with facultative contracts accounting for the difference. Foreign contracts, on the other hand, are exclusively treaty contracts.

Facultative contracts are limited to domestic risks where they account for close to 10% of the domestic life portfolio and 4% of the domestic non-life Gross Premiums Written.

The Company's non-life products include: Fire Insurance including broad named perils conditions as well as Commercial and Industrial All Risks; Engineering which includes Construction all Risks, Erection All Risks, Electronic Equipment Insurance, Machinery Breakdown and Boiler and Pressure Vessel Insurance; Liability Insurance which includes Comprehensive General Liability, Directors and Officers Liability, Products Liability and Errors and Omission; Terrorism Insurance; Money Securities and Payroll,

Fidelity Guarantee; Property and Equipment Floaters; Personal Accident; and other Miscellaneous lines like Hole-In-One.

Company recorded a net profit of P551.3 million for the year ended December 31, 2024, P15.2 million or 3% more than the net profit recognized in 2023. The Net profit resulted from generating Net underwriting income of P498.0 million and Investment and other income and expenses of P533.1 million while incurring General and administrative expenses of P353.7 million and Tax expense of P126.1 million.

Underwriting Results

Net underwriting income amounted to P498.0 million in 2024, lower by P74.5 million or 13% from P572.5 million in 2023. Lower net underwriting income resulted from the Life business, partially negated by higher net underwriting income from the Non-life business.

Lower net underwriting income from the Life business resulted mainly from higher experience refund and unfavorable claims development for past underwriting years.

Higher net underwriting income from the Non-life business resulted mainly from the (a) Absence of large losses during the year from the foreign business; and (b) Lower fire losses from the domestic business.

Reinsurance premium income

Reinsurance premium income amounted to P4,855.5 million in 2024, higher by P574.1 million or 13% from P4,281.4 million in 2023. This resulted mainly from (a) Higher earned premiums from Non-life foreign business; and (b) Higher reinsurance premium income generated from the growth in the Life business. These were partially negated by (c) Lower reinsurance premium income generated mainly from Fire under Non-life domestic business; and (d) Higher experience refund for past underwriting years from Life business.

Claims and claims reserves – net

Claims and claims reserves – net amounted to P3,427.8 million in 2024, higher by P505.9 million or 17% from P2,921.9 million in 2023, resulting to loss ratios of 71% in 2024 versus 68% in 2023 (relative to earned premiums).

Higher claims ratio in 2024 resulted mainly from the impact of higher experience refund and the unfavorable claims development for past underwriting years from the Life business. These were partially negated by (a) Lower fire losses from Non-life domestic business; and (b) Absence of large losses from Non-life foreign business.

Commissions – net

Commissions – net amounted to P956.0 million in 2024, higher by P121.4 million or 15% than from P834.6 million in 2023, resulting to commission ratios of 20% in 2024 and 19% in 2023 (relative to earned premiums). This resulted mainly from the impact of higher experience refund in the Life business.

Other underwriting income amounted to P26.3 million in 2024, lower by P21.3 million or 45% from P47.6 million in 2023 resulting from lower net benefits received from a certain group life treaty participating in a pooling arrangement.

Investment and other income and expenses – net amounted to P533.1 million in 2024, higher by P56.7 million or 12% from P476.4 million in 2023. Higher investment income in 2024 resulted mainly from (a) Higher interest income from government securities as discussed in Loans and Receivables below; (b) Favorable change in the net fair value of held-for-trading securities; and (c) Reversal of allowance for impairment losses related to Reinsurance balances receivable and Reinsurance recoverable on reported claims.

These were partially negated by (a) Loss on sale of available-for-sale financial assets in 2024 as compared to the gain on sale in 2023; and (b) Higher impairment losses recognized for the Company's available-for-sale equity securities.

General and administrative expenses amounted to P353.7 million in 2024, lower by P11.4 million or 3% from P365.1 million in 2023. This resulted mainly from the absence of allowance for impairment losses from Reinsurance balances receivable and Reinsurance recoverable on reported claims in 2024 as compared to 2023, partially negated by higher manpower costs.

Tax expense amounted to P126.1 million in 2024, lower by P21.6 million or 15% from P147.7 million in 2023. This resulted mainly from lower net underwriting income partially negated by higher interest income recognized in 2024 as discussed above.

The Company's shareholders' equity amounting to P6,864.5 million as at December 31, 2024 increased by P611.5 million from the balance as at December 31, 2023 of P6,253.0 million. The increase resulted mainly from the net income of P551.3 million as discussed above and increase in revaluation reserves by P62.9 million mostly from the favorable market value movements of Available-for-Sale securities.

Cash and cash equivalents amounting to P449.7 million as at December 31, 2024 increased by P177.9 million or 65% from the balance as at December 31, 2023 of P271.8 million. The increase in the balance resulted mainly from the interest received from fixed income securities and proceeds from the net disposals/maturities of other investments and AFS financial assets. These were partially negated by the net cash used in operating activities due to settlements made during the year.

Reinsurance balances receivable – net amounting to P5,379.9 million as at December 31, 2024 increased by P957.8 million or 22% from the balance as at December 31, 2023 of P4,422.1 million. The increase in the balance resulted mainly from the accrual of reinsurance premiums, net of commissions from Non-life foreign business, partially negated by collections during the year.

Held-for-trading (HFT) securities amounting to P448.0 million as at December 31, 2024 decreased by P84.7 million or 16% from the balance as at December 31, 2023 of P532.7 million. The decrease in balance resulted mainly from the net disposals amounting to P92.4 million (acquisitions net of disposals).

Available-for-sale (AFS) financial assets amounting to P5,279.7 million as at December 31, 2024 decreased by P20.5 million from the balance as at December 31, 2023 of P5,300.2 million. The movement in the account balance can be explained by the following:

	2024	2023
Cost		
Balance at beginning of year	P5,318.0	P4,910.9
Acquisitions	2,144.3	1,808.4
Disposals/maturities	(2,216.2)	(1,397.5)
Impairment losses	(22.2)	(2.5)
Unrealized foreign currency gains (losses)	24.8	(1.3)
	5,248.7	5,318.0
Fair value adjustment		
Balance at beginning of year	(17.8)	(102.9)
Changes in fair value	2.6	100.7
Fair value losses (gains) on disposal	24.0	(18.1)
Impairment losses	22.2	2.5
	31.0	(17.8)
Balance at end of year	P5,279.7	P5,300.2

The decrease in the balance resulted mainly from the net disposal of fixed income and equity securities amounting to P47.9 million (acquisitions net of disposals/maturities including fair value gains on disposals). This was partially negated by foreign currency gains amounting to P24.8 million in 2024 as compared to foreign currency losses of P1.3 million in 2023.

Held-to-maturity (HTM) securities amounting to P4,024.5 million as at December 31, 2024 increased by P112.4 million from the balance as at December 31, 2023 of P3,912.1 million. The increase in the balance resulted mainly from the purchase of government bonds amounting to P670.4 million, partially negated by maturities amounting to P571.5 million.

Other investments amounting to nil as at December 31, 2024 decreased by P252.8 million from the balance as at December 31, 2023 of P252.8 million. The decrease in the balance resulted from the maturities of short-term time deposits during the year.

Loans and receivables amounting to P127.6 million as at December 31, 2024 increased by P18.0 million or 16% from the balance as at December 31, 2023 of P109.6 million. The increase in the balance resulted mainly from the increase in accrued interest receivable amounting to P11.1 million due to the increase in government securities.

Property and Equipment - net amounting to P38.2 million as at December 31, 2024 decreased by P4.0 million or 9% from the balance as at December 31, 2023 of P42.2 million. The decrease in the balance resulted mainly from the depreciation expense recognized during the year amounting to P10.3 million, partially negated by the acquisitions amounting to P6.3 million.

Reinsurance recoverable on reported claims and claims reserves - net amounting to P2,847.5 million as at December 31, 2024 decreased by P420.9 million or 13% from the balance as at December 31, 2023 of P3,268.4 million. The decrease in the balance resulted mainly from the collections of losses recoverable from retrocessionaires during the year.

Deferred acquisition costs amounting to P1,096.6 million as at December 31, 2024 increased by P335.2 million or 44% from the balance as at December 31, 2023 of P761.4 million. The increase in the balance resulted mainly from acquiring new Life modified co-insurance business, net of amortizations during the year.

Deferred tax assets – net amounting to P582.3 million as at December 31, 2024 increased by P59.0 million or 11% from the balance as at December 31, 2023 of P523.3 million. The increase in the balance resulted mainly from increase in claims reserves as discussed under Claims and claims reserves account.

Other assets – net amounting to P116.1 million as at December 31, 2024 increased by P41.1 million or 55% from the balance as at December 31, 2023 of P75.0 million. The increase in the balance mainly pertains to the acquisition of system solution for the adoption of PFRS 17 in 2027.

Reinsurance balances payable amounting to P2,089.9 million as at December 31, 2024 decreased by P211.7 million or 9% from the balance as at December 31, 2023 of P2,301.6 million. The decrease in the balance resulted mainly from settlements of retroceded premiums, partially offset by the accrual of retroceded premiums during the year.

Forward liability amounting to P0.2 million as at December 31, 2024 decreased by P92.0 million from the balance as at December 31, 2023 of P92.2 million resulting from maturities of forward contracts during the year.

Accounts payable and accrued expenses amounting to P387.9 million as at December 31, 2024 decreased by P133.8 million or 26% from the balance as at December 31, 2023 of P521.7 million. The decrease in the balance resulted mainly from the settlements, net of expenses incurred during the year.

Claims and Claims reserves amounting to P9,832.4 million as at December 31, 2024 increased by P1,102.7 million or 13% from the balance as at December 31, 2023 of P8,729.7 million. The increase in the balance resulted mainly from recognizing loss reserves from earned premiums during the year as discussed under Reinsurance Premium Income and claims incurred during the year as discussed under Claims and claims reserves – net, negated by the settlement of claims during the year.

Premium reserves amounting to P1,860.6 million as at December 31, 2024 decreased by P362.0 million or 16% from the balance as at December 31, 2023 of P2,222.6 million. The decrease in the balance resulted mainly from the premiums earned during the year as discussed in Reinsurance Premium Income.

The Company recorded a net profit of P536.1 million for the year ended December 31, 2023, P480.4 million more than the net profit recognized in 2022. The Net profit resulted from generating Net underwriting income of P572.5 million, and Investment and other income and expenses of P476.4 million, negated by General and administrative expenses of P365.1 million and Tax expense of P147.7 million.

Underwriting Results

Reinsurance Premium Income

The Company generated P6,193.5 million, P4,765.1 million and P4,281.4 million of Reinsurance premiums – net of returns, Net premiums retained and Net earned premiums, respectively, in 2023, higher by P1,503.3 million, P1,796.4 million, P1,300.1 million, respectively, compared to 2022. The favorable variance resulted mainly from growth and improved profitability of the Non-life foreign and Life businesses.

Underwriting Deductions

Claims and claims reserves – net amounted to P2,921.9 million, higher by P985.0 million compared to 2022 resulting to a claims ratio of 68% in 2023 versus 65% in 2022. The higher claims ratio resulted mainly from higher claims ratios from Non-life domestic business partially negated by lower claims ratio from Non-life foreign and Life businesses.

Commissions – net amounted to P834.6 million, higher by P7.9 million compared to 2022 resulting to a commission ratio of 19% versus 28% in 2022. The improvement in the commission ratio resulted mainly from growth generated from Non-life foreign and Life businesses with low commission costs, partially negated by higher commission costs from Non-life domestic business.

Reinsurance premium income

Higher reinsurance premiums – net of returns, Net premiums retained and Net earned premiums resulted mainly from (a) New agricultural contracts from the Non-life foreign business with better underwriting results than certain property contracts that were not renewed in 2023; and (b) Growth of the Life business resulting mainly from substantial growth experience in the Group portfolio.

Claims and claims reserves – net

Higher claims ratio in 2023 resulted mainly from significant property losses from the Non-life domestic business. These were partially negated by the absence of catastrophe losses under Non-life foreign business resulting from the termination of certain property contracts as discussed in Reinsurance Premium Income and lower claims ratio from the Life business resulting from favorable loss development.

Commissions – net

Lower commission ratio in 2023 resulted mainly from higher earned premiums from Non-life foreign and Life businesses with low commission costs.

Other underwriting income amounted to income of P47.6 million, higher by P29.1 million or 159% from P18.5 million in 2022. This pertains to the net benefits received from a certain group life treaty participating in a pool arrangement.

Investment and other income and expenses – net amounted to P476.4 million in 2023, higher by P261.0 million or 121% from P215.4 million in 2022. Higher investment income in 2023 resulted mainly from (a) Higher interest income by P126.7 million due to the impact of higher coupon rates and increase in investments in bonds as discussed in Loans and Receivables below; (b) Lower impairment losses recognized on the Company's available-for-sale equity securities by P121.5 million; and (c) Favorable change in the net fair value of held-for-trading securities amounting to P20.2 million. These were partially negated by lower dividend income of P4.6 million.

General and administrative expenses amounted to P365.1 million in 2023, higher by P34.7 million or 11% compared to 2022 of P330.4 million, resulting mainly from provision of impairment losses. This was partially negated by lower taxes, licenses and fees.

Tax expense amounted to P147.7 million in 2023, higher by P82.2 million or 125% compared to 2022 of P65.5 million. This resulted mainly from (a) Higher net underwriting income; and (b) Higher interest income recognized in 2023.

The Company's shareholders' equity amounting to P6,253.0 million as at December 31, 2023 increased by P652.6 million from the balance as at December 31, 2022 of P5,600.4 million. The increase resulted mainly

from the net income of P536.1 million as discussed above and increase in revaluation reserves by P99.5 million mostly from the favorable market value movements of Available-for-Sale securities.

Cash and cash equivalents amounting to P271.8 million as at December 31, 2023 decreased by P452.9 million or 62% from the balance as at December 31, 2022 of P724.7 million. The decrease in the balance resulted mainly from the net cash used in investment activities amounting to P626.2 million. These were partially negated by the net cash provided by operating activities amounting to P200.9 million.

Reinsurance balances receivable - net amounting to P4,719.5 million as at December 31, 2023 increased by P1,345.0 million or 40% from the balance as at December 31, 2022 of P3,374.5 million. The increase in the balance resulted mainly from new agricultural contracts written under the Non-life foreign business as discussed in Reinsurance Premium Income above. This was partially negated by the termination of certain property contracts in the Non-life foreign business and collections during the period.

Held-for-trading (HFT) securities amounting to P532.7 million as at December 31, 2023 increased by P243.2 million or 84% from the balance as at December 31, 2022 of P289.5 million. The increase in balance resulted mainly from the net acquisitions amounting to P244.9 million (acquisitions net of disposals).

Available-for-sale (AFS) financial assets amounting to P5,300.2 million as at December 31, 2023 increased by P492.2 million or 10% from the balance as at December 31, 2022 of P4,808.0 million. The movement in the account balance can be explained by the following:

	2023	2022
Cost		
Balance at beginning of year	P4,910.9	P5,923.5
Acquisitions	1,808.4	2,316.3
Disposals/maturities	(1,397.5)	(3,213.3)
Impairment losses	(2.5)	(124.0)
Unrealized foreign currency gains (losses)	(1.3)	8.4
	5,318.0	4,910.9
Fair value adjustment		
Balance at beginning of year	(102.9)	29.2
Changes in fair value	100.7	(232.5)
Fair value gains on disposal	(18.1)	(23.6)
Impairment losses	2.5	124.0
	(17.8)	(102.9)
Balance at end of year	P5,300.2	P4,808.0

The increase in the balance resulted mainly from the net acquisition of fixed income and equity securities amounting to P392.8 million (acquisitions net of disposals/maturities including fair value gains on disposals) and increase in fair value of P100.7 million.

Held-to-maturity (HTM) securities amounting to P3,912.1 million as at December 31, 2023 increased by P853.6 million or 28% from the balance as at December 31, 2022 of P3,058.5 million. The increase in the balance resulted mainly from the purchase of corporate bonds amounting to P1,175.5 million, partially negated by maturities amounting to P324.1 million.

Other investments amounting to P252.8 million as at December 31, 2023 decreased by P189.5 million or 43% from the balance as at December 31, 2022 of P442.3 million. The decrease in the balance resulted from the maturities of short-term deposits during the year.

Loans and receivables amounting to P109.6 million as at December 31, 2023 increased by P23.4 million or 27% from the balance as at December 31, 2022 of P86.2 million. The increase in the balance resulted mainly from the increase in accrued interest receivable amounting to P28.9 million due to the increase in investments in bonds, the impact of higher coupon rates and longer tenor.

Property and Equipment - net amounting to P42.2 million as at December 31, 2023 decreased by P3.0 million or 7% from the balance as at December 31, 2022 of P45.2 million. The decrease in the balance resulted mainly from the depreciation expense recognized during the year amounting to P9.5 million, partially negated by the net acquisitions amounting to P6.5 million (acquisitions net of disposals).

Deferred acquisition costs amounting to P761.4 million as at December 31, 2023 increased by P60.1 million or 9% from the balance as at December 31, 2022 of P701.3 million. The increase in the balance is due mainly to the deferred acquisition cost recognized from Life modified co-insurance contracts.

Deferred reinsurance premiums amounting to P652.7 million as at December 31, 2023 increased by P46.6 million or 8% from the balance as at December 31, 2022 of P606.1 million. The increase in the balance resulted mainly from higher retroceded premiums from the Life business.

Other assets – net amounting to P598.3 million as at December 31, 2023 increased by P225.2 million or 60% from the balance as at December 31, 2022 of P373.1 million. The increase in the balance mainly pertains to increase in deferred tax assets amounting to P258.5 million, partially negated by decrease in prepaid income taxes amounting to P27.4 million.

Reinsurance balances payable amounting to P2,345.4 million as at December 31, 2023 increased by P248.2 million or 12% from the balance as at December 31, 2022 of P2,097.2 million. The increase resulted mainly from (a) timing difference of settlements of retroceded premiums for the Life business; and (b) retroceded premiums from new agricultural contracts from the Non-life foreign business.

Accounts payable and accrued expenses amounting to P521.7 million as at December 31, 2023 increased by P218.7 million or 72% from the balance as at December 31, 2022 of P303.0 million. The increase in the balance resulted mainly from the increase in income tax payable.

Claims and Claims reserves amounting to P8,983.3 million as at December 31, 2023 increased by P467.7 million or 5% from the balance as at December 31, 2022 of P8,515.6 million. The increase in the balance resulted mainly from the growth in the business as discussed under Reinsurance Premium Income and claims incurred during the year as discussed under Claims and claims reserves – net, partially negated by the settlement of claims during the year.

Premium reserves amounting to P2,222.7 million as at December 31, 2023 increased by P530.4 million or 31% from the balance as at December 31, 2022 of P1,692.3 million. The increase in the balance resulted mainly from the growth in the business as discussed under Reinsurance Premium Income.

Deferred reinsurance commissions amounting to P3.4 million as at December 31, 2023 decreased by P9.1 million or 73% from the balance as at December 31, 2022 of P12.5 million resulting mainly from the reduction of business retroceded through our proportional treaty with foreign reinsurers.

TAX EXPENSE	65.5	49.6	15.9	32%
NET PROFIT	P55.7	P141.7	(P86.0)	-61%

The Company recorded a net profit of P55.7 million for the year ended December 31, 2022, P86.0 million or 61% lower than the net profit recognized in 2021. The Net profit resulted from generating Net underwriting income of P236.2 million, and Investment and other income and expenses of P215.4 million, negated by General and administrative expenses of P330.4 million and Tax expense of P65.5 million.

Underwriting Results

Net underwriting income amounted to P236.2 million in 2022, higher by P189.0 million or 400% compared to 2021 of P47.2 million. The favorable variance resulted mainly from the net underwriting income of P210.2 million from the Non-life domestic business compared to the net underwriting loss of P78.9 million in 2021. This was partially negated by (a) Lower net underwriting income from the Life business by P68.7 million; and (b) Higher net underwriting loss from the Non-life foreign business by P31.4 million.

Higher net underwriting income in 2022 from the Non-life domestic business resulted mainly from lower loss and commission ratios relative to earned premiums compared to 2021. Lower net underwriting income from the Life business in 2022 resulted mainly from higher loss ratio from the non-modified co-insurance business relative to earned premium, partially negated by higher net underwriting income from the modified co-insurance business. Higher net underwriting loss in 2022 from the Non-life foreign business resulted mainly from higher loss and commission ratios relative to earned premiums compared to 2021.

Reinsurance premium income amounted to P2,968.7 million in 2022, higher by P149.3 million compared to 2021 of P2,872.0 million. This resulted from (a) Higher reinsurance premium income from the Life business due to higher reported premiums; and (b) Higher reinsurance premium income from the Non-life domestic business due to higher earned premiums from renewal business, higher reinstatement premiums and release of unexpired risk reserves. These were partially negated by (a) Lower reinsurance premium income from the Non-life foreign business resulted mainly from the renewal of certain treaties at a lower share and unfavorable adjustment in the estimated premium income for past underwriting years; and (b) Higher cost on the Company's excess of loss cover from the Non-life domestic business.

Claims and claims reserves – net amounted to P1,936.9 million in 2022, lower by P25.6 million compared to 2021 of P1,962.5 million, which resulted to loss ratios of 65% in 2022 and 68% in 2021. Lower loss ratio in 2022 resulted mainly from the favorable loss development for past underwriting years from the Non-life domestic business. This was partially negated by (a) Additional provisions for catastrophe losses relating to hailstorms for treaties covering European risks; (b) Provision for Hurricane Ian for treaties covering North America; (c) Impact of higher foreign exchange rates on loss reserves denominated in foreign currencies; and (d) Unfavorable loss development for past underwriting years for Life business.

	For the year ended		Inc (dec)	
	2022	2021	Amount	%

Total claims and claims reserves – net (C) [A+B]	1,936.9	1,962.5	(25.6)	-1%
Total earned premiums (D)	P2,999.8	P2,871.0	P128.8	4%
Loss ratio (C/D)	65%	68%		

Commissions - net amounted to P826.7 million in 2022, lower by P34.6 million compared to 2021 of P861.3 million, which resulted to commission ratios of 28% in 2022 and 30% in 2021. Lower commission ratio in 2022 resulted mainly from (a) Lower acquisition costs from the Non-life foreign business due to the renewal of certain treaties at a lower share; and (b) Lower commission costs from the Non-life domestic business due to the favorable adjustment in the commissions for past underwriting years. These were partially negated by the higher commission expense incurred from the Life modified co-insurance business.

Other underwriting income amounted to income of P18.5 million, higher by P19.5 million compared to the other underwriting loss of P1.0 million in 2021. This pertains to the net benefits received from a certain group life treaty participating in a pool arrangement.

Investment and Other income and expenses, net amounted to P215.4 million in 2022, lower by P188.7 million or 47% from P404.1 million in 2021, resulting from lower investment income by P175.0 million and higher other expenses by P13.7 million.

Lower investment income in 2022 resulted mainly from (a) Higher impairment losses recognized on the Company's available-for-sale equity securities by P117.2 million; (b) Lower gain on sale from available-for-sale securities by P70.8 million; and (c) Unfavorable change in the net fair value of held-for-trading securities amounting to P15.2 million. These were partially negated by higher interest and dividend income by P28.2 million.

Higher other expenses by P13.7 million in 2022 resulted mainly from lower foreign exchange gains compared to 2021.

General and administrative expenses amounted to P330.4 million in 2022, higher by P70.4 million or 27% compared to 2021 of P260.0 million, resulting mainly from higher manpower costs, taxes, and professional fees.

Tax expense amounted to P65.5 million in 2022, higher by P15.9 million or 32% compared to 2021 of P49.6 million. This resulted mainly from (a) Absence of the favorable impact of reduction in the applicable income tax rates recognized in 2021; and (b) Higher final taxes from the interest income recognized in 2022.

The Company's shareholders' equity amounting to P5,600.5 million as at December 31, 2022 decreased by P63.7 million from the balance as at December 31, 2021 of P5,664.2 million. The decrease resulted mainly from the decrease in revaluation reserves by P118.6 million mostly from the unfavorable market value movements of Available-for-Sale securities, negated by positive operating results of P55.7 million.

Cash and cash equivalents amounting to P724.7 million as at December 31, 2022 increased by P66.5 million or 10% from the balance as at December 31, 2021 of P658.2 million. The increase in the balance resulted mainly from the net cash provided by investing activities amounting to P129.0 million and foreign currency gains amounting to P12.1 million. These were negated by the net cash used in operating activities amounting to P74.6 million.

Held-for-trading (HFT) securities amounting to P289.5 million as at December 31, 2022 mainly pertains to the net acquisition of equity securities, unit investment trust fund (UITF) and forward asset amounting to P282.0 million, foreign currency gains of P15.6 million and fair value losses amounting to P8.1 million.

Available-for-sale (AFS) financial assets amounting to P4,808.0 million as at December 31, 2022 decreased by P1,144.7 million or 19% from the balance as at December 31, 2021 of P5,952.7 million. The movement in the account balance can be explained by the following:

	2022	2021
Cost		
Balance at beginning of year	P5,923.5	P5,669.0
Acquisitions	2,316.3	4,938.6
Disposals/maturities	(3,213.3)	(4,673.1)
Impairment losses	(124.0)	(6.8)
Unrealized foreign currency gains (losses)	8.4	(4.2)
	4,910.9	5,923.5
Fair value adjustment		
Balance at beginning of year	29.2	264.1
Changes in fair value	(232.5)	(147.3)
Fair value gains on disposal	(23.6)	(94.4)
Impairment losses	124.0	6.8
	(102.9)	29.2
Balance at end of year	P4,808.0	P5,952.7

The decrease in the account balance resulted mainly from (a) Net disposals/maturities amounting to P920.6 million (disposals/maturities net of acquisitions including fair value gains on disposal); and (b) Market value decline of AFS securities amounting to P232.5 million. The disposal of certain AFS financial assets during the year was undertaken mainly to fund the HFT portfolio and increase the asset allocation of the Held-to-maturity portfolio.

Held-to-maturity (HTM) investments amounting to P3,058.5 million as at December 31, 2022 increased by P667.7 million or 28% from the balance as at December 31, 2021 of P2,390.8 million. The increase in the balance resulted mainly from the purchase of corporate bonds amounting to P949.0 million, partially negated by maturities amounting to P281.3 million.

Other investments amounting to P442.3 million as at December 31, 2022 mainly pertains to the investment in short-term time deposits with maturity periods of more than three (3) months but less than one (1) year.

Loans and receivables amounting to P86.2 million as at December 31, 2022 increased by P28.5 million or 49% from the balance as at December 31, 2021 of P57.7 million. The increase in the balance resulted mainly from (a) Increase in accrued interest receivable amounting to P15.3 million due to the increase in investments in bonds and the impact of higher coupon rates; and (b) Increase in accounts receivable amounting to P9.3 million which was considered temporary as this resulted from sale of HFT securities.

Property and Equipment - net amounting to P45.2 million as at December 31, 2022 decreased by P6.8 million or 13% from the balance as at December 31, 2021 of P52.0 million. The decrease in the balance

resulted mainly from the depreciation expense recognized during the year amounting P10.7 million, partially negated by the net acquisitions amounting to P3.9 million.

Reinsurance recoverable on reported claims and Claims reserves – net amounting to P3,801.0 million as at December 31, 2022 increased by P1,339.3 million or 54% from the balance as at December 31, 2021 of P2,461.7 million. The increase in the balance is aligned with the increase in Losses and claims payable and Claims reserves.

Deferred acquisition costs amounting to P701.3 million as at December 31, 2022 increased by P43.0 million or 7% from the balance as at December 31, 2021 of P658.3 million. The increase in the balance is due mainly to the deferred acquisition cost recognized from Life modified co-insurance contracts.

Deferred reinsurance premiums amounting to P606.1 million as at December 31, 2022 increased by P171.6 million or 39% from the balance as at December 31, 2021 of P434.5 million. The increase in the balance resulted mainly from entering into a multi-year excess of loss contract with coverage period of three years for a particular layer and higher retroceded premiums from Life and Non-life domestic businesses.

Other assets – net amounting to P373.1 million as at December 31, 2022 increased by P47.7 million or 15% from the balance as at December 31, 2021 of P325.4 million. The increase in the balance mainly pertains to the recognition of a receivable from a regulatory body in relation to the collection of tax assessment for the taxable year 2016 amounting to P53.1 million.

Reinsurance balances payable amounting to P2,097.2 million as at December 31, 2022 increased by P500.1 million or 31% from the balance as at December 31, 2021 of P1,597.1 million. The increase in the balance resulted mainly from the accrual of excess of loss retroceded premiums from Non-life business and accrual of retroceded premiums from Life business.

Forward liability amounting to P89.3 million as at December 31, 2022 mainly pertains to the liability recognized from the forward contract where the Company agreed to pay EUR 1.5 million in exchange for USD 1.6 million to manage its exposure to foreign currency exchange rate fluctuations (See Note 7 of the Notes to the financial statements).

Accounts payable and accrued expenses amounting to P303.0 million as at December 31, 2022 decreased by P16.5 million or 5% from the balance as at December 31, 2021 of P319.5 million. The decrease in the balance resulted mainly from the settlements of deposit liability and accounts payable for the purchase of bonds and equity securities. These were partially negated by the accrual of general and administrative expenses.

Claims and Claims reserves amounting to P8,515.6 million as at December 31, 2022 increased by P1,225.5 million or 17% from the balance as at December 31, 2021 of P7,290.1 million. The increase in the balance resulted mainly from recognizing reported losses for Typhoon Odette, partially negated by the settlement of claims.

Premium reserves amounting to P1,692.3 million as at December 31, 2022 increased by P159.0 million or 10% from the balance as at December 31, 2021 of P1,533.3 million. The increase in the balance resulted mainly from higher reinsurance premiums from Life and Non-life domestic businesses.

Deferred reinsurance commissions amounting to P12.5 million as at December 31, 2022 increased by P3.2 million or 34% from the balance as at December 31, 2021 of P9.3 million. The increase in the balance resulted mainly from higher commission income from the retrocession of certain reinsurance treaties under the Non-life domestic business.

Recent Sales of Unregistered or Exempt Securities, Including Recent Issuance of Securities Constituting an Exempt Transaction

The Company had no recent sales of unregistered or exempt securities, including recent issuances of securities constituting an exempt transaction.

Corporate Governance

The management and the Board of Directors of Nat Re recognize that a good corporate governance system is integral to the mandate given by the Company's shareholders. In this regard, the Company has established its Manual on Corporate Governance pursuant to: (a) Insurance Commission (IC) Circular Letter No. 31-2005, as amended by IC Circular Letter No. 2020-71, (b) Code of Corporate Governance for Publicly Listed Companies per SEC Memorandum Circular No. 19, Series of 2016 and (c) other relevant IC and SEC issuances and regulations.

On an annual basis, the Company conducts a regular review of its corporate governance policies and practices through a self-assessment using scorecards and best-practice guidelines issued by the SEC, and the Insurance Commission through the Integrated- Annual Corporate Governance Report (I-ACGR) and the ASEAN Corporate Governance Scorecard (ACGS).

The Board, through its Governance and Related Party Transaction Committee, performs a self-evaluation in which the current and potential state of the Company's corporate governance practices were rated using best practice guidelines issued by the SEC and IC. Through this assessment, the Company was able to evaluate its corporate governance system, measure the level of compliance with the Manual of Corporate Governance and identify areas for improvement to further strengthen its policies and procedures and protect the interests of the Company and its stakeholders.

The Governance and Related Party Transaction Committee shall oversee the annual performance evaluation of the Board, its board committees as well as the individual director's performance. The assessment criteria include the structure, efficiency and effectiveness of the Board as a body, the composition, organization and processes implemented within the different board committees and the knowledge, attendance and overall contribution of each member director to their respective board committees. The criteria for the board performance assessment is given a weight of 40% for the Board as a Body, a 35% weight for the Board Committees in General, and a 25% weight for the individual director's self-assessment. The 2023 Board Assessment result showed the highest rating compared to the 3-year average for all categories above and the overall rating of 97% and this equates to an Excellent rating.

The Company is committed to continuously improve its corporate governance practices. This effort was affirmed by the latest 2023 ASEAN Corporate Governance Scorecard report rendered by the ICD on the

performance of the company as compared to the insurance industry. Nat Re obtained a score of 94.22 points, which is higher than the previous year's score of 93.69 points. This result is equivalent to a two-Golden Arrows for its good corporate governance practices, based on the ASEAN Corporate Governance Scorecard (ACGS).

The ACGS was introduced to Philippine publicly listed companies (PLCs) in early 2012 to raise the corporate governance standards of ASEAN member countries.

Compliance with the Best Practices on Corporate Governance

Nat Re, being a publicly listed company (PLC), is in full compliance with the rules and regulations of the Securities and Exchange Commission, Philippine Stock Exchange, Insurance Commission and other regulatory agencies. Consistently, Nat Re fully complied with the SEC and PSE's reportorial requirements on good corporate governance practices and these include the following:

1. Submitted timely its Integrated Annual Corporate Governance Report (I-ACGR), pursuant to the SEC Memorandum Circular No. 15, Series of 2017.
2. Uploaded the ASEAN Corporate Governance Scorecard to the Company's website, pursuant to the SEC Memorandum Circular No. 18, Series of 2013.
3. Obtained certification of Board Attendance, submitted required reports involving quarterly financial statements, made disclosures of material information and events, and required the annual attendance of Board Members and Key Officers to Corporate Governance training program; and
4. Complied with disclosure requirements on direct and indirect ownership of securities under the Regulation Code, or SRC, and regularly reports any trading transactions of directors and key officers of the Company within the required reporting period. There has been no case of insider trading involving directors and/or management of the Company:
5. Prepared timely its Annual Sustainability Report for the year 2024.

⁸ Appointed as Underwriting Committee member on June 26, 2024.

Policies and Implementing Rules Related to Corporate Governance

Nat Re is committed to continuously improve its existing corporate policies and procedures while it observes and practices the following best standards on corporate governance.

1. The company's transactions with its related parties are conducted in fair and arms-length terms. Governance and Related Party Transaction (GRPT) Committee is required to review the material / significant Related Party Transactions (RPT), together with the review of quarterly/ annual financial information, to determine, whether these RPTs are in the best interest of the company. The Audit Committee reviews the company's internal control system. The results of those reviews are included in the Annual Report of the Audit Committee and the subject report is included in the company's Annual Report.
2. The Board materials are distributed to directors at least five (5) business days prior to the board meeting to give ample time for review of subject board materials.
3. It is also stated in the Company's Code of Ethics that directors, officers and employees of Nat Re are committed to avoid activities and interests that could significantly affect the objective or effective performance of one's duties and responsibilities in the company, including having business interests, receiving and giving gifts of unusually high value to persons or entities with whom the company relates and insider's trading.
4. Dealings in company shares by the Directors and Officers are reported to the Compliance Officer within three (3) business days and immediately reported to PSE and SEC within the period required for reporting. The Company has established its Policy on Insider's Trading. Directors, Officers and Employees are mandated not to trade in the company's securities using price sensitive information that is not normally available publicly, and obtained by reason of position, contact within, or other relationship with the company as stated in the Confidentiality section of the Norms of Business Conduct and Ethics.
5. Any actual or apparent conflict of interest, and any material transaction or relationship that could reasonably give rise to a conflict of interest, must be immediately disclosed to the Human Resources Department if involving company employees or to the Audit Committee, if any Senior Management personnel or Board member is involved. Directors and officers are mandated to base all business decisions and actions with the best interest of the Company in mind at all times. Decisions must not be motivated by personal considerations and other relationships, which may interfere with the exercise of independent judgment. These are in accordance with the set norms of Business Conduct and Ethics.

Stakeholder Relations

Shareholder and Investor Relations

The Company has set up communication channels that promote effective communication with its shareholders and the investing community. Aside from the regular reporting and disclosures to the various regulating agencies such as the SEC, PSE and IC, the Company actively maintains its website that provides timely information updates on its governance, operational, financial performance, credit rating report and other relevant activities for public information. The Company has also designated its investor relations/communication officers to handle investor and shareholder queries and requests, and their contact information can easily be accessed through the Company's website.

Employee Relations

The Company explicitly articulates its recognition and protection of the rights and interests of its employees through its Employee Manual of Policies and Procedures. The manual also governs employee related matters to ensure uniformity and consistency of interpretation and implementation, promote harmonious employer-employee relationship as well as set-up guidelines in protecting the use of material inside information.

The Company provides post-employment benefits, which is a wholly funded, tax-qualified, non-contributory defined benefit retirement plan that is being administered by a trustee and covers all regular full-time employees. The employees also participate in various industry and regulatory training and seminars that are designed for their career advancement and functional development and are linked towards shareholder value creation.

Cultivating Sustainable Community

The Company's efforts have always focused on mitigating the consequences of natural catastrophes. It participates in programs on this subject and is working with the Philippine non-life insurance industry to put in place mitigation measures. The Company also participates jointly in community related projects undertaken by other entities from time to time. Other environment-related and community involvement programs are being facilitated to further contribute to the insurance industry and the Philippine society. Please refer to our [2024 Nat Re Sustainability Report](#)

Code of Ethics

Nat Re promotes a culture of good corporate governance by observing and implementing its Code of Ethics that is founded on the Company's core business principles of fairness, accountability, integrity, transparency and honesty. The code guides individual behavior and decision making, and clarifies responsibilities and proper conduct for its directors, officers and employees.

Sustainability Report

We at Nat Re are fully committed to more consciously manage our business' impact on the economy, the environment, and the greater society, and monitor our contributions to achieving universal sustainability goals. Nat Re's board of directors, senior management, and employees are dedicated to proactively integrate a philosophy of sustainable development into the Company's corporate, business, and functional strategies and day-to-day activities. For 2023, [2024 Nat Re Sustainability Report](#) highlights our continuing contribution toward a stronger economy, a cleaner environment, and a healthier society.

Re: **Certification of NRCP's Directors in Government Service**

Dear Sir:

This is in reference to the required certification that none of the directors of National Reinsurance Corporation of the Philippines (NRCP) is an elected or appointed official of the government.

The Government Service Insurance System (GSIS) currently owns 25.73% of the outstanding capital stock of the NRCP. The GSIS has been a stockholder of NRCP since the latter's incorporation on 7 June 1978; and as a stockholder, the GSIS has the right to appoint nominee directors in the NRCP.

In view of the foregoing, NRCP **cannot** submit a certification that none of its directors is an appointed or elective official of the government. However, as a shareholder of NRCP, the GSIS confirms that in the execution of their duties as board members of NRCP, the GSIS nominee directors in NRCP do not receive any additional compensation from the NRCP but merely receive reasonable per diems and gratuities for their attendance to the board meetings of the NRCP. Thus, the appointment by the GSIS of its nominee directors in the NRCP does not violate Article IX (B), Section 8 of the Constitution.

In view of the change in the composition of the GSIS Board of Trustees, the GSIS hereby confirms that it consents to the nomination and election of Ms. Evelina G. Escudero, Ms. Rita E. Riddle, and Mr. Emmanuel L. Samson as directors in the NRCP.

We trust that the foregoing explanation is sufficient.

Very truly yours,

Atty. Luz Victoria F. Reyes-Morando

REPORT OF INDEPENDENT AUDITORS

The Board of Directors and Stockholders
National Reinsurance Corporation of the Philippines
31st Floor BPI-Philam Life Makati
6811 Ayala Avenue, Makati City

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of National Reinsurance Corporation of the Philippines (the Company), which comprise the statements of financial position as at December 31, 2024 and 2023, and the statements of income, comprehensive income (loss), changes in equity and cash flows for each of the three years in the period ended December 31, 2024, and notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2024 and 2023, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2024 in accordance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

Basis for Opinion

We conducted our audit in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditors Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Firm Regulatory Registration & Accreditation:

PRC-BOA Registration No. 0003, valid until September 20, 2026

IC Accreditation No. 0003-IC, Group A, valid for five (5) years covering the audit of 2020 to 2024

financial statements (2019 financial statements are covered by IC Circular Letter (CL) No. 2019-39, Transition clause)

BSP Accreditation No. 0003-BSP, Group A, valid for five (5) years covering the audit of 2020 to 2024

financial statements (2019 financial statements are covered by BSP Monetary Board Resolution No. 2161, Transition clause)

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Revenue Recognition

(P6.02 billion, see statement of income and Notes 2, 3 and 20 to the financial statements)

The risk

Reinsurance premium is recognized as revenue over the period of the reinsurance contracts using the "24th method". The Company's reinsurance premiums consists of actual amounts reported by the cedants and accrued reinsurance premiums based on the terms of the reinsurance contracts, historical experience and latest information provided by the cedants. The accrued reinsurance premiums were estimated based on assumptions and are therefore subject to considerable uncertainties and high degree of management judgment.

Due to the material significance of the amount of reinsurance premiums and the associated uncertainties in the estimations made, this matter was of particular significance in the context of our audit.

Our response

As part of our audit procedures, we evaluated and tested the internal controls over the completeness, existence and accuracy of the reinsurance premiums recognized in the financial statements. We vouched reinsurance contracts on sampling basis, performed cut-off testing including, among others, examining the date of approval and receipt date for reinsurance contracts near period-end and subsequent to period-end. For the reasonableness of recorded accrued reinsurance premiums, we analyzed historical experience and tested management's estimates by comparing the actual premiums received with the previously reported accrual. We assessed the propriety of the assumptions underlying the estimate and determined whether there were any indicators of management bias.

Valuation of Reinsurance Balance Receivables and Reinsurance Recoverable on Reported Claims

(P7.39 billion, see statement of financial position and Notes 2, 3, 6 and 13 to the financial statements)

The risk

The risk in this area pertains to the valuation of reinsurance balances receivables including recoverability from cedants and retrocessionaires. In determining such valuation and recoverable amount, management exercised significant judgment on the credit risk assessment as well as both on the timing of recognition of impairment losses and the estimation of the amount of the impairment.

Our response

As part of our audit procedures, we evaluated the appropriateness of the Company's accounting policy on impairment, and assessed and challenged the key assumptions used by management whether there were any indicators of management bias in their selection of methods used to compute for the allowance for impairment losses on reinsurance balance receivables and reinsurance recoverable on reported claims. We performed analysis of the adequacy of the impairment allowance by testing the aging of reinsurance balance receivables and reinsurance recoverable on reported claims, and identifying potential troubled accounts considering, among others, past due accounts, accounts under litigation and accounts from closed ceding companies and retrocessionaires.

Valuation of Claims Liabilities

(P4.20 billion, see statement of financial position and Notes 2, 3 and 19 to the financial statements)

The risk

Claims liabilities represent estimates of future payments of reported and unreported claims and related expenses. The valuation of claims reserves involves a high degree of subjectivity and complexity.

The Company uses a range of actuarial methodologies to estimate claims reserves. The expected value takes into account assumptions about premium, ultimate loss ratios and run-off periods that are based on actuarial estimate from historical experience. Other key factors include but are not limited to changes in exposure and business mix as well as inflation trends, claim emergence trends, and legal or regulatory decisions.

Our response

As part of our audit procedures, we tested the design, implementation and effectiveness of key controls established by the Company for estimating claims reserves, and tested the completeness and accuracy of the underlying data used in the estimation. This involved engaging external actuarial specialists to assist us in assessing the reasonableness of the assumptions and methodologies used in the determination of claims reserves. We also recalculated the claims reserves and unexpired risk reserves in accordance with the relevant regulatory requirements, verified the accuracy of the amounts of claims reserves based on stratified sampling, and determined compliance with the liability adequacy test as required by the Insurance Commission and relevant accounting standards.

Other Information

Management is responsible for the other information. The other information comprises the information included in the Company's Securities and Exchange Commission (SEC) Form 20-IS (Definitive Information Statement) and SEC Form 17-A, both of which do not include the financial statements and our auditors' report thereon, and the Annual Report for the year ended December 31, 2024. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024 are expected to be made available to us after the date of this auditors' report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with PFRS Accounting Standard, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**Report on the Supplementary Information Required Under Revenue Regulations
No. 15-2010 of the Bureau of Internal Revenue**

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplementary information in Note 36 to the basic financial statements is presented for purposes of filing with the Bureau of Internal Revenue and is not a required part of the basic financial statements. Such supplementary information is the responsibility of management. The supplementary information has been subjected to the auditing procedures applied in our audit of the basic financial statements. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

The engagement partner on the audit resulting in this independent auditors' report is Ms. Florizza C. Simangan.

NATIONAL REINSURANCE CORPORATION OF THE PHILIPPINES
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2024 AND 2023
(Amounts in thousands)

1. CORPORATE INFORMATION

National Reinsurance Corporation of the Philippines (the Company) was incorporated on June 7, 1978 by virtue of Presidential Decree No. 1270 (the Decree), as a domestic professional reinsurance firm to provide life and non-life reinsurance capacity to the Philippines and neighboring insurance markets. Under the Decree, it became the vehicle for the Philippine insurance industry's participation in the Asian Reinsurance Corporation (ARC), a multi-government-initiated reinsurance entity, based in Bangkok, Thailand, which was established to foster regional cooperation among insurance companies doing business in Asia. The Company's shares are listed in the Philippine Stock Exchange (PSE).

The Company is licensed by the Insurance Commission (IC) to engage in business until December 31, 2027.

The Company's registered office and principal place of business is located at 31st Floor BPI-Philam Life Makati, 6811 Ayala Avenue, Makati City.

The financial statements of the Company as at and for the year ended December 31, 2024 (including the comparative financial statements as at December 31, 2023 and for the years ended December 31, 2023 and 2022) were authorized for issue by the Company's Board of Directors (BOD) on March 27, 2025.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The material accounting policies that have been used in the preparation of these financial statements are summarized below and in the succeeding pages. The policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of Preparation of Financial Statements

(a) Statement of Compliance with Philippine Financial Reporting Standards

The financial statements of the Company have been prepared in compliance with Philippine Financial Reporting Standards (PFRS) Accounting Standards. PFRS Accounting Standards are based on International Financial Reporting Standards (IFRSs) issued by International Accounting Standards Board (IASB). PFRS Accounting Standards which are issued by the Philippine Financial and Sustainability Reporting Standards Council (FSRSC), consist of PFRS Accounting Standards, Philippine Accounting Standards (PASs), and Philippine Interpretations.

(b) *Basis of Measurement*

The financial statements have been prepared on the historical cost basis except for AFS financial assets and HFT securities which are measured at fair value basis and Defined benefit liability which is measured as the difference of the present value of the defined benefit obligation and fair value of the plan assets at each reporting date.

(c) *Presentation of Financial Statements*

The financial statements are presented in accordance with PAS 1, *Presentation of Financial Statements*. The Company presents the statement of comprehensive income in two statements: a statement of income and a statement of comprehensive income (loss). The Company presents the statement of financial position in order of liquidity.

(d) *Functional and Presentation Currency*

These financial statements are presented in Philippine peso, the Company's functional and presentation currency, and amounts are presented in thousands except when otherwise indicated.

Items included in the financial statements of the Company are measured using its functional currency. Functional currency is the currency of the primary economic environment in which the entity operates.

2.2 *Adoption of New and Amended PFRS Accounting Standards and Framework*

(a) *Effective in 2024 that are Relevant to the Company*

As at December 31, 2024, there are no new and amended PFRS Accounting Standards that are relevant to the Company.

(b) *Effective Subsequent to 2024 but not Adopted Early*

There are new and amended PFRS Accounting Standards effective for annual periods subsequent to 2024, which were adopted by the FSRSC. Management is currently assessing the impact of these new and amended standards on the Company's financial statements.

- PFRS 9, *Financial Instruments* (2014) (adoption deferred to January 1, 2027). This new standard on financial instruments will replace PAS 39, *Financial Instruments* and PFRS 9 (2009, 2010 and 2013 versions).

PFRS 9 is effective for the annual periods beginning on or after January 1, 2018. However, the Company has met the relevant criteria and has applied the temporary exemption from PFRS 9 for annual reporting periods before January 1, 2027. Consequently, the Company will apply PFRS 9 for the first time on January 1, 2027.

The classification of financial assets under PFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. PFRS 9 includes three principal measurement categories for financial assets - measured at amortized cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL) - and eliminates the previous PAS 39 categories of loans and receivables, AFS financial assets and HTM securities.

In accordance with the financial asset classification principle of PFRS 9, a financial asset is classified and measured at amortized cost if the asset is held within a business model whose objective is to hold financial assets to collect the contractual cash flows that represent solely payments of principal and interest (SPPI) on the principal outstanding. Further, a financial asset whose objective is to both collect contractual cash flows and sell the financial assets is classified and subsequently measured at FVOCI.

All other financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. In addition, on initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Moreover, PFRS 9 allows entities to make an irrevocable election to present subsequent changes in the fair value of an equity instrument that is not held for trading in other comprehensive income. The election is made on an instrument-by-instrument basis.

The accounting for embedded derivatives in host contracts that are financial assets is simplified by removing the requirement to consider whether or not they are closely related, and, in most arrangements, does not require separation from the host contract.

For liabilities, the standard retains most of the PAS 39 requirements which include amortized cost accounting for most financial liabilities, with bifurcation of embedded derivatives. The amendment also requires changes in the fair value of an entity's own debt instruments caused by changes in its own credit quality to be recognized in other comprehensive income rather than in profit or loss.

The Company has completed its initial operational gap assessment, drafting the PFRS 9 accounting policies and enhancement of the affected systems. The Company plans to select the Retrospective approach without restatement and as of date, the actual impact of applying the PFRS 9 on the financial statements is not known and cannot be reasonably estimated until the transition stage is reached. The Company will disclose both the qualitative and quantitative information regarding the impact of PFRS 9 before its adoption.

- PFRS 17 *Insurance Contracts* (adoption deferred to January 1, 2027). The new standard will eventually replace PFRS 4, that will set out the principles for the recognition, measurement, presentation and disclosure of insurance contracts within its scope.

PFRS 17 introduces a new approach that:

- a) combines current measurement of the future cash flows with the recognition of profit over the period services are provided under the contract;
- b) presents insurance service results (including presentation of insurance revenue) separately from insurance finance income or expenses; and
- c) requires an entity to make an accounting policy choice portfolio-by-portfolio of whether to recognize all insurance finance income or expenses for the reporting period in profit or loss or to recognize some of that income or expenses in other comprehensive income.

Under PFRS 17, groups of insurance contracts are measured based on fulfilment cash flows, which represent the risk-adjusted present value of the entity's rights and obligations to the policy holders, and a contractual service margin, which represents the unearned profit the entity will recognize as it provides services over the coverage period. Subsequent to initial recognition, the liability of a group of insurance contracts represents the liability for remaining coverage and the liability for incurred claims, with the fulfilment cash flows remeasured at each reporting date to reflect current estimates. Simplifications or modifications to the general measurement model apply to groups of insurance contracts measured using the 'premium allocation approach', and reinsurance contracts held.

PFRS 17 brings greater comparability and transparency about the profitability of new and in-force business and gives users of financial statements more insight into an insurer's or reinsurer's financial health. Separate presentation of underwriting and financial results will give added transparency about the sources of profits and quality of earnings.

On December 15, 2021, the FSRSC amended the mandatory effective date of PFRS 17 from January 1, 2023 to January 1, 2025. This is consistent with Circular Letter (CL) No. 2020-62 issued by the Insurance Commission (IC) which deferred the implementation of PFRS 17 by two (2) years after its effective date as decided by the IASB. On March 10, 2025, IC issued CL No. 2025-04 which set a new effectivity date of the standard to January 1, 2027. Early application is permitted.

Full retrospective application is required, unless it is impracticable, in which case the entity chooses to apply the modified retrospective approach or the fair value approach. However, if the entity cannot obtain reasonable and supportable information necessary to apply the modified retrospective approach, then it applies the fair value approach. There is also a transition option allowing presentation of comparative information about financial assets using a classification overlay approach on a basis that is more consistent with how PFRS 9 will be applied in future reporting periods. Early application is permitted for entities that apply PFRS 9 on or before the date of initial application of PFRS 17.

The Company has completed its initial operational gap assessment and drafting of the PFRS 17 accounting policies. The Company plans to finalize these policies once it is able to fully determine the impact on the underlying reinsurance contracts. Further, the Company has acquired the necessary systems required to comply with the reporting requirements of PFRS 17 while the affected employees have already started the required trainings to use the system.

The Company has determined that its reinsurance and retrocession contracts have no distinct non-insurance components thus treated as single contracts. However, the detailed financial gap assessment arising from the application of the new standard is yet to be performed by management. As of date, the actual impact of applying the PFRS 17 on the financial statements, including the impact on the Company's net worth, in the period of initial application is not known and cannot be reasonably estimated because it is dependent on the final accounting elections and judgements that will be incorporated in the accounting policies and future economic conditions.

- PFRS 18, *Presentation and Disclosure in Financial Statements* replaces PAS 1, which sets out presentation and base disclosure requirements for financial statements. The changes, which mostly affect the income statement, include the requirement to classify income and expenses into three new categories – operating, investing and financing – and present subtotals for operating profit or loss and profit or loss before financing and income taxes.

Further, operating expenses are presented directly on the face of the income statement – classified either by nature, by function or using a mixed presentation. Expenses presented by function require more detailed disclosures about their nature.

PFRS 18 also provides enhanced guidance for aggregation and disaggregation of information in the financial statements, introduces new disclosure requirements for management-defined performance measures (MPMs) and eliminates classification options for interest and dividends in the statement of cash flows.

The amendments will apply retrospectively for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. Management is still assessing the impact of this new standard on the Company's financial statements.

2.3 Reinsurance Contracts

Product Classification

Reinsurance contracts are those contracts under which the Company (the reinsurer) has accepted significant insurance risk from insurance and reinsurance companies (the cedants) by agreeing to compensate the cedants if a specified uncertain future event (the insured event) adversely affects the cedants. As a general guideline, the Company determines whether it has significant insurance risk, by comparing benefits paid when an insured event occurs with benefits payable if the insured event did not occur.

Reinsurance contracts can also transfer financial risks. Contracts that transfer financial risks which create financial assets or financial liabilities, but do not expose the Company to significant insurance risk, are within the scope of PAS 39 and are recognized as Deposit liability under Accounts payable and accrued expenses.

Once a contract has been classified as reinsurance contract, it remains a reinsurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during the period, unless all rights and obligations are extinguished or expired.

Retrocession Contracts Held

Contracts entered into by the Company with retrocessionaires under which the Company is compensated for losses on one or more contracts issued by the Company and that meet the classification requirements for reinsurance contracts above are classified as retroceded contracts held. Contracts that do not meet those classification requirements are classified as financial assets.

Reinsurance recoverable on paid claims are included as part of Reinsurance balances receivable. These balances represent the retrocessionaires' share in the amounts paid to the cedants and are in accordance with the retroceded contract. Reinsurance recoverable on unpaid claims represents balances due from retrocessionaires for its share on the unpaid claims and Reinsurance recoverable on claims reserves represent the retrocessionaires' share for its losses in the claims reserves are both presented under Reinsurance recoverable on reported claims and claims reserves – net in the statements of financial position. The recoverable amounts are estimated in a manner consistent with the claims and claims reserves and are in accordance with the retroceded contract.

Reinsurance balances receivable and Reinsurance recoverable on reported claims and claims reserves are reviewed for impairment at the end of each reporting period or more frequently when an indication of impairment arises during the reporting year. Impairment occurs when objective evidence exists that the Company may not recover outstanding amounts under the terms of the contract and when the impact on the amounts that the Company will receive from the cedants and retrocessionaires can be measured reliably.

The impairment loss is recognized as part of General and administrative expenses in the statements of income.

Retroceded insurance risk does not relieve the Company from its obligations to ceding companies.

Reinsurance balances payable primarily represent premiums due to retrocessionaires. Amounts payable are estimated in a manner consistent with the associated retrocession contract.

Assets and liabilities arising from reinsurance activities are derecognized when the contractual rights are extinguished or expired or when the contract is transferred to another party.

Receivables and Payables Related to Reinsurance Contracts and Retrocession Contracts Held

Financial assets and financial liabilities arising from reinsurance and retrocession contracts held are offset and the resulting net amount is reported in the statements of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously. The right to offset must be available at the end of the reporting period, that is, it is not contingent on future event. It must also be enforceable in the normal course of business, in the event of default, and in the event of insolvency or bankruptcy; and must be legally enforceable for both entity and all counterparties to the financial instruments.

2.4 Financial Assets

Financial assets are recognized when the Company becomes a party to an agreement and agrees to sell goods or services for a fixed amount of money. Purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace are recognized on the trade date, i.e., the date that the Company commits to purchase the asset.

For purposes of classifying financial assets, an instrument is considered as an equity instrument if it is non-derivative and meets the definition of equity for the issuer in accordance with the criteria of PAS 32, *Financial Instruments: Presentation*. All other non-derivative financial instruments are treated as debt instruments.

(a) Classification and Measurement of Financial Assets

Financial assets other than those designated and effective as hedging instruments are classified into the following categories: loans and receivables, financial assets at FVTPL, AFS financial assets and HTM securities. Financial assets are assigned to the different categories by management on initial recognition, depending on the purpose for which the investments were acquired.

Financial assets are recognized initially at fair value of the consideration given. Except for financial assets at FVTPL, the initial measurement of financial assets includes transaction costs.

(i) *Loans and Receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These arise when the Company provides money or services directly to a debtor with no intention of trading the receivables.

The Company's financial assets categorized as loans and receivables are presented as cash and cash equivalents, reinsurance balances receivable – net, loans and receivables, reinsurance recoverable on reported claims and claims reserves – net, and other investments.

Loans and receivables are subsequently measured at amortized cost using the effective interest method subject to any impairment loss. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. The amortization, if any, is included as part of Interest income presented under Investment and other income and expenses – net account in the statements of income.

(ii) *Financial assets at FVTPL*

This category consists of financial instruments that are held-for-trading or designated by management on initial recognition. Financial assets at FVTPL are recorded in the statements of financial position at fair value, with changes recorded in the Investment and other income and expenses – net account in the statements of income.

HFT securities are not reclassified subsequent to their initial recognition, unless they are no longer held for the purpose of being sold or repurchased in the near term and the following conditions are met:

- if the financial asset would have met the definition of loans and receivables (if the financial asset had not been required to be classified as held-for-trading at initial recognition), then it may be reclassified if the Company has the intention and the ability to hold the financial asset in the foreseeable future or until maturity; and
- the financial asset may be reclassified out of the held-for-trading securities category only under “rare circumstances”.

As at December 31, 2024 and 2023, the Company does not have any financial asset designated by management as financial instruments at FVTPL. The Company's HFT securities consist of equity securities listed in the PSE, Unit Investment Trust Fund (UITF) and forward assets.

(iii) *AFS Financial Assets*

This category includes non-derivative financial assets that are designated as AFS financial assets or are not classified as loans and receivables, HTM securities or financial assets at FVTPL. The Company's AFS financial assets include listed and unlisted equity securities, and government and corporate bonds.

All financial assets within this category are subsequently measured at fair value, except for certain equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured which are measured at cost less any impairment loss. Fair value gains and losses are recognized in other comprehensive income and are reported as part of the Revaluation reserves account in the equity except for interest and dividend income, impairment losses and foreign exchange differences on monetary assets, which are recognized in the statements of income.

(iv) *HTM securities*

This category includes non-derivative financial assets with fixed or determinable payments and fixed maturity, and that the Company has the intention and ability to hold to maturity other than: (a) those that Company designates as financial assets at FVTPL upon initial recognition; (b) those that the Company designates as AFS; and (c) those that meet the definition of loans and receivables. This category includes corporate bonds and government securities.

HTM securities are subsequently measured at amortized cost using the effective interest method subject to any impairment loss. Interest income is recognized under Investment and other income and expenses – net account in the statements of income.

(b) *Impairment of Financial Assets*

The Company assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired.

The Company recognizes impairment loss based on the category of financial assets as follows:

(i) *Carried at Amortized Cost – Loans and Receivables and HTM Securities*

If there is objective evidence that an impairment loss on financial assets carried at cost has been incurred, the amount of the impairment loss is determined as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred), discounted at the financial asset's original effective interest rate or current effective interest rate determined under the contract if the loan has a variable interest rate.

Evidence of impairment is the age of the receivable and/or any financial difficulties of the counterparty. Allowances are set up on the net balance, meaning all balances related to the same counterparty are considered. The amount of the allowance is set up in relation to the time a receivable has been due and any financial difficulties of the counterparty and can be as high as the outstanding net balance.

The carrying amount of the asset shall be reduced either directly or through the use of an allowance account. The amount of the loss shall be recognized in the statements of income.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment is recognized (such as an improvement in the debtor's credit rating), the previously recognized impairment loss is reversed by adjusting the allowance account. The reversal shall not result in a carrying amount of the financial asset that exceeds what the amortized cost would have been had the impairment not been recognized at the date of the impairment is reversed. The amount of the reversal is recognized in the statements of income.

Reclassification of AFS Financial Assets to HTM Securities

For a financial asset reclassified from AFS financial assets category to HTM securities, the Company shall reclassify the financial asset at its fair value on the date of reclassification which becomes its new amortized cost. Any previous gain or loss on that asset that has been recognized in other comprehensive income and any difference between the new amortized cost and maturity amount is amortized in profit or loss over the remaining life of the investments using the effective interest method similar to the amortization of a premium and a discount. This is presented as Revaluation reserves – HTM securities in the statements of changes in equity. If the financial asset is subsequently impaired, any gain or loss that has been recognized in other comprehensive income is reclassified from equity to profit or loss.

(ii) *Carried at Fair Value – AFS Financial Assets*

When a decline in the fair value of an AFS financial asset has been recognized in other comprehensive income and there is objective evidence that the asset is impaired, the cumulative loss – measured as the difference between the acquisition cost (net of any principal repayment and amortization) and current fair value, less any impairment loss on that financial asset previously recognized in statements of income – is reclassified from Revaluation reserves to statements of income as a reclassification adjustment even though the financial asset has not been derecognized.

Impairment losses recognized in statements of income on equity instruments are not reversed through profit or loss. Reversal of impairment losses is recognized in other comprehensive income, except for financial assets that are debt securities which are recognized in profit or loss only if the reversal can be objectively related to an event occurring after the impairment loss is recognized.

(c) *Items of Income and Expense Related to Financial Assets*

All income and expenses, except for recognition and reversal of impairment loss on reinsurance balances receivable and reinsurance recoverable on reported claims, relating to financial assets that are recognized in the statements of income are presented as part of Investment and other income and expenses – net account.

If the provision is higher than the reversal of impairment losses on reinsurance balances receivable and reinsurance recoverable on reported claims, this is presented at net as part of Impairment losses under General and administrative expenses account in the statements of income. If the reversal of impairment losses is higher than the provision for reinsurance balances receivable and reinsurance recoverable on reported claims, this is presented at net as part of Other income under Investment and other income and expenses – net account.

Non-compounding interest, dividend income and other cash flows resulting from holding financial assets are recognized in the statements of income when earned, regardless of how the related carrying amount of financial assets is measured.

(d) Derecognition of Financial Assets

The financial assets (or where applicable, a part of a financial asset or part of a group of financial assets) are derecognized when the contractual rights to receive cash flows from the financial instruments expire, or when the financial assets and all substantial risks and rewards of ownership have been transferred to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

(e) Fair Value Measurement of Financial Assets

‘Fair value’ is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

When one is available, the Company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as ‘active’ if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Company uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

If an asset measured at fair value has a bid price, then the Company measures assets and long positions at a bid price.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price – i.e. the fair value of the consideration given or received. If the Company determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognized in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

2.5 Deferred Acquisition Costs (DAC)

The Company incurs costs in connection with acquiring new and renewal reinsurance business. Some of these costs, which consist primarily of commissions, are deferred as these are directly related to the successful acquisition of such business and amortized based on the type of contract. This is accounted as Deferred acquisition costs (DAC) under the Asset section in the statements of financial position. DAC are assessed for recoverability in the year of policy issue to ensure that these costs are recoverable out of the estimated future margins to be earned on the policy. DAC are assessed for recoverability at least annually thereafter.

DAC is recognized as an expense over the coverage period of the policy using the 24th method [see Note 2.14(b)] except for DAC from modified co-insurance arrangements. For modified co-insurance arrangements, DAC is amortized over the expected life of the contracts in which the related premiums are earned. The net change in the account between each end of reporting periods are recognized as part of Commission expense under Commissions – net account in the statements of income.

2.6 Deferred Reinsurance Premiums (DRP)

The ceded reinsurance premiums that pertain to the unexpired period of the contracts at the end of the reporting period are accounted for as DRP and presented in the Assets section of the statements of financial position. Subsequent to initial recognition, the amount is amortized using the 24th method [see Note 2.13(a)]. The net change in the account between each end of reporting periods are recognized in the statements of income under movement in premium reserves – net.

2.7 Reinsurance Recoverable on Reported Claims and Claims Reserves

Reinsurance recoverable on reported claims and claims reserves represent the amount recoverable from retrocessionaires under retroceded contracts as their share on unpaid claims, including unreported claims and loss adjustment expenses, net of salvage of recoveries.

2.8 Other Assets

Other assets pertain to other present economic resources controlled by the Company as a result of past events. An economic resource is a right that has the potential to produce economic benefits and the asset has a cost or value that can be measured reliably.

This include intangible assets which are composed of acquired software licenses which are accounted for under the cost model. Capitalized costs are amortized on a straight-line basis over five years as the lives of these intangible assets are considered finite. The Company estimates the useful lives of intangible assets based on the period over which assets are expected to be available for use. The estimated useful lives are reviewed periodically and are updated if expectations differ from previous estimates due to technical or commercial obsolescence and legal or other limits on the use of the assets.

2.9 Financial Liabilities

The Company classifies its financial liabilities at initial recognition into the following categories: financial liabilities at FVTPL and other liabilities. The Company determines the classification of its financial liabilities at initial recognition, and were allowed and appropriate, re-evaluates such designation at every reporting date.

Other financial liabilities pertain to financial liabilities that are not designated or classified at FVTPL. Other financial liabilities are initially measured at their fair value and subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in the statements of income.

The Company's other financial liabilities include Reinsurance balances payable, Claims and claims reserves [excluding Margin for Adverse Deviation (MfAD) and loss adjustment expenses] and Accounts payable and accrued expenses (excluding income tax payable, defined benefit liability and other taxes payable), are recognized when the Company becomes a party to an agreement and agrees to purchase goods or services for a fixed amount of money. All interest-related charges are recognized as part of Investment and other income and expenses – net account in the statements of income.

Dividend distributions to shareholders are recognized as financial liabilities upon declaration by the Company.

Financial liabilities are derecognized from the statements of financial position only when the obligations are extinguished either through discharge, cancellation or expiration. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, with the difference in the respective carrying amounts recognized in the statements of income.

Derivative financial instruments are classified under financial assets and financial liabilities at FVTPL when there is an agreement to settle both assets and liabilities independently. Derivative financial instruments are classified under financial assets or financial liabilities when there is an agreement to settle at net. Derivatives are initially recorded at fair value on the date at which the derivative contract is entered into and are subsequently remeasured at fair value. Any gains or losses arising from changes in fair values of derivatives (except those accounted for as cash flow hedges) are taken directly to the statements of income and are included in Investment and other income and expenses – net account (see Note 22).

The Company's outstanding derivative asset and liability arising from forward contracts are presented under HFT securities and Forward liability accounts, respectively, in the statement of financial position (see Notes 7).

2.10 Claims and Claims Reserves

Claims represent the present value of the estimated cost of all reported claims at the end of the reporting period, together with related claims handling costs and reduced for the expected value of salvage and other recoveries. This includes outstanding claim reserves, loss adjustment expenses payable plus MfAD based on a certain percentage of the total outstanding claim reserves and loss adjustment expenses payable to allow for inherent uncertainty of the best estimate of the policy reserves.

Claims reserves represent the estimated ultimate cost of all incurred but not reported claims (IBNR), including incurred but not enough reported claims plus MfAD at the end of the reporting period. Claims reserves are measured on a discounted basis, using actuarial estimates of historical claims expense, adjusted for current trends and conditions. These estimates are continually reviewed and the ultimate liability may vary significantly from the amount recognized, which are reflected in claims and claims reserves in the statement of financial position in the period in which they are determined.

2.11 Premium Reserves

Premium reserves refer to unearned premium reserves (UPR) plus any deficiency resulting from the liability adequacy test.

UPR refers to the portion of the premiums attributable to the unexpired risks at the balance sheet date and is recognized as revenue over the coverage period of the policy using the 24th method [see Note 2.13(a)].

Liability Adequacy Test

Liability adequacy tests are performed at end of each reporting period, to ensure the adequacy of premium reserves. The test is performed by comparing the UPR, net of related DAC, and the present value of the current best estimates of future cash flows including claims handling and policy administration expenses. Any deficiency is charged to the statements of income and is recognized as premium reserves.

2.12 Deferred Reinsurance Commissions (DRC)

Commissions earned from retrocession contracts are recognized as revenue over the coverage period of the policy using the 24th method [see Note 2.13(c)]. The portion of the commissions that relates to the unexpired periods of the contracts at end of the reporting period is accounted for as Deferred reinsurance commissions and is presented in the Liabilities section of the statements of financial position. The net change in the account between each end of reporting periods are recognized as Commission income under Commissions – net in the statements of income.

2.13 Revenue and Income Recognition

Revenue is recognized only when (or as) the Company satisfies a performance obligation by transferring control of the promised services to the customer. Expenses and costs, if any, are recognized in the statement of income upon utilization of the resources or services or at the date these are incurred. All finance costs are reported on an accrual basis.

The Company's significant revenues pertain to net reinsurance premiums and investment income (loss) which are accounted for by the Company in accordance with PFRS 4 and PAS 39, respectively. The Company also earns other income from sale of non-financial assets, which is recognized as income once the Company transferred the goods. These are accounted for by the Company in accordance with relevant accounting standards.

The following provides information about the specific recognition criteria of revenues recognized in accordance with PFRS 4 and PAS 39:

Net underwriting income includes reinsurance premiums, retroceded premiums and commissions describe as follows:

- (a) *Reinsurance premiums* – Reinsurance premiums are recognized as revenue when the Company enters into a contract with cedants assuming insurance risks in exchange for reinsurance premium. Reinsurance premiums include premiums reported by cedants and accrued premiums. The Company records accrued premiums on a cedant-by-cedant basis taking into consideration the terms of the reinsurance treaty, historical experience and latest information from cedants.

Reinsurance premiums are recognized over the coverage period of the contracts using the 24th method. The 24th method assumes that the average date of issue of all contracts written during any one month is the middle of that month.

Accordingly, 1/24th of the net premiums are considered earned in the month the reinsurance contracts are issued and 2/24th for every month thereafter (or 1/24th for every 15-day period after the issue month). While for specific agriculture treaty contracts where the underlying risk relates to the crops cultivated within India, the Company recognize the earned premium during the harvest period. The portion of the gross reinsurance premiums that relates to the unexpired periods of the contracts at the end of the reporting period is accounted for as Premium reserves and is presented in the Liabilities section of the statements of financial position while the portion of the retroceded reinsurance premiums that relates to the unexpired periods of the contracts at the end of the reporting period is accounted for as Deferred reinsurance premiums (see Note 2.6) and is presented in the Assets section of the statements of financial position.

Uncollected premiums net of deferred CWT and accrued premiums are recognized as due from ceding companies as part of Reinsurance balances receivable – net in the statements of financial position.

The net changes in the Premium reserves and Deferred reinsurance premiums accounts between the end of the reporting periods are recognized in the statements of income as part of Movement in premium reserves – net.

- (b) *Retroceded premiums* – Retroceded premiums are recognized as an expense when the Company enters into a contract with a retrocessionaire transferring insurance risks to the retrocessionaire in exchange for retroceded premiums. Retroceded premiums include premiums reported to the retrocessionaires and accrued retroceded premiums. The Company records accrued retroceded premiums based on individual retrocession treaties taking into consideration the terms of the treaty, historical experience and latest information relevant to the treaty.
- (c) *Commission on retrocession* – Commission is deferred and is subjected to the same amortization as the retroceded reinsurance premiums (see Note 2.12). Deferred portion is presented in the statements of financial position as Deferred reinsurance commission.

Investment and other income and expenses includes interest income, dividend income, gain/loss on sale of non-financial assets and foreign currency gain/loss describe as follows:

- (a) *Interest income* – Interest income for all interest-bearing financial instruments are recognized using the effective interest rate method.
- (b) *Dividend income* – Revenue is recognized when the Company's right to receive the dividend is established.
- (c) *Gain/ loss on sale of non-financial assets* – Revenue or expenses is recognized when the risks and rewards of ownership of the investments have passed to the buyer or at a point in time when the control of the non-financial assets transfers to the customer.

Determining whether the Company is Acting as Principal or an Agent

The Company assesses its revenue arrangements against the following criteria to determine whether it is acting as a principal or an agent:

- whether the Company has primary responsibility for providing the services
- whether the Company has discretion in establishing prices; and
- whether the Company bears the credit risk.

If the Company has determined it is acting as a principal, the Company recognizes revenue on gross basis with the amount remitted to the other party being accounted as part of cost and expenses. If the Company has determined it is acting as an agent, only the net amount retained is recognized as revenue.

The Company has determined that it is acting as principal in its revenue arrangements.

2.14 Expense Recognition

Expenses are decreases in economic benefits during the accounting period in the form of outflows or depletions of assets or incurrence of liabilities that result in decrease in equity, other than those relating to distribution to equity participants.

(a) Claims and Claims Reserves

Claims relating to insurance contracts are accrued when insured events occur. These arise from events that have occurred up to reporting date even if these have not yet been reported to the Company. The claims (including those for IBNR claims) are based on the estimated ultimate cost of settling the claims and are discounted for time value of money. The method of determining such estimates and establishing reserves are continually reviewed and updated.

Claims recoveries are evaluated in terms of the aggregate share of the retrocessionaires on the claims and adjustment expenses of the Company on business retroceded under retrocession arrangements. Recoveries on paid, unpaid claims and claims reserves are recognized in the period the claims are incurred.

Claims paid, the change in claims and claims reserves and the corresponding share of the retrocessionaires are presented under Claims and claims reserves – net in the statements of income.

(b) Acquisition Costs

Costs that vary with and are primarily related to the acquisition of new and renewal reinsurance contracts, other than those related to modified co-insurance, such as commissions and certain underwriting costs, are recognized as expense over the period of the contracts using the 24th method. Unamortized acquisition costs are presented in the statements of financial position as Deferred acquisition costs (see Note 2.5).

(c) *General and Administrative Expenses*

Costs and expenses are recognized in the statements of income upon utilization of goods or services during the period they are incurred. General and administrative expenses include salaries and employee benefits, taxes related expenses, professional fees and other operational expenses.

2.15 Foreign Currency Transactions and Translation

The accounting records of the Company are maintained in Philippine peso. Foreign currency transactions during the year are translated into the functional currency at exchange rates which approximate those prevailing on transaction dates.

Foreign currency gains and losses resulting from the settlement of such transactions and from the translation at closing exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the statements of income as part of Investment and other income and expenses – net (see Note 22).

2.16 Income Taxes

Tax expense recognized in the statements of income comprises the sum of final tax, current tax and deferred tax not recognized in other comprehensive income or directly in equity, if any.

Current tax assets or liabilities comprise those claims from, or obligations to, fiscal authorities relating to the current or prior reporting period, that are uncollected or unpaid at the end of the reporting period and any adjustment to tax payable in respect of previous years. They are calculated using the tax rates and tax laws applicable to the fiscal periods to which they relate, based on the taxable profit for the year. All changes to current tax assets or current tax liabilities are recognized as a component of tax expense in the statements of income.

Deferred tax is accounted for using the asset-liability method, on temporary differences at the end of the reporting period between the tax base of assets and liabilities and their carrying amounts for financial reporting purposes. Under the asset-liability method, with certain exceptions, deferred tax liabilities are recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences and the carry forward of unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized. Unrecognized deferred tax assets are reassessed at the end of each reporting period and are recognized to the extent that it has become probable that future taxable profit will be available to allow such deferred tax assets to be recovered.

Deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled provided such tax rates have been enacted or substantively enacted at the end of the reporting period.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

The measurement of deferred tax liabilities and deferred tax assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Most changes in deferred tax assets or deferred tax liabilities are recognized as a component of tax expense in the statements of income, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

Deferred tax assets and deferred tax liabilities are offset if the Company has a legally enforceable right to set off current tax assets against current tax liabilities and the deferred taxes relate to the same entity and the same taxation authority.

2.17 Related Party Transactions and Relationships

Related party transactions are transfers of resources, services or obligations between the Company and its related parties, regardless whether a price is charged.

Based on the requirement of SEC Memorandum Circular 2019-10, *Rules of Material Related Party Transactions for Publicly-listed Companies*, transactions amounting to ten percent (10%) or more of the total assets based on the latest audited financial statements that were entered into by the Company with related parties are considered material.

All individual material related party transactions shall be approved by at least two-thirds vote of the board of directors, with at least a majority of the independent directors voting to approve the material related party transactions. In case that a majority of the independent directors' vote is not secured, the material related party transaction may be ratified by the vote of the stockholders representing at least two-thirds of the outstanding capital stock. For aggregate related party transactions within a 12-month period that breaches the materiality threshold of ten percent (10%) of the Company's total assets based on the latest audited financial statements, the same board approval would be required for the transaction(s) that meets and exceeds the materiality threshold covering the same related party.

In considering each possible related party relationship, attention is directed to the substance of the relationship and not merely on the legal form.

2.18 Equity

Capital stock represents the nominal value of shares that have been issued.

Additional paid-in capital includes any premiums received on the initial issuance of capital stock. Any transaction costs associated with the issuance of shares are deducted from additional paid-in capital, net of any related income tax benefits.

Treasury shares are stated at the cost of reacquiring such shares and are deducted from equity attributable to the Company's holders until the shares are cancelled, reissued or disposed of.

Revaluation reserves comprise gains and losses due to the revaluation of AFS financial assets, unamortized fair value gains and losses from HTM securities, and remeasurements of defined benefit plan.

Retained earnings represent all current and prior period results of operations as reported in the statements of income, reduced by the amounts of dividends declared. The appropriated portion of the retained earnings is intended as additional reserve for contingencies (see Note 27.2).

2.19 Earnings Per Share

Basic earnings per share is determined by dividing net profit by the weighted average number of shares issued, adjusted for stock dividends and stock split, less shares held in treasury during the period.

Diluted earnings per share is computed by adjusting the weighted average number of ordinary shares outstanding to assume conversion of dilutive potential shares.

2.20 Segment Reporting

For purposes of segment reporting, the Company does not have other reportable segments. The Company has one reportable business segment which is the reinsurance market. The financial information about the sole business segment is presented in the financial statements.

The management monitors the operating results of its business segment for the purpose of making decisions about resource allocation and performance assessment. The segment performance is evaluated based on operating profit or loss and is measured consistently with the income before income tax in the financial statements.

2.21 Events After the End of the Reporting Period

Any event subsequent to the balance sheet date that provides additional information about the Company's financial position at the end of the reporting period (adjusting event) is reflected in the financial statements. Events subsequent to the balance sheet date that are not adjusting events, if any, are disclosed when material to the financial statements.

3 SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the Company's financial statements in accordance with PFRS Accounting Standards requires management to make judgments and estimates that affect the amounts reported in the financial statements and related notes.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may ultimately differ from these estimates.

3.1 Critical Management Judgments in Applying Accounting Policies

In the process of applying the Company's accounting policies, management has made the judgments as presented in the succeeding pages, apart from those involving estimation, which have the most significant effect on the amounts recognized in the financial statements.

(a) Impairment of Financial Assets

(i) Financial Assets at Fair Value – AFS Financial Assets

The Company considers that investments are impaired when there has been a significant or prolonged decline in the fair value below their cost. The determination of what is significant or prolonged decline requires judgment. In making this judgment, the Company evaluates among other factors, the normal volatility in share or market price. In addition, impairment may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology, and operational and financing cash flows.

Based on the recent evaluation of information and circumstance affecting the Company's AFS financial assets, management concluded that decline in fair value of certain AFS financial assets amounting to P22.22 million and P2.52 million are considered impairment in value as at December 31, 2024 and 2023, respectively (see Notes 8 and 22). Future changes in those information and circumstance might significantly affect the carrying amount of the assets.

(ii) Financial Assets at Amortized Cost

The Company reviews its financial assets at amortized cost to assess impairment at least on an annual basis, or as the need arises due to significant movements on certain accounts. These financial assets that are individually significant are assessed to determine whether objective evidence of impairment exists on an individual basis, while those that are not individually significant are assessed for objective evidence of impairment either on an individual or on collective basis.

In determining whether an impairment loss should be recorded in the statements of income, the Company makes judgment as to whether there are any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets before the decrease can be identified with an individual financial asset in that portfolio.

As at December 31, 2024 and 2023, the Company has recognized allowance for impairment loss amounting to P661.52 million and P679.37 million, respectively (see Notes 6 and 13).

(b) Classification of Financial Instruments

The Company exercises judgment in classifying a financial instrument, or its component parts, on initial recognition as a financial asset, financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial asset or liability. The substance of a financial instrument, rather than its legal form, governs its classification in the statements of financial position. In addition, the Company classifies assets by evaluating among others, whether the asset is quoted or not in an active market.

Included in the evaluation on whether a financial asset is quoted in an active market is the determination on whether the quoted prices are readily and regularly available and whether those prices represent actual and regularly occurring market transactions on an arm's length basis.

As at December 31, 2024 and 2023, the Company classified its financial instruments as financial assets at FVTPL, AFS financial assets, HTM securities, loans and receivables, financial liabilities at FVTPL and other financial liabilities.

(c) Recognition of Provisions and Contingencies

Judgment is exercised by management to distinguish between provisions and contingencies. Relevant disclosures are presented in Note 31.

3.2 Key Sources of Estimation Uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next reporting period:

(a) Impairment of Financial Assets Carried at Amortized Cost

Management uses estimates based on historical loss experience for assets with credit risk characteristics. An adequate amount of allowance for impairment is made for specific and groups of accounts, where objective evidence of impairment exists.

The Company evaluates the amount of allowance for impairment based on available facts and circumstances, including, but not limited to, the length of the Company's relationship with the counterparties, the counterparties' current credit status based on known market forces, average age of accounts, collection experience and historical loss experience.

The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

The carrying value of reinsurance balances receivable, reinsurance recoverable on reported claims and the analysis of allowance for impairment on such financial assets are shown in Notes 6 and 13.

The carrying values of HTM securities and loans and receivables are shown in Notes 9 and 11, respectively.

(b) Fair Value Measurement of AFS Financial Assets

The Company carries certain financial assets at fair value, which requires the extensive use of accounting estimates and judgment. In cases when active market quotes are not available, fair value is determined by reference to the current market value of another instrument which is substantially the same or is calculated based on the expected cash flows of the underlying net base of the instrument. The amount of changes in fair value would differ if the Company utilized different valuation methods and assumptions. Any change in fair value of these financial assets and liabilities would affect profit or loss and other comprehensive income.

The carrying value of the Company's AFS financial assets and the amounts of fair value changes recognized are disclosed in Note 8.

(c) Determination of Realizable Amount of Deferred Tax Assets

The Company reviews its deferred tax assets at each reporting period and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. Any deferred tax asset will be re-measured if it might result to derecognition where the expected tax law to be enacted has a possible risk on the realization.

As at December 31, 2024 and 2023, the Company recognized net deferred tax assets amounting to P582.26 million and P523.26 million, respectively (see Note 26), as management has assessed that it is probable that sufficient taxable profit will be available to allow the benefit of the deferred tax assets to be utilized. However, unrecognized deferred tax assets amounted to P546.79 million and P547.20 million as at December 31, 2024 and 2023, respectively (see Note 26).

(d) *Valuation of Reinsurance Premiums*

Reinsurance premiums include premiums reported by cedants and accrued reinsurance premiums. The Company records accrued premiums based on a cedant-by-cedant basis taking into consideration the terms of the reinsurance treaty, historical experience and latest information from cedants.

The Company accrued reinsurance premium amounting to P957.81 million, P1,284.75 million and P127.65 million in 2024, 2023 and 2022, respectively, as part of Reinsurance premiums – net of returns in the statements of income.

(e) *Valuation of Retroceded Premiums*

Retroceded premiums include premiums reported to the retrocessionaires and accrued retroceded premiums. The Company records retroceded premiums based on individual retroceded treaties taking into consideration the terms of the retroceded treaty, historical experience and latest information relevant to the treaty.

The Company amortized retroceded premium amounting to P36.07 million and P106.49 million in 2024 and 2023, respectively, and accrued P78.47 million in 2022, as part of Retroceded premiums in the statements of income.

(f) *Valuation of Reinsurance Contract Liabilities*

The Company's Reinsurance contract liabilities are composed of premium liabilities and claim liabilities. Premium liabilities are the premium reserves while claim liabilities are equal to the present value of Claims and claims reserves account in the statements of financial position which include outstanding claims, IBNR claims, loss adjustment expenses payable plus the MfAD. Claim liabilities are discounted for the time value of money.

The Company estimates the present value of future cash flows, used in performing the liability adequacy test and in determining claims liabilities, through the use of historical claims experience and claims settlement patterns.

The principal assumption underlying the claim liability estimates is that the Company's future claims development will depend on the estimate of the ultimate loss during a period of time for a particular risk exposure and then estimate the percentage of this ultimate loss that was not reported as of the reporting date.

The Company's claim liability estimates, as ascertained by an independent actuary, are determined by calculating the estimated ultimate losses as the sum of reported claims plus IBNR claims. Ultimate losses were estimated using generally accepted actuarial methods such as the Chain Ladder Method, Bornhuetter-Ferguson Method and the Expected Loss Ratio Method. The Company also included MfAD as a percentage of the total outstanding losses, IBNR best estimate and loss adjustment expenses payable, to allow for inherent uncertainty of the best estimate of the policy reserves.

Additional qualitative judgments are used by the independent actuary to assess the extent to which the full tail of the claims development is influenced by the different factors, for example, changes in market factors such as public attitude to claiming, economic conditions, as well as internal factors such as portfolio mix and policy conditions. Judgment is further used to assess the extent to which external factors such as juridical decisions and government legislation affect the estimates.

As at December 31, 2024 and 2023, the carrying value of provision for claims reported and IBNR claims are recognized as Claims and claims reserves in the statements of financial position (see Note 19).

4. RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company is exposed to a variety of financial risks from both its operating and investing activities. The Company's main risk mitigation strategies generally include adoption of underwriting and investment policies and guidelines, annual budget provision and internal audit checks and assessments.

The Company has implemented an Enterprise Risk Management Process, which is an organization-wide approach to the identification, assessment, communication and management of enterprise risks which are, defined as issues which may prevent the Company from achieving its strategic objectives. This process has been fully integrated into the Company's operations and is overseen by a Risk Management Team, who reports the results of the review and risk assessment to members of senior management. At the same time, a Risk Oversight Committee has been established by the Company's BOD to assist them in the development and oversight of the Company's risk management program. The Risk Oversight Committee is required to provide the BOD with a comprehensive enterprise risk assessment at least annually and to establish plans to ensure that risks are being managed and monitored effectively. The Risk Oversight Committee's main task is to oversee that risk management is an integral part of the planning and operations of the Company in order to meet corporate goals and objectives.

The Company's risk management, in close cooperation with the respective duly constituted Board Committees on Underwriting, Investment and Budget, Risk Oversight and Audit, focuses on implementing risk control measures addressing underwriting acceptances, catastrophe exposures, retrocession programs, claims control, and securing short to medium-term cash flows by minimizing financial market risks while managing long-term financial investments to generate expected returns.

The most significant financial risks to which the Company may be exposed to are described below and in the succeeding pages. Moreover, there are no changes in the Company's exposure to these risks, and objective, policies and processes for managing the risks from previous year.

4.1 Underwriting Risk

As a reinsurer, the Company underwrites reinsurance business from life and non-life insurance and reinsurance companies and intermediaries, with the objective of realizing profits and being a dependable partner to its clients. To attain this objective, it is essential for the Company to have a balanced portfolio, wherein there is diversification of risks. For non-life business, each risk that is accepted or treaty arrangement entered into is carefully evaluated based on the Company's underwriting guidelines, such as maximum limits per type of risk, existing exposures, premium adequacy and financial condition of the client.

The Company's retention on the larger risks that the Company accepts, or possible accumulation of the same in a given area, including losses that could arise from catastrophes such as earthquakes and typhoons, is protected by an excess of loss coverage to limit the Company's exposure up to a specified amount. Significant risk concentrations may result in potential losses not only in certain areas but also within a particular type of business such as property, motor and casualty. The Company monitors and controls its exposures in various lines.

Retroceding what the Company had earlier accepted as reinsurance is resorted to enable the Company to write risk with amounts in excess of its retention, and to reduce the volatility of its results and protect its capital. In doing so, the Company also sets minimum requirements and standards in determining with whom it retrocedes to, foremost of which is the rating of the retrocessionaires by international rating agencies such as Standard and Poor's and A.M. Best.

On the other hand, life business, which constitutes about 49% of gross premium written, follows a schedule of retention per life or group life as set by the Underwriting Committee. Any amount in excess of this is retroceded with reputable foreign reinsurers whose ratings from the same rating agencies are above par and meet the Company's standards.

Starting 2015, the Company repositioned itself as a lead-role reinsurer. Consequently, this triggered a re-evaluation of company retention. The retention limits appropriate for mandatory 10% share are not advantageous to the Company when applied to lead contracts where share is 80% or 100%.

As a lead reinsurer, the Company is pushing for the adoption of underwriting guidelines which may be accessed through the Company's web portal. Also, the Company continues to practice prudent claims management control. In evaluating a claim, the Company follows set of guidelines such as setting up of reserves upon its receipt of a preliminary loss advice and requiring the cedant-claimant to submit other necessary documents such as the adjuster's report, affidavits and proof of loss, among others. In addition, the Company establishes claim reserves to provide for losses that have been incurred but not yet paid. At the end of each reporting date, the Company assesses the adequacy of reserves for future claims that are not yet reported by setting up IBNR best estimate and inclusion of MfAD as ascertained by an independent actuary.

Claims Development

The Company aims to maintain strong reserves in respect of its insurance business in order to protect against adverse future claims experience and developments. As claims develop and the ultimate cost of claims becomes more certain, adverse claims experiences are eliminated which results in the release of reserves from earlier accident/underwriting years. In order to maintain strong reserves, the Company transfers much of this release to current accident/underwriting year reserves when the development of claims is less mature and there is much greater uncertainty attaching to the ultimate cost of claims.

The risks vary significantly in relation to the location of the risk insured by the Company, type of risks insured and in respect of commercial and business interruption by industry.

The following tables shows the estimates of cumulative incurred claims, gross of retrocession, for each underwriting year at each reporting date, together with cumulative claims paid as at December 31, 2024 and 2023.

Sensitivities

As a reinsurer, the insurance contract liabilities of the Company are sensitive to key factors such as claims experience, the observed claims reporting and payment patterns, and the occurrence of catastrophic events as observed in the historical claims ratios of the Company.

The analysis below is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on the Company's income before income tax. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis. It should be noted that movements in these variables are nonlinear.

	Change in Assumption	Impact on Income before Income Tax		Impact on Income after Income Tax	
		Increase (Decrease)		Increase (Decrease)	
		2024	2023	2024	2023
Claims ratio	+5%	(P241,081)	(P214,069)	(P180,811)	(P160,552)

4.2 Credit Risk

Credit risk is the risk of financial loss to the Company if a counterparty to a reinsurance contract or financial instrument fails to meet its contractual obligations. In 2024 and 2023, the Company is exposed to credit risk primarily through its cash and cash equivalents, debt instruments classified as AFS financial assets and HTM securities, other investments, reinsurance balances receivable, loans and receivables, reinsurance recoverable on reported claims, deposits and security fund. The carrying amounts of the financial assets best represent the maximum credit risk exposure at the reporting date.

As at December 31, 2024 and 2023, the exposure to credit risk for reinsurance balances receivable by region and source is as follows:

By Region	<i>Note</i>	2024	2023
Domestic		P3,045,729	P2,931,777
Foreign		2,833,411	2,026,055

The Company uses a credit grading system based on the borrowers and counterparties overall credit worthiness, as described below.

Investment High Grade – This pertains to accounts with a very low probability of default as demonstrated by the borrower’s strong financial position and reputation. The borrower has the ability to raise substantial amounts of funds through credit facilities with financial institutions. The borrower has a strong debt service record and a moderate use of leverage.

Non-investment Grade - Satisfactory – This pertains to current accounts with no history of default or which may have defaulted in the past, but the conditions and circumstances directly affecting the borrower’s ability to pay has abated already. The borrower is expected to be able to adjust to the cyclical downturns in its operations. Any prolonged adverse economic conditions would however ostensibly create profitability and liquidity issues. The use of leverage may be above industry or credit standards but remains stable.

Past Due but not Impaired – Rating given to borrowers and counterparties where outstanding obligation is already past due without impairment indicator.

Impaired – This pertains to accounts with impairment indicator and uncertain collectability. Allowance for impairment losses were recognized by the Company for these accounts.

The Company continuously monitors defaults of ceding companies and other counterparties, identified either individually or by group, and incorporates this information into its credit risk controls. Where available at a reasonable cost, external credit ratings and/or reports on ceding companies and other counterparties are obtained and used. The Company’s policy is to deal only with creditworthy counterparties.

As part of Company's policy, substantially all bank deposits are only maintained with reputable financial institution having high quality external credit ratings. Cash in banks which are insured by the Philippine Deposit Insurance Corporation (PDIC) up to a maximum coverage of P0.50 million per depositor per banking institution, as provided for under Republic Act (RA) No. 9576, *Amendment to Charter of PDIC*, are still exposed to credit risk. However, the credit risk for cash and cash equivalents is considered negligible, since the majority of the counterparties are reputable banks with high quality external credit ratings.

The reinsurance balances receivable that are past due but not impaired as at December 31, 2024 and 2023 are as follows:

	2024	2023
More than six months but not more than one year	P864,417	P623,013
More than one year	405,646	380,003
	P1,270,063	P1,003,016

None of the Company's reinsurance receivables and financial assets are secured by collateral or other credit enhancements, except for cash and cash equivalents as described in the preceding page. Further, the Company's reinsurance balances are subject to enforceable master netting agreements, each agreement between the Company and counterparties allows for net settlement of the relevant reinsurance liabilities when both elect to settle on a net basis.

Reinsurance balances as at December 31, 2024 and 2023 are as follows:

	Notes	2024	2023
Reinsurance balances receivable	6, 25	P5,379,932	P4,422,047
Reinsurance balances payable	17, 25	2,089,847	2,301,613

4.3 Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its obligations associated with its reinsurance contracts and financial liabilities that are settled by delivering cash or another financial asset.

The Company manages its cash and investment position to meet its obligations arising from reinsurance agreements and financial liabilities. Currently, the Company's excess cash is invested in short-term placements, HFT securities and AFS financial assets.

As at December 31, 2024 and 2023, the Company's obligations arising from reinsurance operations amounting to P4.34 billion and P4.19 billion, respectively, are expected to be settled within the normal operating cycle of the business. In addition, as at December 31, 2024 and 2023, financial liabilities included as part of the Accounts payable and accrued expenses and Forward liability accounts in the statements of financial position amounted to P244.45 million and P282.14 million, respectively, and have contractual maturities within one year after the end of the reporting period.

As at December 31, 2024 and 2023, the Company has a current ratio of 2.14:1 and 1.84:1, respectively.

4.4 Market Risk

Market risk embodies potential losses due to market fluctuations and includes foreign exchange risk, equity price risk and interest rate risk.

The Company's market risk is managed on a daily basis in accordance with internal and regulatory policies and procedures while overall market positions are reported to the Investment Committee of the Company.

The market risks to which the Company may be exposed are as follows:

(a) Foreign exchange Risk

Foreign currency risk is the risk that fluctuations in foreign exchange rates will adversely affect the fair value or cash flow of a recognized financial instrument. The Company may invest in financial instruments and enter into transactions denominated in currencies other than its functional currency. Consequently, the Company is exposed to risk that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the Company's assets or liabilities denominated in currencies other than in Philippine peso.

Exposures to currency exchange rates arise from the foreign currency denominated short-term placements, investments, receivables and payables. The Company recognized net foreign currency gains of P13.45 million, P18.06 million and P13.96 million in 2024, 2023 and 2022, respectively (see Note 22).

To mitigate the Company's exposure to foreign exchange risk, foreign-currency denominated cash flows and positions are monitored and hedged as it deems necessary. The foreign currency denominated financial assets and liabilities of the Company is as follows:

	2024		2023	
	U.S. Dollars	Other Currencies	U.S. Dollars	Other Currencies
Financial assets	P1,556,353	P2,468,153	P1,994,475	P1,831,902
Financial liabilities	(749,160)	(1,399,460)	(997,502)	(312,334)
Total net exposure	P807,193	P1,068,693	P996,973	P1,519,568

The table below illustrates the sensitivity of the Company's profit before tax and equity with respect to changes on Philippine peso (Php) against foreign currencies exchange rates. The percentage changes in rates have been determined based on the average market volatility rates, using standard deviation, in the previous 12 months. If the Philippine peso had strengthened against the foreign currencies, the effect is presented below.

	2024			2023		
	Reasonably Possible Change in Rate	Effect in Profit Before Tax	Effect in Equity	Reasonably Possible Change in Rate	Effect in Profit Before Tax	Effect in Equity

Total		P131,990	P98,992		P71,832	P53,874

If the Philippine peso had weakened against the foreign currencies, the effect would be the reverse of the amounts presented.

Exposures to foreign currency rates vary during the year depending on the volume of foreign currency denominated transactions. Nonetheless, the analysis is considered to be a representative of the Company's currency risk.

(b) *Equity Price Risk*

Equity price risk is the probability that the value of an equity investment would deteriorate due to changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

The Company, through its Investment Committee, has established conservative guidelines and policies and constantly reviews them to align with the Company's risk appetite, business profile, targets and better control the risks inherent in equity investments.

The Company's own investment policy requires that it invests only in shares of common stock of companies listed in the PSE. Also, these listed companies must have profitable business operations and market capitalizations supportive of the overall strategic direction of the Company.

The Investment Committee regularly reviews and approves a list of publicly traded stocks authorized for investments on the basis of the foregoing considerations. Furthermore, the Investment Committee seeks to avoid unwarranted concentration of funds in a single asset class by regularly monitoring and limiting the proportion of equity investments to the Company's total investment portfolio. Further, exposure limits to a group of entities and single entities are established and monitored regularly.

As at December 31, 2024 and 2023, investments in listed equities accounted for 7% of the Company's total investment portfolio, respectively.

The observed volatility rates of the fair value of the Company's HFT securities and AFS financial assets held at fair value and their impact on the Company's income before income tax and equity as at and for the years ended December 31, 2024 and 2023 are summarized as follows:

	2024			2023		
	Observed Volatility Rates	Impact on Income before Income Tax Increase (Decrease)	Effect on Equity Increase (Decrease)	Observed Volatility Rates	Impact on Income before Income Tax Increase (Decrease)	Effect on Equity Increase (Decrease)
HFT securities:						
Common shares	12.28%	P28,445	P28,445	9.98%	P26,653	P26,653
AFS financial Assets:						
Common shares	12.28%	—	40,701	9.98%	—	31,782
Preferred shares	3.84%	—	4,295	27.73%	—	40,048
		P28,445	P73,441		P26,653	P98,483

If the same volatility in market value resulted to a decline in fair value, with all other variables remaining constant, the impact to HFT securities would be the reverse of the amounts presented above. While for AFS financial assets, a reduction on the income before income tax by P1.21 million and P3.06 million in 2024 and 2023, respectively.

(c) *Interest Rate Risk*

There are two types of interest rate risk:

- Fair Value Interest Rate Risk - the probability that the value of a financial instrument would deteriorate due to changes in market interest rates; and
- Cash Flow Interest Rate Risk - the probability that future cash flows of a financial instrument would deteriorate due to changes in market interest rates.

Significant portion of the Company's investments is composed mainly of fixed interest-bearing debt instruments carried at fair value. Its total consolidated bond holdings accounted for 87% and 86% of its total investment portfolio as at December 31, 2024 and 2023, respectively. As a result, the Company is exposed to fair value interest rate risk.

The Company does not carry debt instruments with variable interest rate and, thus, is not exposed to cash flow interest rate risk. Risk limits on issuer exposure, credit ratings, duration, and gapping of its portfolio are being monitored and managed to ensure protection of capital and address the Company's liquidity needs as they arise.

The analysis below details the impact of changes in market interest rate to the fair value of the Company's investment in fixed-rate debt instruments. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

	2024		
	Observed Volatility Rates	Effect in Other Comprehensive Income

Corporate bonds	25.88%	(5)	54
		P1,394,365	P1,521,910

In 2024 and 2023, the Company determined the reasonably possible change in interest rate based on the historical percentage changes in weighted average yield rates of outstanding investments of the Company.

5. CASH AND CASH EQUIVALENTS

This account consists of:

	2024	2023
Cash on hand and in banks	P114,909	P57,071
Short-term placements	334,830	214,732
	P449,739	P271,803

Cash in banks generally earn interest at rates based on daily bank deposit rates.

Short-term placements include time deposits and special deposit accounts made for varying periods of up to three months depending on the liquidity requirements of the Company.

Interest income recognized from cash in banks and short-term placements amounting to P18.53 million in 2024, P22.74 million in 2023, and P11.25 million in 2022, is presented as part of the Investment and other income and expenses – net account in the statements of income (see Note 22).

Peso short-term placements earn annual interest ranging from 3.60% to 6.25% in 2024, from 3.98% to 6.10% in 2023 and from 0.23% to 5.75% in 2022, while U.S. dollar short-term placements earn annual interest ranging from 2.33% to 5.55% in 2024, from 1.00% to 5.55% in 2023 and from 0.05% to 4.60% in 2022.

The Cash and cash equivalents account includes cash denominated in U.S. dollar amounting to \$2.68 million (P155.43 million) and \$1.86 million (P103.19 million) as at December 31, 2024 and 2023, respectively and cash denominated in Euro amounting to €0.36 million (P21.52 million) and €0.01 million (P0.34 million) as at December 31, 2024 and 2023, respectively.

Prepayments

Prepayments pertain to software licenses and support maintenance costs and prepaid health and group life insurance premiums of the Company.

Investment Properties – net

Investment properties consist of land which are owned for capital appreciation. The carrying amount of the investment properties as at December 31, 2024 and 2023 is P3.71 million.

The total estimated fair value based on the latest available selling price of the properties obtained by the Company amounted to P34.25 million and P34.21 million as at December 31, 2024 and 2023, respectively (see Note 33.4).

Security Fund

Security fund represents amount deposited with the IC, as required by the IC, and in instances of the Company becoming insolvent, can be used as payment for valid claims against the Company. The balance of the fund earns interest at rates determined by the IC annually.

Deferred Input VAT

Deferred input VAT pertains to VAT from the purchase of goods and services that are due to the suppliers as at reporting date.

17. REINSURANCE BALANCES PAYABLE

The details of this account are as follows:

	<i>Note</i>	2024	2023
Due to retrocessionaires		P2,040,010	P2,189,380
Due to cedant		32,671	93,370
Funds held for retrocessionaires		17,166	18,863
	25	P2,089,847	P2,301,613

Due to retrocessionaires

Due to retrocessionaires represent unpaid premiums payable to the Company's retrocessionaires.

Funds held for retrocessionaires

Funds held for retrocessionaires represent portion of the reinsurance premium ceded to retrocessionaires, which were withheld by the Company in accordance with reinsurance agreements.

The Company's payments of these reinsurance liabilities are netted by the retrocessionaires' share in underwriting costs and claims paid.

The movements in these accounts are shown below.

2024

18. ACCOUNTS PAYABLE AND ACCRUED EXPENSES

This account includes the following:

	<i>Note</i>	2024	2023
Accounts payable and accrued expenses		P222,534	P159,685
Income tax payable		81,674	260,277
Deposit liability		38,631	65,116
Deferred output VAT		25,615	25,655
Withholding taxes payable		9,562	5,044
Defined benefit liability	24.2(b)	8,206	4,260
Dividends payable	27.3	1,662	1,677
		P387,884	P521,714

Accounts payable represent balances due to suppliers or for the purchase of goods or services. This includes accrued expenses pertaining to accruals of professional fees, outside services, utilities, uniforms, membership dues and meeting expenses and the related input VAT.

Income tax payable as at December 31, 2024 and 2023 pertains to amount due by the Company as a result of taxable income for the year using tax rates enacted at the reporting date, after deducting the creditable withholding taxes and prepaid income taxes.

In February 13, 2020, the Company entered into an ordinary life coinsurance agreement with a ceding company for its specific in-force block of business, where it assumed a share of the gross premium in return for a proportionate share of the coverage of all benefits. An initial consideration of P211.10 million was transferred to the Company representing the statutory reserves of the underlying contracts. As the related insurance risk of the underlying contracts was not considered significant, this contract was accounted for as a Deposit liability. The statutory reserves are measured based on the assumptions consistent with the Life's valuation standards set by the IC.

Movements resulting from the remeasurement of the statutory reserves are recognized as Movement in deposit liability as reported under Investment and other income and expenses – net account (see Note 22). As at December 31, 2024 and 2023, the statutory reserves amounted to P38.63 million and P65.12 million, respectively.

Deferred output VAT pertains to VAT from the sale of goods and services that are still outstanding as at year-end. These amounts are not due for remittance to the BIR until the receivables are collected.

Other than the statutory reserves discussed above, the Management considers the carrying amount of accounts payable and accrued expenses recognized in the statements of financial position to be a reasonable approximation of their fair value due to their short duration.

19. CLAIMS AND CLAIMS RESERVES

Claims and claims reserves are losses due to ceding companies under reinsurance agreements inclusive of reserves for IBNR claims, loss adjustment expenses payable and MfAD as shown below.

The claims and claims reserves account consist of:

24.2 *Post-employment Defined Benefit*

(a) *Characteristics of the Defined Benefit Plan*

The Company maintains a wholly-funded, tax-qualified, non-contributory post-employment defined benefit plan retirement plan that is being administered by a trustee covering all regular full-time employees.

The normal retirement age is 60 with a minimum of 10 years of credited service. The plan also provides for an early retirement at age 50 with a minimum of 10 years of credited service. Normal retirement benefit is an amount equivalent to 175% of the final monthly covered compensation (average monthly basic salary during the last 12 months of credited service) for every year of credited service.

(b) *Explanation of Amounts Presented in the Financial Statements*

Actuarial valuations are made annually to update the retirement benefit costs and the amount of contributions. All amounts presented below and in the succeeding pages are based on the actuarial valuation reports obtained from an independent actuary in 2024 and 2023. The amount of defined benefit liability as at December 31, 2024 and 2023 is presented as part of Accounts payable and accrued expenses (see Note 18) and are recognized in the statements of financial position determined as follows:

	2024	2023
Fair value of the plan assets	P96,434	P93,510
Present value of the obligation	(104,640)	(97,770)
	(P8,206)	(P4,260)

The movements in the fair value of plan assets are presented below.

	2024	2023

Changes in financial assumptions		(456)	5,210
Benefits paid by the plan		(15,256)	(1,625)
Balance at end of year		P104,640	P97,770

The composition of the fair value of plan assets at the end of the reporting period by category and risk characteristics is shown below.

	2024	2023
Cash and cash equivalents	P2,611	P1,134
Philippine government securities	67,788	68,115
Equity securities	15,959	15,469
Corporate notes	6,840	7,765
Mutual fund	2,359	514
Loans and receivables	1,182	1,077
Accounts payable	(305)	(564)
	P96,434	P93,510

The fair value of the equity and government bonds are determined based on quoted market prices in active markets.

The return on plan assets amounted to a gain of P4.21 million and P5.45 million in 2024 and 2023, respectively and a loss of P3.97 million in 2022.

Plan assets do not comprise any of the Company's own financial instruments.

The components of amounts recognized in the statements of income and in other comprehensive income in respect of the defined benefit post-employment plan are as follows:

	2024	2023	2022
<i>Reported in statements of income:</i>			
Current service cost	P13,971	P12,013	P11,521
Net interest expense (income)	258	140	(477)
	P14,229	P12,153	P11,044

	2024	2023	2022
<i>Reported in other comprehensive loss (income):</i>			
Actuarial losses (gains) arising from:			
Experience adjustments	P2,696	(P3,094)	(P1,472)
Changes in financial assumptions	(456)	5,210	(6,373)
Return on plan assets (excluding amounts included in net interest)	1,448	(2)	8,726
	P3,688	P2,114	P881

Current service cost and settlement gain, if any, are presented as part of Salaries and employee benefits; while net interest income or expense is presented as part of Interest income under Investment and other income and expenses – net account (see Note 22).

Amounts recognized in other comprehensive income were included within items that will not be reclassified subsequently to profit or loss.

In determining the amounts of the defined benefit post-employment obligation, the following significant actuarial assumptions were used:

	2024	2023	2022
Discount rate	6.12%	6.05%	7.01%
Expected rate of salary increase	6.00%	6.00%	6.00%
Employee turn-over rate	10.00%	10.00%	10.00%

Assumptions regarding future mortality experience are based on published statistics and mortality tables. The average remaining working lives of an individual retiring at the age of 65 is 27. These assumptions were developed by management with the assistance of an independent actuary. Discount factors are determined close to the end of each reporting period by reference to the interest rates of a zero-coupon government bond with terms to maturity approximating to the terms of the post-employment obligation. Other assumptions are based on current actuarial benchmarks and management's historical experience.

(c) *Risks Associated with the Retirement Plan*

The plan exposes the Company to actuarial risks such as investment risk, interest rate risk, longevity risk, salary risk and inflation risk.

(i) *Investment and Interest Risks*

The present value of the defined benefit obligation is calculated using a discount rate determined by reference to market yields of government bonds. Generally, a decrease in the interest rate of reference government bonds will increase the plan obligation. However, this will be partially offset by an increase in the return on the plan's investments in debt securities and if the return on plan asset falls below this rate, it will create a deficit in the plan.

Currently, the plan has investments in cash and cash equivalents, debt securities, mutual funds, equity securities, and loans and receivables. Due to the long-term nature of the plan obligation, a level of continuing equity and debt investments is an appropriate element of the Company's long-term strategy to manage the plan efficiently.

(ii) *Longevity and Salary Risks*

The present value of the defined benefit obligation is calculated by reference to the best estimate of the mortality of the plan participants both during and after their employment, and to their future salaries. Consequently, increases in the life expectancy and salary of the plan participants will result in an increase in the plan obligation.

(iii) *Inflation Risk*

A significant proportion of the defined benefit obligation is linked to inflation. The increase in inflation will increase the Company's liability. A portion of the plan assets are inflation-linked debt securities which will mitigate some of the effects of inflation.

(d) *Other Information*

The information on the sensitivity analysis for certain significant actuarial assumptions, the Company's asset-liability matching strategy, and the timing and uncertainty of future cash flows related to the retirement plan are described as follows:

(i) *Sensitivity Analysis*

The following tables summarize the effects of changes in the significant actuarial assumptions used in the determination of the defined benefit asset/liability:

December 31, 2024	Impact on Defined Benefit Liability		
	Change in Assumption	Increase in Assumption	Decrease in Assumption
Discount rate	+/- 1.0%	(P6,100)	P6,999
Salary growth	+/- 1.0%	6,850	(6,266)
Turn-over rate	+/- 10.0%	(892)	892
December 31, 2023	Impact on Defined Benefit Liability		
	Change in Assumption	Increase in Assumption	Decrease in Assumption
Discount rate	+/- 1.0%	(P5,415)	P6,197
Salary growth	+/- 1.0%	6,056	(5,552)
Turn-over rate	+/- 10.0%	(779)	779

The sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. This analysis may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated. Furthermore, in presenting the sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit asset recognized in the statements of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous years.

(ii) Asset-liability Matching Strategies

The Company applies asset-liability matching techniques to maximize investment returns at the least risk to reduce contribution requirements while maintaining a stable retirement fund. Retirement funds are invested to ensure that liquid funds are available when benefits become due, to minimize losses due to investment pre-terminations, and maximize opportunities for higher potential returns at the least risk.

The Company is guided by a formal Asset-Liability Management Study conducted by an independent actuary. In the study, expected benefit payments are projected and classified into short-term, medium-term or long-term liabilities. Investment instruments that would match the liabilities are identified. Finally, the investment mixes that would yield the maximum returns at certain risk levels are identified.

The study is conducted annually to capture changes in the demographic profile of the employees and changes in the economic environment affecting the amounts of maturing obligations and rates of return of available investment instruments.

In view of this, investments are made in reasonably diversified portfolio, such that the failure of any single investment would not have a material impact on the overall level of assets.

A large portion of the plan assets as at December 31, 2024 and 2023 consists of debt and equity securities, although the Company also invests in cash equivalents, mutual fund and loans and receivables. The Company believes that debt securities offer the most secure returns over the long term as they have the least acceptable level of risk which is in line with their asset-liability matching techniques.

There has been no change in the Company's strategies to manage its risks from previous periods.

(iii) *Funding Arrangements and Expected Contributions*

The plan is currently underfunded by P8.21 million based on the latest actuarial valuation. The Company may contribute annually to the retirement fund an amount equivalent to the current service cost. It may also contribute the needed amount to pay for retirement benefits becoming due that cannot be covered by the retirement fund. Tactical funding shall be employed on a year-to-year basis to maximize tax incentives, take advantage of investment opportunities, and satisfy the liquidity requirements of the Company.

As at December 31, 2024 and 2023, the maturity profile of undiscounted expected benefit payments from the plan for the next 20 years is as follows:

	2024	2023
Within one year	P10,051	P17,551
More than one year to five years	78,825	80,055
More than five years to 10 years	80,953	46,967
More than 10 years to 15 years	96,379	98,722
More than 15 years to 20 years	75,161	70,597
	P341,369	P313,892

The weighted average duration of the defined benefit obligation at the end of the reporting period is 17 years.

25. RECLASSIFICATION

In 2024, the Company reclassified certain accounts and transactions in the statements of financial position as at December 31, 2023 and statements of cash flows for the years ended December 31, 2023 and 2022 to conform with the current year's presentation.

The table presents the reclassification adjustments including impact to the statements of financial position and statements of cash flows:

- a. In prior years, the Company recognized certain transactions at gross instead at net amounts considering the right to offset under the relevant agreements. The Company reclassified the reported claims incurred under the “Claims and claims reserves” account to the “Reinsurance Balances Receivable” account. The Company also reclassified the Reinsurance recoverable on paid claims presented as part of the “Reinsurance Balances Receivable” account to the “Reinsurance Balances Payable” account.
- b. Deferred tax assets which was previously presented as part of “Other assets – net” is now presented as a single line item in the statements of financial position in accordance with PAS 1 *Presentation of Financial Assets*.

The above reclassifications has no material effect on the statement of financial position, statement of income, statement of comprehensive income, statement of cash flow and income tax as at and for the years then ended. Accordingly, management did not need to present the statement of financial position at the beginning of the earliest comparative period.

27.2 *Appropriation for Special Reserve*

In 1989, the BOD approved the establishment of a special reserve for extraordinarily high loss occurrences or severe catastrophic losses. As such, 10% of profit is set aside as special reserve provided there is no deficit. For the years ended December 31, 2024 and 2023, the Company appropriated P55.13 million and P53.62 million, respectively, for special reserve.

27.3 *Retained Earnings*

There was no declaration of cash dividends in 2024 and 2023. The total outstanding dividends payable amounted to P1.66 million and P1.68 million as at December 31, 2024 and 2023, respectively. These are presented as Dividends payable under Accounts payable and accrued expenses account in the statements of financial position (see Note 18).

The Company's retained earnings are restricted to the extent of the cost of the treasury shares as of the end of the reporting periods.

28. RELATED PARTY TRANSACTIONS

The Company's related parties include its stockholders, related parties under common ownership, retirement plan and the Company's key management personnel with which the Company had transactions as described below and in the succeeding pages.

28.1 Reinsurance Contracts with Related Parties

The Company accepts and cedes insurance business under various reinsurance contracts with related parties. The details of which are presented as follows:

	2024		2023	
	Stockholders	Related Parties Under Common Ownership	Stockholders	Related Parties Under Common Ownership
Premiums	P–	P252,138	P45,570	P218,388

Interest income recognized is presented as part of Interest income under Investment and other income and expenses – net account in the statements of income (see Note 22).

(b) Investments

The Company has investment in shares of stock of a stockholder, and fixed income securities, forward contracts, and UTF investments with related parties under common ownership classified as HFT securities, AFS financial assets, HTM securities and Forward liability. Relative to these transactions, the Company recognized dividend income, interest income, Gain (loss) on sale of AFS, Fair value gains (losses) on HFT securities, and Fair value losses from forward contract which are presented as part of Investment and other income and expenses – net account in the statements of income (see Note 22), while accrued interest on HTM securities is presented as part of Loans and receivables in the statements of financial position (see Note 11).

(c) *Investment Management and Custodianship*

The Company has entered into “Investment Management Agreement” and “Custodianship Agreement” with related parties under common ownership for the management and custodianship of certain investible funds of the Company subject to terms and conditions in the said agreements. In consideration for the services rendered, the Company pays the related parties under common ownership service fees equivalent to a certain percentage of the market value of the investments.

The total service fees paid is charged against Other charges under Investment and other income and expenses – net account in the statements of income (see Note 22).

28.3 *Investment Management of Retirement Fund*

The Company has existing “Retirement Fund Investment Management Agreement” with related parties under common ownership for the management of the investments of the Company’s retirement funds subject to the terms and conditions in the said agreement. The retirement fund does not hold any security issued by the Company as at December 31, 2024 and 2023.

28.4 *Key Management Personnel Compensation*

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including director, whether executive or otherwise, of the Company.

The compensation of key management personnel is presented as follows:

	2024	2023	2022
Short-term benefits	P83,356	P67,210	P63,125
Post-employment defined benefit	5,654	5,118	3,048
	P89,010	P72,328	P66,173

29. SOLVENCY

Under the Amended Insurance Code, an insurance company doing business in the Philippines shall at all times maintain the minimum paid-up capital, and net worth requirements as prescribed by the IC Commissioner. Such solvency requirements shall be based on internationally accepted solvency frameworks and adopted only after due consultation with the insurance industry associations.

Whenever the aforementioned requirement is found to be less than the required to be maintained, the IC Commissioner shall direct the Company to make good any such deficiency by cash, to be contributed by all stockholders of record in proportion with their respective interests, and paid to the treasurer of the Company, within 15 days from receipt of the order. Provided, that the Company in the interim shall not be permitted to take any new risk of any kind or character unless and until it makes good any such deficiency.

In case that a stockholder pays the contribution due from another stockholder by reason of failure or refusal of the latter to do so, shall have a lien on the certificates of stock of the Company appearing in its books in the name of the defaulting stockholder on the date of default, as well as on any interests or dividends that have accrued or will accrue to the said certificates of stocks, until the corresponding payment or reimbursement is made by the defaulting stockholder.

30. EARNINGS PER SHARE

The earnings per share are presented as follows:

	2024	2023	2022
Net profit	P551,344	P536,147	P55,701
Divided by the average number of outstanding shares (in thousands)	2,123,606	2,123,606	2,123,606
	P0.260	P0.252	P0.026

Diluted earnings per share is not determined since the Company does not have dilutive shares as at December 31, 2024, 2023 and 2022.

31. COMMITMENTS AND CONTINGENCIES

The following are the significant commitments and contingencies involving the Company:

31.1 Lease Commitments – Company as Lessee

The Company is a lessee under various leases covering warehouse and parking lots having a term of one year with renewal options. The future minimum rentals payable under this non-cancellable operating lease as at December 31, 2024 and 2023 is P1.03 million and P1.02 million, respectively, which is payable not later than one year.

Rental expense recognized amounted to P0.47 million, P0.26 million and P0.18 million in 2024, 2023, and 2022, respectively, and is presented in the statements of income as Rental under General and administrative expenses (see Note 24).

31.2 Legal Claims

The Company is currently involved in various legal proceedings. In consultation with the legal counsel, the related risk has been analyzed as to likelihood of occurrence and amount of future obligation. The Company believes that the outcome of these proceedings as at December 31, 2024 and 2023 will not have a material adverse effect on the Company's financial position.

31.3 *Deficiency Tax Assessments*

The Company received the FDDA for the taxable period July 1, 2012 to December 31, 2012 and taxable years 2016, 2017 and 2018. These assessments are in pursuant to which the BIR has sought to investigate the tax periods identified against the Company and consequently examine certain books, records and accounts that relate to transactions in the ordinary course of business. Pursuant to the Company's policy of addressing such actions and in line with prudent business practice, the Company has engaged tax counsel in relation to these matters.

As at December 31, 2024 and 2023, management believes that there is no probable reason that a material outflow of resources will be required, in excess of what has already been provided as provision, considering the merits of the Company's protest and the sufficiency and validity of the documents submitted to the local tax authorities to support the Company's position.

31.4 *Others*

In the normal course of business, the Company makes various commitments and incurs certain contingent liabilities that are not given recognition in the accompanying financial statements. Management believes that losses as at December 31, 2024 and 2023, if any, that may arise from these commitments and contingencies will not have any material effect on the financial statements.

32. CATEGORIES AND OFFSETTING OF FINANCIAL ASSETS AND LIABILITIES

32.1 *Comparison of Carrying Amounts and Fair Values*

* Excluding taxes payable and defined benefit liability.

Due to the short-term duration, management considers the carrying value of the Company's loans and receivables and financial liabilities at amortized cost approximate their fair value as at the end of the reporting periods.

See Notes 2.4 and 2.9 for a description of the accounting policies for each category of financial instrument including the determination of fair value. A description of the Company's risk management objectives and policies for financial instruments is provided in Note 4.

32.2 Offsetting of Financial Assets and Financial Liabilities

For financial assets and financial liabilities, subject to enforceable master netting agreements or similar arrangements, each agreement between the Company and counterparties, including related parties, allows for net settlement of the relevant financial assets and liabilities when both elect to settle on a net basis.

33. FAIR VALUE MEASUREMENT AND DISCLOSURES

33.1 Fair Value Hierarchy

In accordance with PFRS 13, *Fair Value Measurement*, the fair value of financial assets and financial liabilities and non-financial assets which are measured at fair value on a recurring or non-recurring basis and those assets and liabilities not measured at fair value but for which fair value is disclosed in accordance with other relevant PFRS Accounting Standards, are categorized into three levels based on the significance of inputs used to measure the fair value. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that an entity can access at the measurement date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and,

- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement.

For purposes of determining the market value at Level 1, a market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

33.2 Financial Instruments Measured at Fair Value

The table below shows the fair value hierarchy of the Company's financial assets and liability measured at fair value in the statements of financial position on a recurring basis (amounts in thousands).

Disposals	(2,065)	(3,911)
Foreign currency gains (losses)	1,224	(277)
Balance at end of year	P44,418	P42,453

There has been no transfer between levels in 2024 and 2023.

Described below are the information about how the fair value of the Company's classes of financial assets are determined.

a) Equity securities

As at December 31, 2024 and 2023, instruments included in Level 1 comprise equity securities classified as HFT securities and AFS financial assets. These securities were valued based on their market prices quoted in the PSE at the end of each reporting period.

Golf club shares classified as AFS financial assets are included in Level 2 as their prices are not derived from market considered as active due to lack of trading activities among market participants at the end or close to the end of the reporting period. Moreover, investment in equity securities held in a private company is included in Level 3 since its market value is not quoted in an active market, hence, measured by reference to the private company's book value using the most recent available financial data. The estimated fair value will increase (decrease) if the book value increases (decreases).

b) Debt securities

The fair value of the Company's debt securities, which consist of government and corporate bonds, is estimated by reference to quoted bid price in active market at the end of the reporting period and is categorized within Level 1.

c) UITF

The fair value of the Company's UITF which is classified as money market funds and consist of units of participation on the Fund's investments in short-term fixed income instruments consisting of time deposits and government securities with tenors of less than one year is estimated by reference to the net asset value published by the fund managers and is categorized within Level 1.

d) Forward asset and liability

The fair value of the Company's forward asset and liability is estimated by reference to the foreign exchange rate published by the Bangko Sentral ng Pilipinas at the end of the reporting period and is categorized within Level 2.

33.3 Financial Instruments Measured at Amortized Cost for which Fair Value is Disclosed

The table below summarizes the fair value hierarchy of the Company's financial assets and financial liabilities which are not measured at fair value in the statements of financial position but for which fair value is disclosed.

For financial assets other than HTM securities, management considers that the carrying amount of those short-term financial instruments approximate their fair value.

33.4 Fair Value Measurement for Non-financial Assets

The Company used market comparable approach as a valuation technique in measuring the fair value of its investment properties to arrive at fair value that is more representative of the investment properties' highest and best use. As at December 31, 2024 and 2023, the fair value of the investment properties is P34.25 million and P34.21 million, respectively, classified under Level 3 of the fair value hierarchy (see Note 16). The most significant input into this valuation approach is the price per square meter, hence, the higher the price per square meter, the higher the fair value.

33.5 Fair Value Measurement for Financial Assets Grouped Based on Nature of Cash Flows

The following table provides an overview of the fair values as at December 31, 2024 and 2023, and the amounts of change in the fair values during the reporting period separately for financial assets that meet the SPPI criterion (i.e. financial assets with contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding, excluding any financial asset that meets the definition of held for trading in PFRS 9, or that is managed and whose performance is evaluated on a fair value basis) and all other financial assets:

34. CAPITAL MANAGEMENT OBJECTIVES, POLICIES AND PROCEDURES

The Company's capital management objectives are (a) to ensure the Company's ability to continue as a going concern; and, (b) to provide an adequate return to shareholders by complying with the capital requirements and limitation enforced by the IC and by aligning the Company's operational strategy to its corporate goals. The capital requirements and limitations are as follows:

34.1 Minimum Capitalization

Under Section 289 of the RA No. 10607 (The New Insurance Code), any partnership, association, or corporation authorized to transact solely reinsurance business must have a capitalization of at least P3,000,000,000 paid in cash of which at least 50% is paid-up capital and the remaining portion thereof is contributed surplus, which in no case shall be less than P400,000,000 or such capitalization as may be determined by the Secretary of Finance, upon the recommendation of the IC Commissioner.

As at December 31, 2024 and 2023, the Company has complied with the minimum capital requirements.

34.2 Risk-Based Capital Requirements

As per IC CL No. 2016-68, Amended Risk-Based Capital (RBC2) Framework, all insurance companies must satisfy the annual minimum statutory RBC Ratio set at 100%. RBC ratio is computed by dividing the Company's Total Available Capital (TAC) by the RBC requirement. TAC is the aggregate of Tier 1 and Tier 2, minus deductions, subject to applicable limits and determinations. Tier 1 capital represents capital that is fully available to cover losses of the insurer at all times on a going-concern and winding up basis and is considered to be the highest quality capital available to the insurer. Tier 2 refers to capital not having the same high quality characteristics of Tier 1, but can provide additional buffer to the insurer. RBC requirement or the total required capital of an insurance company is the capital that is required to be appropriately to the risks an insurance company is exposed to.

As at December 31, 2024 and 2023, the Company has complied with the risk-based capital requirements.

34.3 Limitation on Dividend Declaration

The Company's BOD is authorized to declare dividends. A cash dividend declaration does not require any further approval from the stockholders. However, a stock dividend declaration requires further approval of the stockholders holding or representing not less than two-thirds of the Company's outstanding capital stock. Dividends may be declared and paid out of the unrestricted retained earnings which shall be payable in cash, property, or stock to all stockholders on the basis of outstanding stock held by them, as and at such times as the BOD may determine and in accordance with law.

The Insurance Commission, under Circular Letter No. 2021-02, dated January 7, 2021, provides that all regulated entities authorized to do business in the Philippines shall meet the following regulatory measures at all times, without regulatory relief, and which shall be duly attested by the President and Treasurer of the company, before declaration and/or distribution of dividends out of the unrestricted retained earnings:

- unimpaired paid-up capital stock;
- the net worth requirements as prescribed by Circular Letter (CL) No. 2015- 02-A and Section 194 of the Amended Insurance Code;
- the solvency requirements defined by Section 200 of the Amended Insurance Code;
- in the case of life insurance companies, the legal reserve fund required by Section 217;
- in the case of corporations other than life, the legal reserve fund required by Section 219; and
- a sum sufficient to pay all net losses reported, or in the course of settlement, and all liabilities for expenses and taxes.

The Company is required to report such dividend declaration or distribution to the IC within 30 days from the date of such declaration.

The SEC, through its Memorandum Circular 16 dated September 19, 2023, has set the revised guidelines in determining the appropriate amount of Retained Earnings available for dividend distribution. Based on the circular, dividends shall be declared out of unrestricted retained earnings of the corporation. Accordingly, a corporation cannot declare dividends when it has zero or negative retained earnings otherwise known as Retained Earnings Deficit. For such purpose, the surplus profits or income must be a bona fide income founded upon actual earnings or profits. The existence, therefore, of surplus profits arising from the operation of corporate business is a condition precedent to the declaration of dividends.

The phrase "actual earnings or profits" shall be the net income for the year based on the audited financial statements, adjusted for the following unrealized items:

- Equity in net income of associate/ joint venture, net of dividends declared;
- Unrealized foreign exchange gain, except those attributable to cash and cash equivalents;
- Unrealized fair value adjustment (mark-to-market gains) of financial instruments at fair value through profit or loss (FVTPL);
- Unrealized fair value gain of investment property;
- Deferred tax asset; and other unrealized gains and adjustments that the SEC may prescribe.

34.4 Non-admitted Assets

Various assets, included on the enumeration of Section 203 of RA 10607, are considered non-admitted assets for the purposes of determining the Company's financial condition.

The estimated non-admitted assets as defined in the Amended Insurance Code are measured in accordance with PFRS Accounting Standards and included in the statements of financial position.

These assets, which are subject to final determination by the IC, are as follows:

	2024	2023
Goodwill, trade names, and other like intangible assets	P34,021	P645
Prepaid or deferred charges for expenses and commissions paid by such insurance company	1,505,485	1,049,592

36. SUPPLEMENTARY INFORMATION REQUIRED BY THE BUREAU OF INTERNAL REVENUE (BIR)

Presented below and in the succeeding pages are the supplementary information which is required by the BIR under its existing Revenue Regulations (RR) No. 15-2010 to be disclosed as part of the notes to financial statements. This supplementary information is not a required disclosure under PFRS Accounting Standards.

The information on taxes, duties and license fees paid or accrued during the taxable year required under RR No. 15-2010 are presented below and in the succeeding page.

(a) Output VAT

In 2024, the Company declared output VAT amounting to P1,583,315, which is set off against input VAT, based on the following gross receipts/income:

	Tax Base	Output VAT
Exempt receipts/income	P8,928,222,909	P-
Commission earned on retrocession	12,522,674	1,502,721
Interest income on loans	671,616	80,594
	P8,941,417,199	P1,583,315

Pursuant to RR No. 04-07 effective April 6, 2007, "Non-life insurance premiums are subject to VAT whereas non-life reinsurance premiums are not subject to VAT, the latter being already subject to VAT upon receipt of the insurance premiums."

The tax bases of commission earned on retrocession are included as Commissions - net under Underwriting deductions account in the 2024 statements of income. The tax bases for commission are based on the Company's gross receipts before the effectivity of the Ease of Paying Taxes (EOPT) and invoices after its effectivity, hence, may not be the same with the amounts accrued in the 2024 statements of income.

As at December 31, 2024, the Company also has deferred output VAT amounting to P25,615,447 pertaining to uncollected commission income from retrocessionaires (see Note 18).

(b) Input VAT

The movements of input VAT in 2024 are summarized below.

Balance at beginning of year	P146,792,838
Services lodged under other accounts	7,183,909
Goods other than for resale or manufacture	2,418,530
Amortization of input VAT	91,480
Applied against output VAT	(1,583,315)
Input VAT on exempt sales	(9,678,158)
Balance at end of year	P145,225,284

The balance of input VAT as at December 31, 2024 is recorded under Other assets – net account in the statements of financial position (see Note 16).

As at December 31, 2024, the Company also has deferred input VAT amounting to P63,929 pertaining to VAT on capital assets, and deferred withholding VAT amounting to P9,202,886 representing VAT on unapplied input VAT on unpaid premiums on ceded out transactions to the Company from a certain government entity.

(c) Taxes on Importation

The Company does not have any customs duties or tariff fees in 2024 since it does not have any importation.

(d) Excise Tax

The Company does not have excise tax in 2024 since it does not have any transactions which are subject to excise tax.

(e) Documentary Stamp Tax (DST)

Total DST accrued and paid in 2024 amounted to P44,588 which pertains to car loan transactions of the Company. The Company is also liable to DST when it issues original shares of stocks or transfer certificate of stock. The Company did not issue original shares of stocks nor transfer certificate of stocks for the year ended December 31, 2024. Reinsurance contracts are not subject to DST.

(f) Taxes and Licenses

The details of taxes and licenses for 2024, which are presented under General and administrative expenses account in the statements of income are as follows:

(b) Deficiency Tax Assessments and Tax Case

a) July to December 2012

On September 14, 2016, the Company received the FDDA for the 2012 VAT assessment dated September 13, 2016 from the BIR. The Company filed a request for reconsideration with the Office of the Commissioner of the Internal Revenue on October 14, 2016. As of date, the request is still pending resolution.

b) Taxable year 2016

On December 29, 2021, the Company received the Final Decision on Disputed Assessment (FDDA) for Value Added Tax (VAT) deficiency in the amount of P53.1 million for the taxable year 2016, inclusive of interest amounting to P20.6 million, signed by the Commissioner of Internal Revenue. The Company continues to dispute the assessment and has filed a Petition for Review dated February 2, 2022 with the Court of Tax Appeals (CTA), which was docketed as CTA Case No. 10791.

The case has been submitted for decision on 31 May 2024. To date, no decision has been rendered by the CTA in this case.

c) Taxable year 2017

On March 24, 2023, the Company received the FDDA for the deficiency VAT assessment for the taxable year 2017 in the aggregate amount of P54.04 million, inclusive of surcharges, interest, and penalties computed until April 30, 2023. This led to the Company's filing of a Petition for Review with Urgent Motion To Suspend Tax Collection (With Prayer for the Issuance of Status Quo Ante Order and/or Writ of Preliminary Injunction) dated May 16, 2023, which was docketed as CTA Case No. 11156, to dispute the assessment and to seek the suspension of the BIR's tax collection efforts in the interim.

As of date, no decision has been rendered by the CTA in this case.

d) Taxable year 2018

On September 28, 2021, the Company received Letter of Authority (LOA) from the BIR to examine the Company's books of accounts and other accounting records for all internal revenue taxes for the taxable year 2018.

On September 1, 2023, the Company received the FDDA amounting to P39.32 million for which the Company has offered to settle the alleged tax deficiencies through an Offer Letter of Compromise in the amount of P15.00 million with the BIR Large Taxpayers - Collection Enforcement Division (LT-CED) which was paid on September 29, 2023.

On October 2, 2023, the Company filed a Petition for Review disputing P19.22 million of the total amount specified in the FDDA, which was docketed as CTA Case No. 11276.

On November 12, 2024, the Company received a Notice of Denial for Compromise Settlement.

The CTA case is scheduled for hearing from April to August 2025.

d. Taxable years 2021 and 2022

On September 12, 2023 and April 2, 2024, the Company received the LOA from the BIR to examine the Company's books of accounts and other accounting records for all internal revenue taxes for the taxable years 2021 and 2022, respectively. Management has provided all the documents required by the BIR for taxable years 2021 and 2022 on November 30, 2023 and April 30, 2024, respectively.

Underwriting Results

Net underwriting income amounted to P226.1 million for the first quarter of 2025, higher by P74.1 million or 49% than the same period of 2024. Higher net underwriting income in 2025 resulted mainly from Non-life domestic business, partially negated by lower net underwriting income from Life and Non-life foreign businesses.

Net underwriting income from the Non-life domestic business in 2025 (compared to the net underwriting losses in 2024) resulted mainly from the favorable claims development for past underwriting years. Lower net underwriting income from the Life business resulted mainly from other underwriting expense recognized in 2025, higher experience refund and higher commissions incurred, partially negated by higher premiums generated as discussed in the Reinsurance premium income. Lower net underwriting income from the Non-life foreign business resulted mainly from the unfavorable claims development for past underwriting years from an Agriculture treaty, partially negated by impact of sliding commissions.

Reinsurance premium income

Reinsurance premium income amounted to P1,081.7 million, higher by P128.5 million or 13% than the first quarter of 2024. Higher reinsurance premium income resulted from higher premiums generated mainly from a certain group treaty and a new foreign treaty under the Life business. This was partially negated by (1) Lower reinsurance premium income from Agriculture treaties under the Non-life foreign business; (2) Higher experience refund from the Life business; and (3) Lower net premiums retained from Non-life domestic business.

Claims and claims reserves – net

Claims and claims reserves – net amounted to P583.1 million, lower by P29.1 million or 5% than the first quarter of 2024 resulting to claims ratios of 54% in 2025 versus 64% in 2024, relative to earned premiums.

Lower claims ratio in 2025 resulted mainly from favorable claims development from the Non-life domestic business. This was partially negated by the unfavorable claims development from a foreign Agriculture treaty.

Commissions – net

Commissions – net amounted to P170.6 million, lower by P18.4 million or 10% than the first quarter of 2024 resulting to commission ratios of 16% in 2025 versus 20% in 2024, relative to earned premiums.

Lower commission ratio resulted mainly from (1) Favorable change in the sliding commission costs of an Agriculture treaty from Non-life foreign business due to unfavorable claims development; and (2) Lower commissions incurred from Non-life domestic business resulting mainly from the increase in the quota share retrocession arrangement where the overriding commission income partially negated the commissions incurred. These were partially negated by higher acquisition costs incurred from a new foreign treaty under the Life business.

Other underwriting expense amounted to P101.9 million in 2025 resulting from the costs incurred under a group life treaty that participates in a pooling arrangement.

Investment and other income and expenses – net amounted to P117.5 million, lower by P48.0 million or 29% than the first quarter of 2024.

This resulted mainly from (1) Foreign exchange losses recognized in 2025 as compared to the foreign exchange gains in 2024; and (2) Lower fair value gains from held-for-trading securities for the current period. These were partially negated by (1) Higher interest income from government securities; and (2) Gain on sale of available-for-sale financial assets in 2025 as compared to loss on sale in 2024.

Tax expense amounted to P64.9 million, higher by P22.1 million or 52% than the first quarter of 2024 resulting mainly from higher net underwriting income for the current period.

Cash and cash equivalents amounting to P601.2 million as at March 31, 2025 increased by P151.5 million or 34% from the balance as at December 31, 2024 of P449.7 million. The increase in the balance resulted mainly from the collection of reinsurance balances receivable and interest from fixed income securities, partially negated by the net acquisition of AFS financial assets (acquisitions net of disposals) and settlement of reinsurance balances payable during the period.

Reinsurance balances receivable – net amounting to P5,009.9 million as at March 31, 2025 decreased by P370.0 million or 7% from the balance as at December 31, 2024 of P5,379.9 million. The decrease in the balance resulted mainly from collections during the period, partially negated by the accrual of reinsurance premiums, net of commissions from Non-life foreign and Life businesses.

Held-for-trading (HFT) securities amounting to P491.4 million as at March 31, 2025 increased by P43.4 million or 10% from the balance as at December 31, 2024 of P448.0 million. The increase in the balance resulted mainly from the net acquisition amounting to P40.9 million (acquisitions net of disposals).

Available-for-sale (AFS) financial assets amounting to P5,843.1 million as at March 31, 2025 increased by P563.4 million or 11% from the balance as at December 31, 2024 of P5,279.7 million. The movement in the account balance can be explained by the following:

	2025	2024
Cost		
Balance at beginning of period	P5,248.7	P5,318.0
Acquisitions	880.3	2,144.3
Disposals/maturities	(317.3)	(2,216.2)

Changes in fair value	14.1	2.6
Fair value (gains) losses on disposal	(0.5)	24.0
Impairment losses	–	22.2
	44.6	31.0
Balance at end of period	P5,843.1	P5,279.7

The increase in the balance resulted mainly from the net acquisitions of fixed income and equity securities amounting to P562.5 million.

Deferred reinsurance premiums amounting to P581.4 million as at March 31, 2025 decreased by P66.3 million or 10% from the balance as at December 31, 2024 of P647.7 million. The decrease in the balance resulted mainly from the amortization of deferred reinsurance premiums related to the Company's excess of loss facility which runs from the second quarter of 2024 to the first quarter of 2025.

Deferred tax assets – net amounting to P544.7 million as at March 31, 2025 decreased by P37.6 million or 6% from the balance as at December 31, 2024 of P582.3 million. The decrease in the balance resulted mainly from lower accrued acquisition cost as at balance sheet date.

Other assets – net amounting to P138.7 million as at March 31, 2025 increased by P22.6 million or 19% from the balance as at December 31, 2024 of P116.1 million. The increase in the balance mainly pertains to the acquisition of system solution for the adoption of PFRS 17 in 2027.

Accounts payable and accrued expenses amounting to P366.0 million decreased by P21.9 million or 6% as at March 31, 2025 from the balance as at December 31, 2024 of P387.9 million. The decrease in the balance resulted mainly from the settlements during the period.

V. MATERIAL EVENT/S AND UNCERTAINTIES:

Other than the disclosure described in the preceding sections, the Company has nothing to report on the following:

1. Any known trends, demands, commitments, events or uncertainties that will have a material impact on its liquidity.
2. Events that will trigger direct or contingent financial obligation that is material to the company, including any default or acceleration of an obligation.

3. Material off balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the Company with unconsolidated entities or other persons created during the reporting period.
4. Any material commitments for capital expenditures.
5. Any known trends, events or uncertainties that have had or that are reasonably expected to have a material favorable or unfavorable impact on net sales/revenues/income from continuing operations.
6. Any significant elements of income or loss that did not arise from the issuer's continuing operations.
7. Any seasonal aspects that had a material effect on the financial condition or results of operations.

VI. FINANCIAL RISK DISCLOSURE

The Company's investments are regulated under the pertinent provisions of the Amended Insurance Code, otherwise known as Republic Act (R.A.) 10607. The Amended Insurance Code generally requires all insurance companies to obtain prior approval of the Insurance Commission (IC) for any and all investments. Further, the Company reports all investments made and sold during the previous month to the IC. The IC reviews these investment reports and may require the immediate sale or disposal of any investment found to be too risky.

A portion of the Company's funds is invested in equities. Section 207 of the Amended Insurance Code provides that insurance companies may invest in listed equities of other financial institutions without need of prior approval by the Commissioner. Beyond the provisions of the Amended Insurance Code, the Company, through its Investment Committee, has established additional guidelines to manage the risk inherent in equity investments. The Company's own investment policy requires that the Company invest only in shares of common stock of companies that are listed on the Philippine Stock Exchange. Furthermore, these listed companies must have profitable business operations and market capitalization are on a scale that would qualify them as blue chips.

The Company also invests in fixed income securities in which it attempts to manage interest rate risk by managing the duration and average maturity of its fixed income portfolio. Asset-liability duration mismatches are evaluated based on the team's outlook on interest rates vis-a-vis the duration of the Company's liabilities. The fixed income portfolio is structured such that maturity profiles align with funding needs. Moreover, investments in fixed income securities are limited only to securities issued by entities of undisputedly strong creditworthiness and to those instruments have active secondary markets to allow transparent valuation and easier liquidation as needed.

A certain portion of the Company's investments is in foreign currencies, particularly the U.S. Dollar. These investments are monitored closely and are limited largely to dollar-denominated obligations backed by the full faith and credit of the Republic of the Philippines (ROP's). Foreign currency denominated investments are reported to the BSP on a monthly basis for monitoring.

VII. OTHER DISCLOSURE

Pursuant to SEC Memorandum Circular No. 8 (Series of 2016) provides guidance to non-bank financial institutions that are covered by Foreign Account Tax Compliance Act (FATCA) regulations, the Company is still evaluating/assessing the potential effects of FATCA to its business. Based on the regulation, the Company is a 'Non-financial foreign Entity' (NFFE) may either be an "exempt NFFE" or "non-exempt NFFE". Under the regulations also, excepted NFFEs such as publicly traded corporations are generally exempt from withholding tax as required by FATCA if a proper FATCA certification is provided to the payor.

The Bureau of Internal Revenue (BIR) advised all concerned Philippine Financial Institutions to take necessary steps to prepare for full implementation of the Inter-Governmental Agreement (IGA) on FATCA between the Philippines and the United States of America was signed on July 13, 2015. On December 01, 2016 President Duterte ratified the FATCA agreement and its transmitted to the Senate on December 06, 2016 for concurrence.

NATIONAL REINSURANCE CORPORATION OF THE PHILIPPINES
NOTES TO FINANCIAL STATEMENTS
(Amounts in thousands)

1. CORPORATE INFORMATION

National Reinsurance Corporation of the Philippines (the Company) was incorporated on June 7, 1978 by virtue of Presidential Decree No. 1270 (the Decree), as a domestic professional reinsurance firm to provide life and non-life reinsurance capacity to the Philippines and neighboring insurance markets. Under the Decree, it became the vehicle for the Philippine insurance industry's participation in the Asian Reinsurance Corporation (ARC), a multi-government-initiated reinsurance entity, based in Bangkok, Thailand, which was established to foster regional cooperation among insurance companies doing business in Asia. The Company's shares are listed in the Philippine Stock Exchange (PSE).

The Company is licensed by the Insurance Commission (IC) to engage in business until December 31, 2027.

The Company's registered office and principal place of business is located at 31st floor BPI-Philam Life Makati, 6811 Ayala Avenue, Makati City.

2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The material accounting policies that have been used in the preparation of these financial statements are consistent with those followed in the preparation of the Company's financial statements as at and for the year ended December 31, 2024, as summarized below and in the succeeding pages.

2.1 Basis of Preparation of Financial Statements

(a) Statement of Compliance with Philippine Financial Reporting Standards

The accompanying interim condensed financial statements of the Company have been prepared in accordance with Philippine Accounting Standards (PASs) 34, *Interim Financial Reporting*. Accordingly, the condensed financial statements do not include all the information and disclosures required in the December 31, 2024 audited financial statements and should be read in conjunction with the Company's audited financial statements as at and for the year ended December 31, 2024.

(b) Basis of Measurement

The interim condensed financial statements have been prepared using the measurement bases specified by Philippine Financial Reporting Standards (PFRS) for each type of asset, liability, income, and expense. The measurement bases are more fully described in the accounting policies that follow.

(c) *Presentation of Financial Statements*

The financial statements are presented in accordance with PAS 1, *Presentation of Financial Statements*. The Company presents the statement of comprehensive income in two statements: a statement of income and a statement of comprehensive income. The Company presents the statement of financial position in order of liquidity.

(d) *Functional and Presentation Currency*

These interim condensed financial statements are presented in Philippine peso, the Company's functional and presentation currency, and amounts are presented in thousands except when otherwise indicated.

Items included in the interim condensed financial statements of the Company are measured using its functional currency. Functional currency is the currency of the primary economic environment in which the entity operates.

2.2 Adoption of New and Amended PFRS Accounting Standards and Framework

(a) *Effective in 2025 that are Relevant to the Company*

As at March 31, 2025, there are no new and amended PFRS Accounting Standards that are relevant to the Company.

(b) *Effective Subsequent to 2025 but not Adopted Early*

There are new and amended PFRS Accounting Standards effective for annual periods subsequent to 2025, which were adopted by the Philippine Financial and Sustainability Reporting Standards Council (FSRSC). The Company is still assessing the impact of the new standards on the Company's financial statements.

- PFRS 9, *Financial Instruments* (2014) (adoption deferred to January 1, 2027). This new standard on financial instruments will replace PAS 39, *Financial Instruments* and PFRS 9 (2009, 2010 and 2013 versions).

PFRS 9 is effective for the annual periods beginning on or after January 1, 2018. However, the Company has met the relevant criteria and has applied the temporary exemption from PFRS 9 for annual reporting periods before January 1, 2027. Consequently, the Company will apply PFRS 9 for the first time on January 1, 2027.

The classification of financial assets under PFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. PFRS 9 includes three principal measurement categories for financial assets - measured at amortized cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL) - and eliminates the previous PAS 39 categories of loans and receivables, AFS financial assets and HTM securities.

In accordance with the financial asset classification principle of PFRS 9, a financial asset is classified and measured at amortized cost if the asset is held within a business model whose objective is to hold financial assets to collect the contractual cash flows that represent solely payments of principal and interest (SPPI) on the principal outstanding. Further, a financial asset whose objective is to both collect contractual cash flows and sell the financial assets is classified and subsequently measured at FVOCI.

All other financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. In addition, on initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Moreover, PFRS 9 allows entities to make an irrevocable election to present subsequent changes in the fair value of an equity instrument that is not held for trading in other comprehensive income. The election is made on an instrument-by-instrument basis.

The accounting for embedded derivatives in host contracts that are financial assets is simplified by removing the requirement to consider whether or not they are closely related, and, in most arrangements, does not require separation from the host contract.

For liabilities, the standard retains most of the PAS 39 requirements which include amortized cost accounting for most financial liabilities, with bifurcation of embedded derivatives. The amendment also requires changes in the fair value of an entity's own debt instruments caused by changes in its own credit quality to be recognized in other comprehensive income rather than in profit or loss.

The Company has completed its initial operational gap assessment, drafting the PFRS 9 accounting policies and enhancement of the affected systems. The Company plans to select the Retrospective approach without restatement and as of date, the actual impact of applying the PFRS 9 on the financial statements is not known and cannot be reasonably estimated until the transition stage is reached. The Company will disclose both the qualitative and quantitative information regarding the impact of PFRS 9 before its adoption.

The following table provides an overview of the fair values as at March 31, 2025 and the amounts of change in the fair values during the reporting period separately for financial assets that meet the SPPI criterion (i.e. financial assets with contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, excluding any financial asset that meets the definition of held for trading in PFRS 9, or that is managed and whose performance is evaluated on a fair value basis) and all other financial assets:

	<i>Notes</i>	Financial assets that meet the SPPI criteria*		All other financial assets	
		Fair Value	Fair value change during the reporting period	Fair Value	Fair value change during the reporting period
Cash and cash equivalents	4	P601,159	P–	P–	P–
AFS financial assets	7	–	–	5,843,113	14,075
HTM securities	8	3,851,159	(18,001)	–	–

		P4,838,295	(P18,001)	P5,843,113	P14,075

* Excluding any financial asset that meets the definition of held for trading in PFRS 9, or that is managed and whose performance is evaluated on a fair value basis.

The table below provides information regarding the credit risk exposure of the Company's financial assets as at March 31, 2025 by classifying assets according to the Company's credit grading of counterparties.

	<i>Notes</i>	Neither Past Due nor Impaired		Past Due but not Impaired	Impaired	Total
		Investment High Grade	Non-investment Grade

The Company uses a credit grading system based on the borrowers and counterparties overall credit worthiness, as described below.

Investment High Grade – This pertains to accounts with a very low probability of default as demonstrated by the borrower's strong financial position and reputation. The borrower has the ability to raise substantial amounts of funds through credit facilities with financial institutions. The borrower has a strong debt service record and a moderate use of leverage.

Non-investment Grade – Satisfactory – This pertains to current accounts with no history of default or which may have defaulted in the past, but the conditions and circumstances directly affecting the borrower's ability to pay has abated already. The borrower is expected to be able to adjust to the cyclical downturns in its operations. Any prolonged adverse economic conditions would however ostensibly create profitability and liquidity issues. The use of leverage may be above industry or credit standards but remains stable.

Past Due but not Impaired – Rating given to borrowers and counterparties where outstanding obligation is already past due without impairment indicator.

Impaired – This pertains to accounts with impairment indicator and uncertain collectability. Allowance for impairment losses were recognized by the Company for these accounts.

- PFRS 17, *Insurance Contracts* (adoption deferred to January 1, 2027). The new standard will eventually replace PFRS 4, that will set out the principles for the recognition, measurement, presentation and disclosure of insurance contracts within its scope.

PFRS 17 introduces a new approach that:

- (a) combines current measurement of the future cash flows with the recognition of profit over the period services are provided under the contract;
- (b) presents insurance service results (including presentation of insurance revenue) separately from insurance finance income or expenses; and
- (c) requires an entity to make an accounting policy choice portfolio-by-portfolio of whether to recognize all insurance finance income or expenses for the reporting period in profit or loss or to recognize some of that income or expenses in other comprehensive income.

Under PFRS 17, groups of insurance contracts are measured based on fulfilment cash flows, which represent the risk-adjusted present value of the entity's rights and obligations to the policy holders, and a contractual service margin, which represents the unearned profit the entity will recognize as it provides services over the coverage period. Subsequent to initial recognition, the liability of a group of insurance contracts represents the liability for remaining coverage and the liability for incurred claims, with the fulfilment cash flows remeasured at each reporting date to reflect current estimates. Simplifications or modifications to the general measurement model apply to groups of insurance contracts measured using the 'premium allocation approach' and reinsurance contracts held.

PFRS 17 brings greater comparability and transparency about the profitability of new and in-force business and gives users of financial statements more insight into an insurer's or reinsurer's financial health. Separate presentation of underwriting and financial results will give added transparency about the sources of profits and quality of earnings.

On December 15, 2021, the FSRSC amended the mandatory effective date of PFRS 17 from January 1, 2023 to January 1, 2025. This is consistent with Circular Letter No. 2020-62 issued by the IC which deferred the implementation of PFRS 17 by two (2) years after its effective date as decided by the International Accounting Standards Board (IASB). On March 10, 2025, IC issued CL No. 2025-04 which set a new effectivity date of the standard to January 1, 2027. Early application is permitted.

Full retrospective application is required, unless it is impracticable, in which case the entity chooses to apply the modified retrospective approach or the fair value approach. However, if the entity cannot obtain reasonable and supportable information necessary to apply the modified retrospective approach, then it applies the fair value approach. There is also a transition option allowing presentation of comparative information about financial assets using a classification overlay approach on a basis that is more consistent with how PFRS 9 will be applied in future reporting periods. Early application is permitted for entities that apply PFRS 9 on or before the date of initial application of PFRS 17.

The Company has completed its initial operational gap assessment and drafting of the PFRS 17 accounting policies. The Company plans to finalize these policies once it is able to fully determine the impact on the underlying reinsurance contracts. Further, the Company has acquired the necessary systems required to comply with the reporting requirements of PFRS 17 while the affected employees have already started the required trainings to use the system.

The Company has determined that its reinsurance and retrocession contracts have no distinct non-insurance components thus treated as single contracts. However, the detailed financial gap assessment arising from the application of the new standard is yet to be performed by management. As of date, the actual impact of applying the PFRS 17 on the financial statements, including the impact on the Company's net worth, in the period of initial application is not known and cannot be reasonably estimated because it is dependent on the final accounting elections and judgements that will be incorporated in the accounting policies and future economic conditions.

- PFRS 18, *Presentation and Disclosure in Financial Statements* replaces PAS 1, which sets out presentation and base disclosure requirements for financial statements. The changes, which mostly affect the income statement, include the requirement to classify income and expenses into three new categories – operating, investing and financing – and present subtotals for operating profit or loss and profit or loss before financing and income taxes.

Further, operating expenses are presented directly on the face of the income statement – classified either by nature, by function or using a mixed presentation. Expenses presented by function require more detailed disclosures about their nature.

PFRS 18 also provides enhanced guidance for aggregation and disaggregation of information in the financial statements, introduces new disclosure requirements for management-defined performance measures (MPMs) and eliminates classification options for interest and dividends in the statement of cash flows.

The amendments will apply retrospectively for annual reporting periods beginning on or after January 1, 2027, with earlier application permitted. Management is still assessing the impact of this new standard on the Company's financial statements.

2.3 Reinsurance Contracts

Product Classification

Reinsurance contracts are those contracts under which the Company (the reinsurer) has accepted significant insurance risk from insurance and reinsurance companies (the cedants) by agreeing to compensate the cedants if a specified uncertain future event (the insured event) adversely affects the cedants. As a general guideline, the Company determines whether it has significant insurance risk, by comparing benefits paid when an insured event occurs with benefits payable if the insured event did not occur.

Reinsurance contracts can also transfer financial risks. Contracts that transfer financial risks which create financial assets or financial liabilities, but do not expose the Company to significant insurance risk, are within the scope of PAS 39 and are recognized as Deposit liability under Accounts payable and accrued expenses.

Once a contract has been classified as reinsurance contract, it remains a reinsurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during the period, unless all rights and obligations are extinguished or expired.

Retrocession Contracts Held

Contracts entered into by the Company with retrocessionaires under which the Company is compensated for losses on one or more contracts issued by the Company and that meet the classification requirements for reinsurance contracts above are classified as retroceded contracts held. Contracts that do not meet those classification requirements are classified as financial assets.

Reinsurance recoverable on paid claims are included as part of Reinsurance balances receivable. These balances represent the retrocessionaires' share in the amounts paid to the cedants and are in accordance with the retroceded contract. Reinsurance recoverable on unpaid claims represents balances due from retrocessionaires for its share on the unpaid claims and Reinsurance recoverable on claims reserves represent the retrocessionaires' share for its losses in the claims reserves are both presented under Reinsurance recoverable on reported claims and claims reserves – net in the statements of financial position. The recoverable amounts are estimated in a manner consistent with the claims and claims reserves and are in accordance with the retroceded contract.

Reinsurance balances receivable, Reinsurance recoverable on reported claims and claims reserves are reviewed for impairment at the end of each reporting period or more frequently when an indication of impairment arises during the reporting year. Impairment occurs when objective evidence exists that the Company may not recover outstanding amounts under the terms of the contract and when the impact on the amounts that the Company will receive from the cedants and retrocessionaires can be measured reliably.

The impairment loss is recognized as part of General and administrative expenses in the statements of income.

Retroceded insurance risk does not relieve the Company from its obligations to ceding companies.

Reinsurance balances payable primarily represent premiums due to retrocessionaires. Amounts payable are estimated in a manner consistent with the associated retrocession contract.

Assets and liabilities arising from reinsurance activities are derecognized when the contractual rights are extinguished or expired or when the contract is transferred to another party.

Receivables and Payables Related to Reinsurance Contracts and Retrocession Contracts Held

Financial assets and financial liabilities arising from reinsurance and retrocession contracts held are offset and the resulting net amount is reported in the statements of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously. The right to offset must be available at the end of the reporting period, that is, it is not contingent on future event. It must also be enforceable in the normal course of business, in the event of default, and in the event of insolvency or bankruptcy; and must be legally enforceable for both entity and all counterparties to the financial instruments.

2.4 Financial Assets

Financial assets are recognized when the Company becomes a party to an agreement and agrees to sell goods or services for a fixed amount of money. Purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace are recognized on the trade date, i.e., the date that the Company commits to purchase the asset.

For purposes of classifying financial assets, an instrument is considered as an equity instrument if it is non-derivative and meets the definition of equity for the issuer in accordance with the criteria of PAS 32, *Financial Instruments: Presentation*. All other non-derivative financial instruments are treated as debt instruments.

(a) Classification and Measurement of Financial Assets

Financial assets other than those designated and effective as hedging instruments are classified into the following categories: loans and receivables, financial assets at FVTPL, AFS financial assets and HTM securities. Financial assets are assigned to the different categories by management on initial recognition, depending on the purpose for which the investments were acquired.

Financial assets are recognized initially at fair value of the consideration given. Except for financial assets at FVTPL, the initial measurement of financial assets includes transaction costs.

(i) *Loans and Receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These arise when the Company provides money or services directly to a debtor with no intention of trading the receivables.

The Company's financial assets categorized as loans and receivables are presented as cash and cash equivalents, reinsurance balances receivable – net, loans and receivables, reinsurance recoverable on reported claims and claims reserves – net, and other investments.

Loans and receivables are subsequently measured at amortized cost using the effective interest method subject to any impairment loss. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. The amortization, if any, is included as part of Interest income presented under Investment and other income and expenses – net account in the statements of income.

(ii) *Financial assets at FVTPL*

This category consists of financial instruments that are held-for-trading or designated by management on initial recognition. Financial assets at FVTPL are recorded in the statements of financial position at fair value, with changes recorded in the Investment and other income and expenses - net account in the statements of income.

HFT securities are not reclassified subsequent to their initial recognition, unless they are no longer held for the purpose of being sold or repurchased in the near term and the following conditions are met:

- if the financial asset would have met the definition of loans and receivables (if the financial asset had not been required to be classified as held-for-trading at initial recognition), then it may be reclassified if the Company has the intention and the ability to hold the financial asset in the foreseeable future or until maturity; and
- the financial asset may be reclassified out of the held-for-trading securities category only under “rare circumstances”.

As at March 31, 2025 and December 31, 2024, the Company does not have any financial asset designated by management as financial instruments at FVTPL. The Company's HFT securities consist of Unit Investment Trust Fund (UITF) and equity securities listed in the PSE.

(iii) *AFS Financial Assets*

This category includes non-derivative financial assets that are designated as AFS financial assets or are not classified as loans and receivables, HTM securities or financial assets at FVTPL. The Company's AFS financial assets include listed and unlisted equity securities and government and corporate bonds.

All financial assets within this category are subsequently measured at fair value, except for certain equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured which are measured at cost less any impairment loss. Fair value gains and losses are recognized in other comprehensive income and are reported as part of the Revaluation reserves account in the equity except for interest and dividend income, impairment losses and foreign exchange differences on monetary assets, which are recognized in the statements of income.

(iv) *HTM securities*

This category includes non-derivative financial assets with fixed or determinable payments and fixed maturity, and that the Company has the intention and ability to hold to maturity other than: (a) those that Company designates as financial assets at FVTPL upon initial recognition; (b) those that the Company designates as AFS; and (c) those that meet the definition of loans and receivables. This category includes corporate bonds and government securities.

HTM securities are subsequently measured at amortized cost using the effective interest method subject to any impairment loss. Interest income is recognized under Investment and other income and expenses – net account in the statements of income.

(b) *Impairment of Financial Assets*

The Company assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired.

The Company recognizes impairment loss based on the category of financial assets as follows:

(i) *Carried at Amortized Cost – Loans and Receivables and HTM Securities*

If there is objective evidence that an impairment loss on financial assets carried at cost has been incurred, the amount of the impairment loss is determined as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred), discounted at the financial asset's original effective interest rate or current effective interest rate determined under the contract if the loan has a variable interest rate.

Evidence of impairment is the age of the receivable and/or any financial difficulties of the counterparty. Allowances are set up on the net balance, meaning all balances related to the same counterparty are considered. The amount of the allowance is set up in relation to the time a receivable has been due and any financial difficulties of the counterparty and can be as high as the outstanding net balance.

The carrying amount of the asset shall be reduced either directly or through the use of an allowance account. The amount of the loss shall be recognized in the statements of income.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment is recognized (such as an improvement in the debtor's credit rating), the previously recognized impairment loss is reversed by adjusting the allowance account. The reversal shall not result in a carrying amount of the financial asset that exceeds what the amortized cost would have been had the impairment not been recognized at the date of the impairment is reversed. The amount of the reversal is recognized in the statements of income.

Reclassification of AFS Financial Assets to HTM Securities

For a financial asset reclassified from AFS financial assets category to HTM securities, the Company shall reclassify the financial asset at its fair value on the date of reclassification which becomes its new amortized cost. Any previous gain or loss on that asset that has been recognized in other comprehensive income and any difference between the new amortized cost and maturity amount is amortized in profit or loss over the remaining life of the investments using the effective interest method similar to the amortization of a premium and a discount. This is presented as Revaluation reserves – HTM securities in the statements of changes in equity. If the financial asset is subsequently impaired, any gain or loss that has been recognized in other comprehensive income is reclassified from equity to profit or loss.

(ii) *Carried at Fair Value – AFS Financial Assets*

When a decline in the fair value of an AFS financial asset has been recognized in other comprehensive income and there is objective evidence that the asset is impaired, the cumulative loss – measured as the difference between the acquisition cost (net of any principal repayment and amortization) and current fair value, less any impairment loss on that financial asset previously recognized in statements of income – is reclassified from Revaluation reserves to statements of income as a reclassification adjustment even though the financial asset has not been derecognized.

Impairment losses recognized in statements of income on equity instruments are not reversed through profit or loss. Reversal of impairment losses is recognized in other comprehensive income, except for financial assets that are debt securities which are recognized in profit or loss only if the reversal can be objectively related to an event occurring after the impairment loss is recognized.

(c) *Items of Income and Expense Related to Financial Assets*

All income and expenses, except for recognition and reversal of impairment loss on reinsurance balances receivable and reinsurance recoverable on reported claims, relating to financial assets that are recognized in the statements of income are presented as part of Investment and other income and expenses – net account. If the provision is higher than the reversal of impairment losses on reinsurance balances receivable and reinsurance recoverable on reported claims, this is presented at net as part of Impairment losses under General and administrative expenses account in the statements of income. If the reversal of impairment losses is higher than the provision for reinsurance balances receivable and reinsurance recoverable on reported claims, this is presented at net as part of Other income under Investment and other income and expenses – net account.

Non-compounding interest, dividend income and other cash flows resulting from holding financial assets are recognized in the statements of income when earned, regardless of how the related carrying amount of financial assets is measured.

(d) Derecognition of Financial Assets

The financial assets (or where applicable, a part of a financial asset or part of a group of financial assets) are derecognized when the contractual rights to receive cash flows from the financial instruments expire, or when the financial assets and all substantial risks and rewards of ownership have been transferred to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

(e) Fair Value Measurement of Financial Assets

‘Fair value’ is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

When one is available, the Company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as ‘active’ if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Company uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

If an asset measured at fair value has a bid price, then the Company measures assets and long positions at a bid price.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price – i.e. the fair value of the consideration given or received. If the Company determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognized in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

2.5 Deferred Acquisition Costs (DAC)

The Company incurs costs in connection with acquiring new and renewal reinsurance business. Some of these costs, which consist primarily of commissions, are deferred as these are directly related to the successful acquisition of such business and amortized based on the type of contract. This is accounted as Deferred acquisition costs (DAC) under the Asset section in the statements of financial position. DAC are assessed for recoverability in the year of policy issue to ensure that these costs are recoverable out of the estimated future margins to be earned on the policy. DAC are assessed for recoverability at least annually thereafter.

DAC is recognized as an expense over the coverage period of the policy using the 24th method [see Note 2.14(b)] except for DAC from modified co-insurance arrangements. For modified co-insurance arrangements, DAC is amortized over the expected life of the contracts in which the related premiums are earned. The net change in the account between each end of reporting periods are recognized as part of Commission expense under Commissions – net account in the statements of income.

2.6 Deferred Reinsurance Premiums (DRP)

The ceded reinsurance premiums that pertain to the unexpired period of the contracts at the end of the reporting period are accounted for as DRP and presented in the Assets section of the statements of financial position. Subsequent to initial recognition, the amount is amortized using the 24th method [see Note 2.13(a)]. The net change in the account between each end of reporting periods are recognized in the statements of income under Movement in premium reserves – net.

2.7 Reinsurance Recoverable on Reported Claims and Claims Reserves

Reinsurance recoverable on reported claims and claims reserves represent the amount recoverable from retrocessionaires under retroceded contracts as their share on unpaid claims and unreported claims and loss adjustment expenses, net of salvage of recoveries.

2.8 Other Assets

Other assets pertain to other present economic resources controlled by the Company as a result of past events. An economic resource is a right that has the potential to produce economic benefits and the asset has a cost or value that can be measured reliably.

This include intangible assets which are composed of acquired software licenses which are accounted for under the cost model. Capitalized costs are amortized on a straight-line basis over five years as the lives of these intangible assets are considered finite. The Company estimates the useful lives of intangible assets based on the period over which assets are expected to be available for use. The estimated useful lives are reviewed periodically and are updated if expectations differ from previous estimates due to technical or commercial obsolescence and legal or other limits on the use of the assets.

2.9 Financial Liabilities

The Company classifies its financial liabilities at initial recognition into the following categories: financial liabilities at FVTPL and other liabilities. The Company determines the classification of its financial liabilities at initial recognition, and were allowed and appropriate, re-evaluates such designation at every reporting date.

Other financial liabilities pertain to financial liabilities that are not designated or classified at FVTPL. Other financial liabilities are initially measured at their fair value and subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in the statements of income.

The Company's other financial liabilities include Reinsurance balances payable, Claims and claims reserves (excluding Margin for Adverse Deviation (MfAD) and loss adjustment expenses) and Accounts payable and accrued expenses (excluding taxes payable, defined benefit liability and other taxes payable), are recognized when the Company becomes a party to an agreement and agrees to purchase goods or services for a fixed amount of money. All interest-related charges are recognized as part of Investment and other income and expenses – net account in the statements of income.

Dividend distributions to shareholders are recognized as financial liabilities upon declaration by the Company.

Financial liabilities are derecognized from the statements of financial position only when the obligations are extinguished either through discharge, cancellation or expiration. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, with the difference in the respective carrying amounts recognized in the statements of income.

Derivative financial instruments are classified under financial assets and financial liabilities at FVTPL when there is an agreement to settle both assets and liabilities independently. Derivative financial instruments are classified under financial assets or financial liabilities when there is an agreement to settle at net. Derivatives are initially recorded at fair value on the date at which the derivative contract is entered into and are subsequently remeasured at fair value. Any gains or losses arising from changes in fair values of derivatives (except those accounted for as cash flow hedges) are taken directly to the statements of income and are included in Investment and other income and expenses – net account (see Note 21).

The Company's outstanding derivative liability arising from forward contracts is presented under Forward liability account in the statement of financial position (see Note 16).

2.10 Claims and Claims Reserves

Claims represent the present value of the estimated cost of all reported claims at the end of the reporting period, together with related claims handling costs and reduced for the expected value of salvage and other recoveries. This includes outstanding claims reserves, loss adjustment expenses payable plus MfAD based on a certain percentage of the total outstanding claims reserves and loss adjustment expenses payable to allow for inherent uncertainty of the best estimate of the policy reserves.

Claims reserves represent the estimated ultimate cost of all incurred but not reported claims (IBNR), including incurred but not enough reported claims plus MfAD at the end of the reporting period. Claims reserves are measured on a discounted basis, using actuarial estimates of historical claims expense, adjusted for current trends and conditions. These estimates are continually reviewed and the ultimate liability may vary significantly from the amount recognized, which are reflected in claims payable in the statement of financial position in the period in which they are determined.

2.11 Premium Reserves

Premium reserves refer to unearned premium reserves (UPR) plus any deficiency resulting from the liability adequacy test.

UPR refers to the portion of the premiums attributable to the unexpired risks at the balance sheet date and is recognized as revenue over the coverage period of the contracts using the 24th method [see Note 2.13(a)].

Liability Adequacy Test

Liability adequacy tests are performed at end of each reporting period, to ensure the adequacy of premium reserves. The test is performed by comparing the UPR, net of related DAC, and the present value of the current best estimates of future cash flows including claims handling and policy administration expenses. Any deficiency is charged to the statements of income and is recognized as premium reserves.

2.12 Deferred Reinsurance Commissions (DRC)

Commissions earned from retrocession contracts are recognized as revenue over the coverage period of the contracts using the 24th method [see Note 2.13(c)]. The portion of the commissions that relates to the unexpired periods of the contracts at end of the reporting period is accounted for as Deferred reinsurance commissions and is presented in the Liabilities section of the statements of financial position. The net change in the account between each end of reporting periods are recognized as Commission income under Commissions – net in the statements of income.

2.13 Revenue and Income Recognition

Revenue is recognized only when (or as) the Company satisfies a performance obligation by transferring control of the promised services to the customer. Expenses and costs, if any, are recognized in the statement of income (loss) upon utilization of the resources or services or at the date these are incurred. All finance costs are reported on an accrual basis.

The Company's significant revenues pertain to net reinsurance premiums and investment income which are accounted for by the Company in accordance with PFRS 4 and PAS 39, respectively. The Company also earns other income from sale of non-financial assets, which is recognized as income once the Company transferred the goods. These are accounted for by the Company in accordance with relevant accounting standards.

The following provides information about the specific recognition criteria of revenues recognized in accordance with PFRS 4 and PAS 39:

Net underwriting income includes reinsurance premiums, retroceded premiums and commissions describe as follows:

- (a) *Reinsurance premiums* – Reinsurance premiums are recognized as revenue when the Company enters into a contract with cedants assuming insurance risks in exchange for reinsurance premium. Reinsurance premiums include premiums reported by cedants and accrued premiums. The Company records accrued premiums on a cedant-by-cedant basis taking into consideration the terms of the reinsurance treaty, historical experience and latest information from cedants.

Reinsurance premiums are recognized over the coverage period of the contracts using the 24th method. The 24th method assumes that the average date of issue of all contracts written during any one month is the middle of that month. Accordingly, 1/24th of the net premiums are considered earned in the month the reinsurance contracts are issued and 2/24th for every month thereafter (or 1/24th for every 15-day period after the issue month). While for specific agriculture treaty contracts where the underlying risk relates to the crops cultivated within India, the Company recognize the earned premium during the harvest period. The portion of the gross reinsurance premiums that relates to the unexpired periods of the contracts at the end of the reporting period is accounted for as Premium reserves and is presented in the Liabilities section of the statements of financial position while the portion of the retroceded reinsurance premiums that relates to the unexpired periods of the contracts at the end of the reporting period is accounted for as Deferred reinsurance premiums (see Note 2.6) and is presented in the Assets section of the statements of financial position.

Uncollected premiums net of deferred creditable withholding taxes (CWT) and accrued premiums are recognized as due from ceding companies as part of Reinsurance balances receivable – net in the statements of financial position.

The net changes in the Premium reserves and Deferred reinsurance premiums accounts between the end of the reporting periods are recognized in the statements of income as part of Movement in premium reserves – net.

- (b) *Retroceded premiums* – Retroceded premiums are recognized as an expense when the Company enters into a contract with a retrocessionaire transferring insurance risks to the retrocessionaire in exchange for retroceded premiums. Retroceded premiums include premiums reported to the retrocessionaires and accrued retroceded premiums. The Company records accrued retroceded premiums based on individual retrocession treaties taking into consideration the terms of the treaty, historical experience and latest information relevant to the treaty.
- (c) *Commission on retrocession* – Commission is deferred and is subjected to the same amortization as the retroceded reinsurance premiums (see Note 2.12). Deferred portion is presented in the statements of financial position as Deferred reinsurance commissions.
- (d) *Other underwriting income (expense)* – pertains to the net benefits received or costs incurred from a certain group life treaty participating in a pool arrangement.

Investment and other income and expenses includes interest income, dividend income, gain/loss on sale of non-financial assets and foreign currency gain/loss describe as follows:

- (e) *Interest income* – Interest income for all interest-bearing financial instruments are recognized using the effective interest rate method.
- (f) *Dividend income* – Revenue is recognized when the Company's right to receive the dividend is established.
- (g) *Gain/loss on sale of non-financial assets* – Revenue or expenses is recognized when the risks and rewards of ownership of the investments have passed to the buyer or at a point in time when the control of the non-financial assets transfers to the customer.

Determining whether the Company is Acting as Principal or an Agent

The Company assesses its revenue arrangements against the following criteria to determine whether it is acting as a principal or an agent:

- whether the Company has primary responsibility for providing the services
- whether the Company has discretion in establishing prices; and
- whether the Company bears the credit risk.

If the Company has determined it is acting as a principal, the Company recognizes revenue on gross basis with the amount remitted to the other party being accounted as part of cost and expenses. If the Company has determined it is acting as an agent, only the net amount retained is recognized as revenue.

The Company has determined that it is acting as principal in its revenue arrangements.

2.14 Expense Recognition

Expenses are decreases in economic benefits during the accounting period in the form of outflows or depletions of assets or incurrence of liabilities that result in decrease in equity, other than those relating to distribution to equity participants.

(a) Claims and claims reserves

Claims relating to insurance contracts are recognized when insured events occur. These arise from events that have occurred up to reporting date even if these have not yet been reported to the Company. The claims (including those for IBNR claims) are based on the estimated ultimate cost of settling the claims and are discounted for time value of money. The method of determining such estimates and establishing reserves are continually reviewed and updated.

Claims recoveries are evaluated in terms of the aggregate share of the retrocessionaire on the claims and adjustment expenses of the Company on business retroceded under retrocession arrangements. Recoveries on paid, unpaid claims and claims reserves are recognized in the period the related claims are incurred.

Claims paid, the change in claims and claims reserves and the corresponding share of the retrocessionaires are presented under Claims and claims reserves – net in the statements of income.

(b) Acquisition Costs

Costs that vary with and are primarily related to the acquisition of new and renewal reinsurance contracts, other than those related to modified co-insurance, such as commissions and certain underwriting costs, are recognized as expense over the period of the contracts using the 24th method. Unamortized acquisition costs are presented in the statements of financial position as Deferred acquisition costs (see Note 2.5).

(c) *General and Administrative Expenses*

Costs and expenses are recognized in the statements of income upon utilization of goods or services at the date they are incurred. General and administrative expenses include salaries and employee benefits, taxes related expenses, professional fees and other operational expenses.

2.15 Foreign Currency Transactions and Translation

The accounting records of the Company are maintained in Philippine peso. Foreign currency transactions during the period are translated into the functional currency at exchange rates which approximate those prevailing on transaction dates.

Foreign currency gains and losses resulting from the settlement of such transactions and from the translation at closing exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the statements of income as part of Investment and other income and expenses – net (see Note 21).

2.16 Income Taxes

Tax expense recognized in the statements of income comprises the sum of final tax, current tax and deferred tax not recognized in other comprehensive income or directly in equity, if any.

Current tax assets or liabilities comprise those claims from, or obligations to, fiscal authorities relating to the current or prior reporting period, that are uncollected or unpaid at the end of the reporting period and any adjustment to tax payable in respect of previous years. They are calculated using the tax rates and tax laws applicable to the fiscal periods to which they relate, based on the taxable profit for the year. All changes to current tax assets or current tax liabilities are recognized as a component of tax expense in the statements of income.

Deferred tax is accounted for using the asset-liability method, on temporary differences at the end of the reporting period between the tax base of assets and liabilities and their carrying amounts for financial reporting purposes. Under the asset-liability method, with certain exceptions, deferred tax liabilities are recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences and the carryforward of unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized. Unrecognized deferred tax assets are reassessed at the end of each reporting period and are recognized to the extent that it has become probable that future taxable profit will be available to allow such deferred tax assets to be recovered.

Deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled provided such tax rates have been enacted or substantively enacted at the end of the reporting period.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

The measurement of deferred tax liabilities and deferred tax assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Most changes in deferred tax assets or deferred tax liabilities are recognized as a component of tax expense in the statements of income, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

Deferred tax assets and deferred tax liabilities are offset if the Company has a legally enforceable right to set off current tax assets against current tax liabilities and the deferred taxes relate to the same entity and the same taxation authority.

2.17 Related Party Transactions and Relationships

Related party transactions are transfers of resources, services or obligations between the Company and its related parties, regardless whether a price is charged.

Based on the requirement of SEC Memorandum Circular 2019-10, *Rules on Material Related Party Transactions for Publicly-listed Companies*, transactions amounting to ten percent (10%) or more of the total assets based on the latest audited financial statements that were entered into by the Company with related parties are considered material.

All individual material related party transactions shall be approved by at least two-thirds vote of the board of directors, with at least a majority of the independent directors voting to approve the material related party transactions. In case that a majority of the independent directors' vote is not secured, the material related party transaction may be ratified by the vote of the stockholders representing at least two-thirds of the outstanding capital stock. For aggregate related party transactions within a 12-month period that breaches the materiality threshold of ten percent (10%) of the Company's total assets based on the latest audited financial statements, the same board approval would be required for the transaction(s) that meets and exceeds the materiality threshold covering the same related party.

In considering each possible related party relationship, attention is directed to the substance of the relationship and not merely on the legal form.

2.18 Equity

Capital stock represents the nominal value of shares that have been issued.

Additional paid-in capital includes any premiums received on the initial issuance of capital stock. Any transaction costs associated with the issuance of shares are deducted from additional paid-in capital, net of any related income tax benefits.

Treasury shares are stated at the cost of reacquiring such shares and are deducted from equity attributable to the Company's holders until the shares are cancelled, reissued or disposed of.

Revaluation reserves comprise gains and losses due to the revaluation of AFS financial assets, unamortized fair value gains and losses from HTM securities, and remeasurements of defined benefit plan.

Retained earnings represent all current and prior period results of operations as reported in the statements of income, reduced by the amounts of dividends declared. The appropriated portion of the retained earnings is intended as additional reserve for contingencies (see Note 24.2).

2.19 Earnings Per Share

Basic earnings per share is determined by dividing net profit by the weighted average number of shares issued, adjusted for stock dividends and stock split, less shares held in treasury during the period.

Diluted earnings per share is computed by adjusting the weighted average number of ordinary shares outstanding to assume conversion of dilutive potential shares.

2.20 Segment Reporting

For purposes of segment reporting, the Company does not have other reportable segments. The Company has one reportable business segment which is the reinsurance market. The financial information about the sole business segment is presented in the financial statements.

The management monitors the operating results of its business segment for the purpose of making decisions about resource allocation and performance assessment. The segment performance is evaluated based on operating profit or loss and is measured consistently with the income before income tax in the financial statements.

2.21 Events After the End of the Reporting Period

Any event subsequent to the balance sheet date that provides additional information about the Company's financial position at the end of the reporting period (adjusting event) is reflected in the financial statements. Events subsequent to the balance sheet date that are not adjusting events, if any, are disclosed when material to the financial statements.

3. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the Company's financial statements in accordance with PFRS Accounting Standards requires management to make judgments and estimates that affect the amounts reported in the financial statements and related notes.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may ultimately differ from these estimates.

3.1 Critical Management Judgments in Applying Accounting Policies

In the process of applying the Company's accounting policies, management has made the judgments as presented below and in the succeeding pages, apart from those involving estimation, which have the most significant effect on the amounts recognized in the financial statements.

(a) Impairment of Financial Assets

(i) Financial Assets at Fair Value – AFS Financial Assets

The Company considers that investments are impaired when there has been a significant or prolonged decline in the fair value below their cost. The determination of what is significant or prolonged decline requires judgment. In making this judgment, the Company evaluates among other factors, the normal volatility in share or market price. In addition, impairment may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology, and operational and financing cash flows.

Based on the recent evaluation of information and circumstance affecting the Company's AFS financial assets, management concluded that decline in fair value of certain AFS financial assets amounting to P22.22 million is considered impairment in value as at December 31, 2024 (see Note 7). No impairment was noted as at March 31, 2025. Future changes in those information and circumstance might significantly affect the carrying amount of the assets.

(ii) Financial Assets at Amortized Cost

The Company reviews its financial assets at amortized cost to assess impairment at least on an annual basis, or as the need arises due to significant movements on certain accounts. These financial assets that are individually significant are assessed to determine whether objective evidence of impairment exists on an individual basis, while those that are not individually significant are assessed for objective evidence of impairment either on an individual or on collective basis.

In determining whether an impairment loss should be recorded in the statements of income, the Company makes judgment as to whether there are any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets before the decrease can be identified with an individual financial asset in that portfolio.

As at March 31, 2025 and December 31, 2024, the Company has recognized allowance for impairment loss amounting to P657.22 million and P661.52 million, respectively (see Notes 5 and 11).

(b) Classification of Financial Instruments

The Company exercises judgment in classifying a financial instrument, or its component parts, on initial recognition as a financial asset, financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial asset or liability. The substance of a financial instrument, rather than its legal form, governs its classification in the statements of financial position. In addition, the Company classifies assets by evaluating among others, whether the asset is quoted or not in an active market. Included in the evaluation on whether a financial asset is quoted in an active market is the determination on whether the quoted prices are readily and regularly available and whether those prices represent actual and regularly occurring market transactions on an arm's length basis.

As at March 31, 2025 and December 31, 2024, the Company classified its financial instruments as financial assets at FVTPL, AFS financial assets, HTM securities, loans and receivables, financial liabilities at FVTPL and other financial liabilities.

(c) Recognition of Provisions and Contingencies

Judgment is exercised by management to distinguish between provisions and contingencies. Relevant disclosures are presented in Note 28.

3.2 Key Sources of Estimation Uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next reporting period:

(a) Impairment of Financial Assets Carried at Amortized Cost

Management uses estimates based on historical loss experience for assets with credit risk characteristics. An adequate amount of allowance for impairment is made for specific and groups of accounts, where objective evidence of impairment exists.

The Company evaluates the amount of allowance for impairment based on available facts and circumstances, including, but not limited to, the length of the Company's relationship with the counterparties, the counterparties' current credit status based on known market forces, average age of accounts, collection experience and historical loss experience.

The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

The carrying value of reinsurance balances receivable, reinsurance recoverable on reported claims and the analysis of allowance for impairment on such financial assets are shown in Notes 5 and 11.

The carrying values of HTM securities and loans and receivables are shown in Notes 8 and 9, respectively.

(b) Fair Value Measurement of AFS financial assets

The Company carries certain financial assets at fair value, which requires the extensive use of accounting estimates and judgment. In cases when active market quotes are not available, fair value is determined by reference to the current market value of another instrument which is substantially the same or is calculated based on the expected cash flows of the underlying net base of the instrument. The amount of changes in fair value would differ if the Company utilized different valuation methods and assumptions. Any change in fair value of these financial assets and liabilities would affect profit or loss and other comprehensive income.

The carrying value of the Company's AFS financial assets and the amounts of fair value changes recognized are disclosed in Note 7.

(c) Determination of Realizable Amount of Deferred Tax Assets

The Company reviews its deferred tax assets at each reporting period and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. Any deferred tax asset will be remeasured if it might result to derecognition where the expected tax law to be enacted has a possible risk on the realization.

As at March 31, 2025 and December 31, 2024, the Company recognized net deferred tax assets amounting to P544.75 million and P582.26 million, respectively, as management has assessed that it is probable that sufficient taxable profit will be available to allow the benefit of the deferred tax assets to be utilized. However, unrecognized deferred tax assets amounted to P622.12 million and P546.79 million as at March 31, 2025 and December 31, 2024, respectively.

(d) Valuation of Reinsurance Premiums

Reinsurance premiums include premiums reported by cedants and accrued reinsurance premiums. The Company records accrued premiums based on a cedant-by-cedant basis taking into consideration the terms of the reinsurance treaty, historical experience and latest information from cedants.

The Company's accrued reinsurance premiums were recognized as part of Reinsurance premiums – net of returns in the statements of income.

(e) Valuation of Retroceded Premiums

Retroceded premiums include premiums reported to the retrocessionaires and accrued retroceded premiums. The Company records retroceded premiums based on individual retroceded treaties taking into consideration the terms of the retroceded treaty, historical experience and latest information relevant to the treaty.

The Company's accrued retroceded premiums were recognized as part of Retroceded premiums in the statements of income.

(f) *Valuation of Reinsurance Contract Liabilities*

The Company's Reinsurance contract liabilities are composed of premium liabilities and claim liabilities. Premium liabilities are the premium reserves while claim liabilities are equal to the present value of Claims and claims reserves accounts in the statements of financial position which include outstanding claims, IBNR claims, loss adjustment expenses payable plus the MfAD. Claim liabilities are discounted for the time value of money.

The Company estimates the present value of future cash flows, used in performing the liability adequacy test and in determining claims liabilities, through the use of historical claim experience and claim settlement patterns.

The principal assumption underlying the claim liability estimates is that the Company's future claims development will depend on the estimate of the ultimate loss during a period of time for a particular risk exposure and then estimate the percentage of this ultimate loss that was not reported as of the reporting date.

The Company's claim liability estimates, as ascertained by an independent actuary, are determined by calculating the estimated ultimate losses as the sum of reported claims plus IBNR claims. Ultimate losses were estimated using generally accepted actuarial methods such as the Chain Ladder Method, Bornhuetter-Ferguson Method and the Expected Loss Ratio Method. The Company also included MfAD as a percentage of the total outstanding losses, IBNR best estimate and loss adjustment expenses payable, to allow for inherent uncertainty of the best estimate of the policy reserves.

Additional qualitative judgments are used by the independent actuary to assess the extent to which the full tail of the claim development is influenced by the different factors, for example, changes in market factors such as public attitude to claiming, economic conditions, as well as internal factors such as portfolio mix and policy conditions. Judgment is further used to assess the extent to which external factors such as juridical decisions and government legislation affect the estimates.

As at March 31, 2025 and December 31, 2024, the carrying value of provision for claims reported and IBNR claims are recognized as Claims and claims reserves accounts in the statements of financial position (see Note 18).

The following tables show the estimates of cumulative incurred claims, gross of retrocession, for each underwriting year at each reporting date, together with cumulative claims paid at March 31, 2025 and December 31, 2024.

The fair value of these short-term financial assets is not individually determined as the carrying amount is considered reasonable approximation of their fair value.

6. HELD-FOR-TRADING SECURITIES

This account is composed of the following:

	March 31, 2025	December 31, 2024
UITF	P273,147	P216,358
Equity securities	218,259	231,600
	P491,406	P447,958

UITF is a collective investment scheme, wherein funds of investors are pooled together. Subscription and/or redemption to these UITFs are reflected through units of participation. This is managed by a professional fund manager and is invested in various underlying instruments, such as time deposits and government securities.

Equity securities consist mainly of investment in companies listed in the PSE.

The details of the HFT securities are as follows:

	March 31, 2025	December 31, 2024
Balance at beginning of period	P447,958	P532,670
Acquisitions	774,805	3,251,907

Investment in ARC shares	40,339	40,783
	P5,843,113	P5,279,741

Debt securities include investments in corporate bonds and government securities.

Debt securities earn interest at annual rates ranging from 1.38% to 8.63% in 2025 and 2024. Interest income amounting to P69.77 million in 2025 and P61.75 million in 2024 is presented as part of Investment and other income and expenses – net account in the statements of income (see Note 21).

The following presents the fair value of debt securities by contractual maturity dates:

	March 31, 2025	December 31, 2024
Due within one year	P949,558	P73,644
Due after one year through five years	3,615,873	3,819,270
Due after five years through ten years	826,071	897,635
Due after ten years	16,136	5,180
	P5,407,638	P4,795,729

The balance of equity securities classified as AFS financial assets consists of:

	March 31, 2025	December 31, 2024
Cost:		
Quoted in the stock exchange	P355,540	P384,153
Not quoted in the stock exchange	10,834	10,834

Equity securities consist mainly of investment in companies listed in the PSE.

Dividend income from these equity securities amounting to P5.75 million in 2025 and P5.69 million in 2024 is presented under the Investment and other income and expenses – net account in the statements of income (see Note 21).

The shares of ARC have been issued in the name of the Government of the Philippines (GoP) as the Philippine government's participation in the joint undertaking of Asian countries to organize a reinsurance company that will service the needs of the region. The GoP assigned such shares, including any interest accruing thereon, to the Company.

The GoP designated the Company as the national institution authorized to subscribe and pay for the said shares of stock. The shares of stock of ARC, while not for sale, were classified under this category since these do not qualify for inclusion in any other categories of financial assets. The fair value of investment in ARC shares amounted to P40.34 million and P40.78 million as at March 31, 2025 and December 31, 2024, respectively.

The reconciliation of the carrying amount of AFS financial assets is as follows:

Unrealized foreign currency (losses) gains	(2,075)	7,930
Balance at end of period	P3,869,160	P4,024,499

In May 2017, the Company's BOD approved the reclassification of certain investment in corporate bonds amounting to P1.09 billion previously classified as AFS financial assets to HTM securities due to change in intention to collecting interest coupons until maturity. New effective interest rates at the date of reclassification range from 2.36% to 6.24%.

In September 2018, the Company's BOD approved the reclassification of certain government securities from AFS financial assets to HTM securities amounting to P473.13 million with face value of P562.50 million (see Note 7). These are earmarked as security for the benefit of cedants and creditors of the Company in accordance with the provisions of the Insurance Code. The new effective interest rate at the date of reclassification is 7.13%.

As at March 31, 2025 and December 31, 2024, the fair value of the reclassified debt securities amounted to P0.53 billion and P0.58 billion, respectively. The unamortized fair value loss that would have been recognized in other comprehensive income if the AFS financial assets had not been reclassified amounted to P22.71 million for the period ended March 31, 2025 while the unamortized fair value gain that would have been recognized in other comprehensive income if the AFS financial assets had not been reclassified amounted to P2.83 million for the period ended December 31, 2024.

The carrying amount of the reclassified debt securities amounted to P0.56 billion and P0.58 billion as at March 31, 2025 and December 31, 2024, respectively.

In 2025 and 2024, the Company recognized interest income on HTM securities amounting to P53.80 million and P50.77 million, respectively (see Note 21).

16. FORWARD LIABILITY

The outstanding forward contract as at December 31, 2024 is as follows.

December 31, 2024

<i>in thousands</i>			
Transaction date	Settlement date	Receivable	Payable
December 9, 2024	March 28, 2025	INR170,200	\$2,000

As at March 31, 2025, the Company does not have any outstanding forward contract.
As at December 31, 2024, the Company recognized forward liability amounting to P0.21 million.

The Company recognized fair value loss on forward contract of P0.83 million in 2025 and fair value gain on forward contract of P2.01 million in 2024 under Investment and other income and expenses – net in the statements of income (see Note 21).

17. ACCOUNTS PAYABLE AND ACCRUED EXPENSES

This account includes the following:

	<i>Note</i>	March 31, 2025	December 31, 2024
Accounts payable and accrued expenses		P202,611	P222,534
Income tax payable		81,674	81,674
Deposit liability		37,202	38,631
Deferred output VAT		25,638	25,615
Defined benefit liability		12,463	8,206
Withholding taxes payable		4,719	9,562
Dividends payable	<i>24.3</i>	1,662	1,662
		P365,969	P387,884

Accounts payable represent balances due to suppliers or for the purchase of goods or services. This includes accrued expenses pertaining to accruals of professional fees, outside services, utilities, uniforms, membership dues and meeting expenses and the related input VAT.

Income tax payable pertains to amount due by the Company as a result of taxable income for the year using tax rates enacted at the reporting date, after deducting the creditable withholding taxes and prepaid income taxes.

In February 13, 2020, the Company entered into an ordinary life coinsurance agreement with a ceding company for its specific in-force block of business, where it assumed a share of the gross premium in return for a proportionate share of the coverage of all benefits. An initial consideration of P211.10 million was transferred to the Company representing the statutory reserves of the underlying contracts. As the related insurance risk of the underlying contracts were not considered significant, this contract was accounted for as a Deposit liability. The statutory reserves are measured based on the assumptions consistent with the Life's valuation standards set by the IC.

Movements resulting from the remeasurement of the statutory reserves are recognized as Movement in deposit liability as reported under Investment and other income and expenses – net account (see Note 21). As at March 31, 2025 and December 31, 2024, the statutory reserves amounted to P37.20 million and P38.63 million, respectively.

Deferred output VAT pertains to VAT from the sale of goods and services that are still outstanding as at end of period. These amounts are not due for remittance to the BIR until the receivables are collected.

Other than the statutory reserves discussed above, the Management considers the carrying amount of accounts payable and accrued expenses recognized in the statements of financial position to be a reasonable approximation of their fair value due to their short duration.

18. CLAIMS AND CLAIMS RESERVES

Claims and claims reserves are losses due to ceding companies under reinsurance agreements inclusive of reserves for IBNR claims, loss adjustment expenses payable and MfAD as shown below.

	March 31, 2025	March 31, 2024
Short-term benefits	P15,762	P14,739
Post-employment defined benefit	2,136	1,279
	P17,898	P16,018

26. SOLVENCY

Under the Amended Insurance Code, an insurance company doing business in the Philippines shall at all times maintain the minimum paid-up capital, and net worth requirements as prescribed by the IC Commissioner. Such solvency requirements shall be based on internationally accepted solvency frameworks and adopted only after due consultation with the insurance industry associations.

Whenever the aforementioned requirement is found to be less than the required to be maintained, the IC Commissioner shall direct the Company to make good any such deficiency by cash, to be contributed by all stockholders of record in proportion with their respective interests, and paid to the treasurer of the Company, within 15 days from receipt of the order. Provided, that the Company in the interim shall not be permitted to take any new risk of any kind or character unless and until it makes good any such deficiency.

In case that a stockholder pays the contribution due from another stockholder by reason of failure or refusal of the latter to do so, shall have a lien on the certificates of stock of the Company appearing in its books in the name of the defaulting stockholder on the date of default, as well as on any interests or dividends that have accrued or will accrue to the said certificates of stocks, until the corresponding payment or reimbursement is made by the defaulting stockholder.

27. EARNINGS PER SHARE

The earnings per share are presented as follows:

	March 31, 2025	March 31, 2024
Net profit available to common shareholders	P194,547	P189,827
Divided by the average number of outstanding common shares (in thousands)	2,123,606	2,123,606
	P0.092	P0.089

Diluted earnings per share is not determined since the Company does not have dilutive shares as at March 31, 2025 and December 31, 2024.

28. COMMITMENTS AND CONTINGENCIES

The following are the significant commitments and contingencies involving the Company:

28.1 Lease Commitments – Company as Lessee

The Company is a lessee under various leases covering warehouse and parking lots having a term of one year with renewal options. The future minimum rentals payable under this non-cancellable operating lease as at March 31, 2025 and December 31, 2024 is P0.77 million and P1.03 million, respectively, which is payable not later than one year.

Rental expense recognized amounted to P0.13 million and P0.11 million in 2025 and 2024, respectively, and is presented in the statements of income as Rentals under General and administrative expenses (see Note 23).

28.2 Legal Claims

The Company is currently involved in various legal proceedings. In consultation with the legal counsel, the related risk has been analyzed as to likelihood of occurrence and amount of future obligation. The Company believes that the outcome of these proceedings as at March 31, 2025 and December 31, 2024 will not have a material adverse effect on the Company's financial position.

28.3 Deficiency Tax Assessments

The Company received the FDDA for the taxable period July 1, 2012 to December 31, 2012 and taxable years 2016, 2017 and 2018. These assessments are in pursuant to which the BIR has sought to investigate the tax periods identified against the Company and consequently examine certain books, records and accounts that relate to transactions in the ordinary course of business. Pursuant to the Company's policy of addressing such actions and in line with prudent business practice, the Company has engaged tax counsel in relation to these matters.

As at March 31, 2025 and December 31, 2024, management believes that there is no probable reason that a material outflow of resources will be required, in excess of what has already been provided as provision, considering the merits of the Company's protest and the sufficiency and validity of the documents submitted to the local tax authorities to support the Company's position.

28.4 Others

In the normal course of business, the Company makes various commitments and incurs certain contingent liabilities that are not given recognition in the accompanying financial statements. Management believes that losses as at March 31, 2025 and December 31, 2024, if any, that may arise from these commitments and contingencies will not have any material effect on the financial statements.

29. CATEGORIES AND OFFSETTING OF FINANCIAL ASSETS AND LIABILITIES

29.1 Comparison of Carrying Amounts and Fair Values

* Excluding taxes payable and defined benefit liability.

Due to the short-term duration, management considers the carrying value of the Company's loans and receivables and financial liabilities at amortized cost approximate their fair value as at the end of the reporting periods.

See Notes 2.4 and 2.9 for a description of the accounting policies for each category of financial instrument including the determination of fair value.

29.2 Offsetting of Financial Assets and Financial Liabilities

For financial assets and financial liabilities, subject to enforceable master netting agreements or similar arrangements, each agreement between the Company and counterparties, including related parties, allows for net settlement of the relevant financial assets and liabilities when both elect to settle on a net basis.

30. FAIR VALUE MEASUREMENT AND DISCLOSURES

30.1 Fair Value Hierarchy

In accordance with PFRS 13, *Fair Value Measurement*, the fair value of financial assets and financial liabilities and non-financial assets which are measured at fair value on a recurring or non-recurring basis and those assets and liabilities not measured at fair value but for which fair value is disclosed in accordance with other relevant PFRS Accounting Standards, are categorized into three levels based on the significance of inputs used to measure the fair value. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that an entity can access at the measurement date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and,
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement.

For purposes of determining the market value at Level 1, a market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

30.2 Financial Instruments Measured at Fair Value

The table below shows the fair value hierarchy of the Company's financial assets measured at fair value in the statements of financial position on a recurring basis (amounts in thousands).

	<i>Notes</i>	Level 1	Level 2	Level 3	Total
March 31, 2025					
HFT securities	6	P491,406	P–	P–	P491,406

AFS financial assets	7	5,227,968	5,100	46,673	5,279,741
Forward liability	16	–	207	–	207

The movements of the AFS financial assets classified under Level 3 in the fair value hierarchy is shown below:

	March 31, 2025	December 31, 2024
Balance at beginning of period	P46,673	P42,453
Fair value (losses) gains	(128)	2,996
Foreign currency (losses) gains	(316)	1,224
Balance at end of period	P46,229	P46,673

There has been no transfer between levels in 2025 and 2024.

Described below are the information about how the fair value of the Company's classes of financial assets are determined.

a) Equity securities

As at March 31, 2025 and December 31, 2024, instruments included in Level 1 comprise equity securities classified as HFT securities and AFS financial assets. These securities were valued based on their market prices quoted in the PSE at the end of each reporting period.

Golf club shares classified as AFS financial assets are included in Level 2 as their prices are not derived from market considered as active due to lack of trading activities among market participants at the end or close to the end of the reporting period. Moreover, investment in equity securities held in a private company is included in Level 3 since its market value is not quoted in an active market, hence, measured by reference to the private company's book value using the most recent available financial data. The estimated fair value will increase (decrease) if the book value increases (decreases).

b) Debt securities

The fair value of the Company's debt securities, which consist of government and corporate bonds, is estimated by reference to quoted bid price in active market at the end of the reporting period and is categorized within Level 1.

c) UITF

The fair value of the Company's UITF which is classified as money market funds and consist of units of participation on the Fund's investments in short-term fixed income instruments consisting of time deposits and government securities with tenors of less than one year is estimated by reference to the net asset value published by the fund managers and is categorized within Level 1.

d) Forward asset and liability

The fair value of the Company's forward asset and liability is estimated by reference to the foreign exchange rate published by the Bangko Sentral ng Pilipinas at the end of the reporting period and is categorized within Level 2.

30.3 Financial Instruments Measured at Amortized Cost for which Fair Value is Disclosed

The tables below summarize the fair value hierarchy of the Company's financial assets and financial liabilities which are not measured at fair value in the statements of financial position but for which fair value is disclosed.

* Excluding taxes payable and defined benefit liability

For financial assets other than HTM securities, management considers that the carrying amount of those short-term financial instruments approximate their fair value.

30.4 Fair Value Measurement for Non-financial Assets

The Company used market comparable approach as a valuation technique in measuring the fair value of its investment properties to arrive at fair value that is more representative of the investment properties' highest and best use. As at March 31, 2025 and December 31, 2024, the fair value of the investment properties is P34.25 million, classified under Level 3 of the fair value hierarchy (see Note 14). The most significant input into this valuation approach is the price per square meter, hence, the higher the price per square meter, the higher the fair value.

31. CAPITAL MANAGEMENT OBJECTIVES, POLICIES AND PROCEDURES

The Company's capital management objectives are (a) to ensure the Company's ability to continue as a going concern; and, (b) to provide an adequate return to shareholders by complying with the capital requirements and limitation enforced by the IC and by aligning the Company's operational strategy to its corporate goals. The capital requirements and limitations are as follows:

31.1 Minimum Capitalization

Under Section 289 of the Republic Act (RA) No. 10607 (The New Insurance Code), any partnership, association, or corporation authorized to transact solely reinsurance business must have a capitalization of at least P3,000,000,000 paid in cash of which at least 50% is paid-up capital and the remaining portion thereof is contributed surplus, which in no case shall be less than P400,000,000 or such capitalization as may be determined by the Secretary of Finance, upon the recommendation of the IC Commissioner.

As at March 31, 2025 and December 31, 2024, the Company has complied with the minimum capital requirements.

31.2 Risk-Based Capital Requirements

As per IC CL No. 2016-68, Amended Risk-Based Capital (RBC2) Framework, all insurance companies must satisfy the annual minimum statutory RBC Ratio set at 100%. RBC ratio is computed by dividing the Company's Total Available Capital (TAC) by the RBC requirement. TAC is the aggregate of Tier 1 and Tier 2, minus deductions, subject to applicable limits and determinations. Tier 1 capital represents capital that is fully available to cover losses of the insurer at all times on a going-concern and winding up basis and is considered to be the highest quality capital available to the insurer. Tier 2 refers to capital not having the same high quality characteristics of Tier 1, but can provide additional buffer to the insurer. RBC requirement or the total required capital of an insurance company is the capital that is required to be held appropriately to the risks an insurance company is exposed to.

As at March 31, 2025 and December 31, 2024, the Company has complied with the risk-based capital requirements.

31.3 Limitation on Dividend Declaration

The Company's BOD is authorized to declare dividends. A cash dividend declaration does not require any further approval from the stockholders. However, a stock dividend declaration requires further approval of the stockholders holding or representing not less than two-thirds of the Company's outstanding capital stock. Dividends may be declared and paid out of the unrestricted retained earnings which shall be payable in cash, property, or stock to all stockholders on the basis of outstanding stock held by them, as and at such times as the BOD may determine and in accordance with law.

The Insurance Commission, under Circular Letter No. 2021-02, dated January 7, 2021, provides that all regulated entities authorized to do business in the Philippines shall meet the following regulatory measures at all times, without regulatory relief, and which shall be duly attested by the President and Treasurer of the company, before declaration and/or distribution of dividends out of the unrestricted retained earnings:

- unimpaired paid-up capital stock;
- the net worth requirements as prescribed by Circular Letter (CL) No. 2015- 02-A and Section 194 of the Amended Insurance Code;
- the solvency requirements defined by Section 200 of the Amended Insurance Code;
- in the case of life insurance companies, the legal reserve fund required by Section 217;
- in the case of corporations other than life, the legal reserve fund required by Section 219; and
- a sum sufficient to pay all net losses reported, or in the course of settlement, and all liabilities for expenses and taxes.

The Company is required to report such dividend declaration or distribution to the IC within 30 days from the date of such declaration.

The SEC, through its Memorandum Circular 16 dated September 19, 2023, has set the revised guidelines in determining the appropriate amount of Retained Earnings available for dividend distribution. Based on the circular, dividends shall be declared out of unrestricted retained earnings of the corporation. Accordingly, a corporation cannot declare dividends when it has zero or negative retained earnings otherwise known as Retained Earnings Deficit. For such purpose, the surplus profits or income must be a bona fide income founded upon actual earnings or profits. The existence, therefore, of surplus profits arising from the operation of corporate business is a condition precedent to the declaration of dividends.

The phrase "actual earnings or profits" shall be the net income for the year based on the audited financial statements, adjusted for the following unrealized items:

- Equity in net income of associate/ joint venture, net of dividends declared;
- Unrealized foreign exchange gain, except those attributable to cash and cash equivalents;
- Unrealized fair value adjustment (mark-to-market gains) of financial instruments at fair value through profit or loss (FVTPL);
- Unrealized fair value gain of investment property;
- Deferred tax asset; and other unrealized gains and adjustments that the SEC may prescribe.

32. SELECTED FINANCIAL PERFORMANCE INDICATORS

The following basic ratios measure the financial performance of the Company:
